# We team up with the most demanding Oils & Fats processors in the world

### **COMPLETE PREPARATION PLANTS**

Innovative proprietary Technologies based on the experience of

- 220+ Preparation Plants
- 3.000+ Rosedowns Presses

### COMPLETE EXTRACTION PLANTS

Reliable and unmatched Technologies based on the experience of

- 900+ Extractors
- 900+ Desolventiser Toasters (Dryer Coolers)
- 700+ Distillations & Solvent Recovery Sections

### **COMPLETE REFINING PLANTS**

State-of-the-Art refining Technologies based on the experience of

- 700+ Oil pretreatment Processes
- 900+ Bleaching Processes
- 1,400 + Deodorizing Processes

### COMPLETE FAT MODIFICATION PLANTS

High performance Technologies

- based on the experience of :100+ Full Hydrogenation Processes
- 90 Linteractorification Processes
- 400+ Fractionation Processes

Desmet Ballestra designed and delivered the largest extraction plant in the world, operating at 20,000 TPD with unmatched efficiency.

Science behind Technology

# Your Technology Partner for Oleochemical Derivatives

Non-ionic surfactants
Nitriles/amides/amines
Fatty acid chlorides
Quaternary salts

# BUSS ChemTech

For almost 70 years, Buss ChemTech has been delivering innovative, reliable and safe process design solutions to oleochemical companies around the globe.

We can provide a process design/equipment package that fits your needs.

### **Buss ChemTech AG**

Hohenrainstrasse 12A | 4133 Pratteln 1 | Switzerland +41 61 825 6462 | www.buss-ct.com | info@buss-ct.com

# Driving innovation wherever the road takes us

### DON'T MISS CONNECTING WITH EVONIK AT AOCS! Monday 5-7 Home Care and Laundry Performance Boosters \* S&D1 and New Benefits Mike Williams, Alkoxylation Technology Manager, Session Chair Monday 5-7 New Technologies in Industry \* S&D 1.1a Eric "Rick" Theiner, Application Technology Manager, Session Chair Wednesday 5-9 Glycolipid Biosurfactants: Characteristic Curvature \* S&D 4 and Applications in Microemulsions and Emulsions Zheng Xue, Oil, Gas, and Geotech Chemist

As one of the world's leading specialty chemicals companies, Evonik has a long history of groundbreaking innovation.

Innovation is our key driver. Evonik has expanded its innovative product offerings through recent acquisitions of linear alcohol ethoxylates, ether amine-based derivative surfactants, and silicone-based technologies.

Our comprehensive porfolio offers mark-leading brands such as TEGO® Sorb, REWOCARE®, REWOQUAT®, TOMAMINE®, TOMADOL®, and more.

Visit us in Booth #408

Welcome to Minneapolis and the 109th occurrence of the AOCS Annual Meeting & Expo! This year's event promises to deliver something for everyone — hundreds of oral and poster presentations in our world-renowned technical program, 95+ global companies spotlighted in

the Expo, 13 special sessions, and plentiful networking opportunities and special events, including a 5K Fun Run/Walk at scenic Loring Park!

AOCS is honored to host the ISF Lectureship Series at the 2018 AOCS Annual Meeting. Lectures have been scheduled during the Welcome Plenary on Sunday, and Award Session on Monday. Since 1974, the International Society for Fat Research (ISF) has honored its founder, Hans P. Kaufmann, by holding the Kaufmann Memorial Lecture every two years. The lecturers include some of the world's most renowned names in the field of fat research, including this year's winner, Dr. Kazuo Miyashita.

Be sure to make the most of your time at the AOCS Annual Meeting — attend sessions, peruse the exhibit, connect at the networking events and increase your involvement in AOCS! Now is the perfect time to join a committee or a Common Interest Group, attend a roundtable discussion and offer a topic for next year's Annual Meeting, or meet with your Division leaders and volunteer to chair a session! Becoming part of the AOCS community is your first step to boosting your personal and professional development.

I look forward to seeing you and hope you enjoy the 2018 AOCS Annual Meeting!

Best regards.

# **ISF Lectureship Series**

AOCS is honored to host the International Society for Fat Research (ISF) Lectureship Series at the 2018 AOCS Annual Meeting.

Founded in 1954, The International Society for Fat Research is a federation of 23 regional and national scientific organizations active in the areas of fats, oils, and lipid research. The ISF mission is to stimulate the exchange of high-quality scientific information and technology pertaining to fats, oils, and related materials through global cooperation with fats and oils organizations by enhancing meetings through excellent, thought-provoking programming and attracting a larger, more international delegate base to meetings. To accomplish its mission, the ISF provides keynote lectures for presentation at a meeting of one of the member societies. Lecture information begins on page 32.

# **MEETING INFORMATION**

### @home

Want to learn more about the Society or find out how you can be more involved? Visit with staff in the @home section of the Expo Hall to discuss all things AOCS! This area of the Expo Hall houses the popular souvenir photos, AOCS Press bookstore and a drawing for US \$500! See page 6 for details. @home is open Sunday from 10 a.m.-5:30 p.m., Monday from 7 a.m.-6 p.m., Tuesday from 7 a.m.-6:45 p.m. and Wednesday from 7 a.m.-3 p.m.

### **Abstracts**

Abstracts are published as submitted. Search and print abstracts from the computer lab in M 100 J. Abstracts are also available online or on *The App* through May 31, 2018.

### The App

Sponsored by desmet balle

The official app of the 2018 AOCS Annual Meeting & Expo is provided by CrowdCompass. See page 8 for download instructions.

### **Career Services**

Searching for a new career or the perfect employee? Stop by the AOCS Career Center across from registration to browse the open positions and attendee CVs. If you have a job posting to share, or wish to post your résumé, feel free to place copies in an open bin. Career services are available throughout the year on www.aocs.org/careers. AOCS members receive discounts up to 50% on job postings and all job seeker services are free.

### **Computer Lab**

Work areas with computers and printer access are available in room M 100 J on the mezzanine level of the Convention Center for you to check email, print abstracts, and finalize presentations. The lab is open Sunday from 10 a.m.-5 p.m., Monday and Tuesday from 7 a.m.-5 p.m., and Wednesday from 7 a.m.-2 p.m.

### **Emergency Contacts**

- Please provide emergency contact information to AOCS by completing the reverse side of your name badge.
- You may also login to the AOCS website, select "Emergency Contacts" in the communication section of your My Account page, and add the information to your AOCS record. (If you do not recall your login details, please see the registrars at the Registration Desk.)
- This information will only be used by AOCS staff or medical personnel in the event of an emergency.

### **Event Tickets**

- If you pre-registered, your tickets are in your registration envelope along with your name badge. If you registered on site, you received your tickets with your other meeting materials.
- Keep your tickets with you, as many AOCS events require tickets to be admitted.
- Tickets fit inside your name badge holder for easy access.

### **Lost and Found**

Items may be turned in or recovered at the Registration Desk.

### **Mobile Phones, Photography, and Recording**

Please turn off your mobile phone (or set it to vibrate) during sessions. No video recording, tape recording, or still photography is allowed in the session rooms, except by registered media. Video or still photography of exhibitors or posters is not allowed, unless permission is granted by the exhibitor or poster author.

VENZIA

Name Badges	Sponsored by
	ded to indicate registration status:
Full Registrants	
Monday Only	Yellow
Tuesday Only	Green
Wednesday Only	Purple
Guest	

- Only registrants that have a badge with a color stripe are allowed to attend sessions.
- If you are not a full registrant, but would like to upgrade, please see the Registration Desk.

### **The Power Lounge**

Sponsored by PATTYN°

Recharge your mobile device batteries in the Expo Hall.

### **Presentations**

Presentations at the meeting were prepared by and are the sole property of each presenter. Speakers have been given the AOCS guidelines for developing effective presentations and it is their responsibility to follow these guidelines.

Presentations will be available to AOCS members in the AOCS Premium Content Library. Visit www.informconnect. org/JoinAOCS for details. Many of the papers presented during the meeting may also appear in AOCS Press publications.

### **Program Changes**

Changes that came about after the printing of the Annual Meeting Program can be found on *The App*. See page 8 for download instructions.

### **Publish your Research with AOCS**

Showcase your best work! AOCS encourages speakers to submit their work for publication. Speakers who wish to publish their paper in the *Journal of the American Oil Chemists*'

Society (JAOCS), Lipids, or Journal of Surfactants and Detergents (JSD) should visit www.aocs.org/journals for more details. AOCS members now enjoy free online access to current and archived AOCS journals. To submit a magazine article based on your paper to INFORM, contact Kathy Heine, Managing Editor, at kathy.heine@aocs.org.

### Registration

The Annual Meeting registration list is available online at or on *The App* through May 24, 2018. See page 8 for download instructions.

The registration desk in Hall B is open Sunday from 10 a.m.–7 p.m., Monday from 7 a.m.–6 p.m., Tuesday from 7 a.m.–6:45 p.m. and Wednesday from 7 a.m.–3 p.m.

### **Safety**

Please take a moment to familiarize yourself with fire-safety precautions that are posted in your hotel guest room. For your safety, double-lock the door when you are in your room, lock any connecting doors from your side, and make sure to lock your door when you leave your room. Hotels have limited liability regarding theft of personal property from hotel rooms, so please store extra cash or other valuables in a safe deposit box provided by the hotel.

### **Smoking Policy**

Smoking is prohibited at all AOCS functions.

### **Social Media**

Share your Annual Meeting experience online! Use **#AOCS2018** to join the conversation.

### **Souvenir Photos**

Sponsored by Cargill

Back by popular demand are the complimentary souvenir photos — the perfect Annual Meeting souvenir! Join your colleagues in front of the greenscreen in the @home section of the Expo Hall on Sunday from 10 a.m.–6 p.m., Monday from 7 a.m.–6 p.m., Tuesday from 7 a.m.–6 p.m. and Wednesday from 7 a.m.–3 p.m.

Look for your photo on the @AOCSfan Facebook wall!

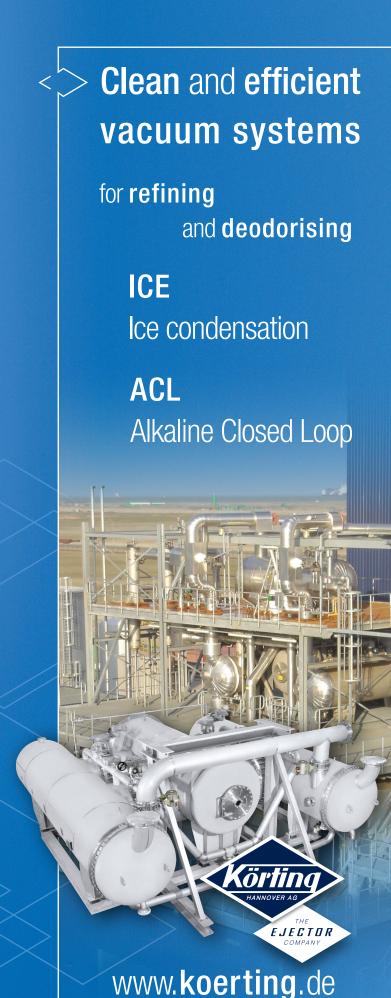

### Wi-Fi

Sponsored by desmet balls

Complimentary wi-fi is available throughout the meeting space.

Network SSID: desmet Password: ballestra

## **Introducing AOCS @home**

AOCS Information Services has undergone a renovation. When you enter the Exhibit Hall this year, you will find AOCS @home instead — your home away from home during the 2018 Annual Meeting & Expo.

Take a break from visiting with exhibitors by relaxing in the living room, where you can catch up with colleagues after another busy year. You can also join your colleagues in front of the greenscreen for an *INFORM* magazine "Scientist of the Year" photo or a fun "family" photo with photobooth props, sponsored by Cargill. AOCS staff will be @home to answer your questions throughout the meeting.

"For many of our members, AOCS membership is not only a professional affiliation but a community of colleagues, and the Annual Meeting is a time to bring everyone 'home.' We wanted a way to represent that feeling during the meeting," according to Len Sidisky, incoming AOCS President.

Copies of all AOCS Academic Press titles will be on display throughout AOCS @home. The display will include two brand new 2018 titles: "Lipid Modification by Enzymes and Engineering Microbes" and "Polyunsaturated Fatty Acid Metabolism." Stop by to learn more about the contributions these and all AOCS titles have made to advancing the science and technology of oils, fats, lipids, proteins and surfactants. You can order a copy of a title on-site or take an order form with you.

Even if you don't have time to stay, please visit AOCS @home to "mail" your demographics form in the mailbox. You should have received the form in your registration packet. If not, you can pick up a new form at the registration desk. Everyone who "mails" their form will be entered into a drawing to win US \$500. For all members, the form will better help AOCS serve your needs during the year by maintaining current contact information and technical interest areas.

We hope to see you @home. Stop by and say. "hi!"

### Help AOCS better serve your needs

"Mail" your demographics form at AOCS @home and be entered into a drawing to win US \$500.

# THANK YOU!

AOCS greatly appreciates the generous contributions from the following organizations. Without their support, the success of the Annual Meeting would not be possible.

### **AOCS** — Over a Century of Service to the Fats and Oils Industries

Recognizing the need to standardize methodology and to foster new techniques, nine analytical chemists founded the American Oil Chemists' Society (AOCS) in 1909. This meeting continues the traditions developed in the Society's first century and is the launching point for new initiatives and technologies to foster increased growth for the industry over the next century.

### **AOCS Mission**

AOCS advances the science and technology of oils, fats, proteins, surfactants and related materials, enriching the lives of people everywhere.

### **Volunteer Opportunities**

Want to get more involved in the planning of the AOCS Annual Meeting? View volunteer opportunities at annualmeeting.aocs.org/2019.

### Is your company missing from this list?

Learn about the corporate advantage at the Corporate Lounge in the exhibit hall or contact Doreen Berning (doreenb@aocs.org).

### SPECIAL ACTIVIT NETWORKING EVENTS

Make the most of your meeting experience! Take advantage of these opportunities for face-to-face interactions with colleagues and develop important connections with other industry professionals from around the world.

Add these events to your meeting itinerary on *The App*! See page 8 for download instructions.

### **Walk the Halls Pedometer Challenge**

Sunday, May 6 at 10 a.m.-Wednesday, May 9 at 1:30 p.m. Hall B — Registration

We walk miles and miles while attending the AOCS Annual Meeting. Ever wonder how far? Learn the answer and participate in some friendly competition! Don't delay; the competition is limited to the first 500 participants who pick up a pedometer.

To begin, pick up a pedometer at registration and start walking! Check-in at registration during Expo hours to post your steps on the leaderboard, Monday-Wednesday. Each day you check-in, you'll be automatically entered to win US \$50! One winner will be chosen at random each day.

Keep your eye on the leaderboard - the three attendees with the most cumulative steps recorded as of 1:30 p.m. on Wednesday will each win prizes! Second and third place finishers each receive US \$100 and the top finisher wins a Fitbit Ionic Smartwatch!

Are you crushing the competition? Tweet @AOCS with #AOCS2018 to let others know you are the one to beat!

### **Newcomer Speed Networking**

Sunday, May 6 | 3 p.m.-4 p.m. | Hall B - Fast Track

New to the AOCS Annual Meeting? Want to connect with people on the first day? Then participate in the Newcomer Speed Networking session! In this fast-paced activity, you will meet many new attendees in addition to getting to know AOCS member leaders. Stick around until the end to ask questions about how to get the most out of your time at Annual Meeting.

Joining us? Tweet @AOCS with #AOCS2018 to spread the word about this great event!

### **President's Welcome Reception**

Sunday, May 6 | 5:30 p.m.-7 p.m. | Plaza Lawn

Reconnect with colleagues and network with new business contacts during this reception on the beautiful Minneapolis Convention Center Plaza Lawn.

### **Share your Annual Meeting experience!**

#AOCS2018

### Lunch

Monday, May 7 | 12:15 p.m.-2 p.m. | Hall B Wednesday, May 9 | Noon-1:55 p.m. | Hall B

Take this time to enjoy a complimentary lunch, network with your colleagues, explore the Expo hall and meet with our various exhibitors.

### 5K Fun Run/Walk

Tuesday, May 8 | 6 a.m.-7 a.m. | Loring Park

Kick off day three of the Annual Meeting with a leisurely stroll or guick run around scenic Loring Park, a fixture on the Grand Rounds National Scenic Byway. Pre-registration is required; the event is limited to 200 participants. Check-in at the park begins at 5:30 a.m. We'll see you there!

Running with us? Tweet @AOCS with #AOCS2018 to encourage others to sign up!

### **Dessert break**

Tuesday, May 8 | 1:30 p.m.-2:30 p.m. | Hall B

After lunch, grab a sweet treat, visit exhibitors throughout the hall and network with like-minded peers.

### **Happy Hour receptions**

Monday, May 7 | 5 p.m.-6 p.m. | Hall B Tuesday, May 8 | 5:45 p.m.-6:45 p.m. | Hall B

Develop important connections with other industry professionals from around the world. A variety of beverages will be served.

Did we take your picture at the reception? We'll post it on the @AOCSfan Facebook wall!

### **SPONSORS**

# **COMMON INTEREST GROUP EVENTS**

AOCS Common Interest Groups (CIGs) foster communication between members who are at the same point in their careers: Students, Young Professionals, and Professional Educators. Connect with your peers to share experiences, insights, concerns, and solutions.

Add these events to your meeting itinerary on *The App*! See page 8 for download instructions.

### **Share your Annual Meeting experience!**

#AOCS2018

### **Joint CIG Luncheon**

Wednesday, May 9 | Noon-2 p.m. | Hall B

Members of all three CIGs are invited to collect their lunch from the Exhibit Hall and come network with other CIG members and industry leaders. Learn how to get involved with these active groups and AOCS.

Joining us? Tweet @AOCS with #AOCS2018 to encourage others to come, too!

### **Students**

Student members are the future of AOCS and the oils, fats, proteins, and related materials industry. Discover the free resources AOCS provides to enhance your education. The Student CIG provides networking opportunities and ways to become more involved with AOCS and industry leaders.

### **Speed Networking**

Sunday, May 6 | 3-4 p.m. | Hall B - Fast Track

# Meet and Greet at President's Welcome Reception

Sunday, May 6 | 5:30 p.m.-7 p.m. | Plaza Lawn

**Look for the Student CIG flag!** 

### **Business Meeting**

Monday, May 7 | 4-5 p.m. | L 100 B

### **Young Professionals**

Through the Annual Meeting, Young Professionals have the opportunity to expand their professional network, which is vital to career growth. Meet your fellow peers and experienced industry leaders through the various networking opportunities. This CIG is for members who are less than 35 years of age and have been an AOCS member for less than ten years.

### **Speed Networking**

Sunday, May 6 | 3-4 p.m. | Hall B - Fast Track

# Meet and Greet at President's Welcome Reception

Sunday, May 6 | 5:30 p.m.-7 p.m. | Plaza Lawn

**Look for the Young Professional CIG flag!** 

### Reception

Sunday, May 6 | 7-8 p.m. | 101 B

Stopping by? Tweet @AOCS with #AOCS2018 to encourage other young professionals to come, too!

# Hot Topic Session: Bridging the Gaps in a Diverse Workplace

Monday, May 7 | 7:55 a.m.-10 a.m. | 200 H See page 28 for details.

### **Business Meeting**

Tuesday, May 8 | 5-6 p.m. | L 100 B

### **Professional Educators**

The Professional Educator CIG supports educators in the lipid science and oil technology fields by providing a network of peers which leads to collaboration, the sharing of teaching solutions, and resources throughout the year.

# Meet and Greet at President's Welcome Reception

Sunday, May 6 | 5:30 p.m.-7 p.m. | Plaza Lawn

**Look for the Professional Educator CIG flag!** 

### Hot Topic Session: Research and Technology Priorities for Fats and Oils from U.S. Government and Industrial Perspectives

Monday, May 7 | 10:05 a.m.-12:10 p.m. | 200 C See page 30 for details.

# DIVISION EVENTS

Affiliate with colleagues who have similar scientific and technological interests by attending a Division function and spending time in the Expo Hall within the areas identified by flags. Divisions develop meeting programming, fund student awards and travel grants and offer numerous leadership opportunities. AOCS members have discovered that through Divisions, connections are made that last a lifetime. Make plans to attend the following events.

Add these events to your meeting itinerary on *The App*! See page 8 for download instructions.

### **Share your Annual Meeting** experience!

#AOCS2018

### **Leadership Meetings**

### **Division Executive Steering Committees**

Sunday, May 6 | 9:30 a.m.-11:00 a.m. 101 G

### **Division Council**

Sunday, May 6 | 11:15 a.m.-12:15 p.m.

### 2019 Session **Planning Roundtables**

All meeting attendees are invited to attend roundtable discussions and assist in developing the technical program for the 2019 AOCS Annual Meeting. AOCS and the Annual Meeting Program Committee greatly value your input! Division membership is not required to participate.

### **Analytical**

Monday, May 7 | 5 p.m.-6 p.m. 101 G

### Biotechnology

Tuesday, May 8 | 12:45 p.m.-1:45 p.m.

### **Edible Applications Technology**

Tuesday, May 8 | 12:20 p.m.-1:30 p.m. 101 A

### **Health and Nutrition**

Monday, May 7 | 12:45 p.m.-1:45 p.m. L 100 A

Will include the Business Meetina

### **Industrial Oil Products**

Monday, May 7 | 12:45 p.m.-1:45 p.m. 200 H

### **Lipid Oxidation and Quality**

Tuesday, May 8 | 1:40 p.m.-2:30 p.m. Hall B — Fast Track

### **Phospholipid**

Tuesday, May 8 | 12:45 p.m.-1:45 p.m. L 100 B

### **Processing**

Monday, May 7 | 1:15 p.m.-2 p.m. Hall B — Fast Track

### **Protein and Co-Products**

Tuesday, May 8 | 12:45 p.m.-1:45 p.m. 101 C

### **Surfactants and Detergents**

Monday, May 7 | 12:45 p.m.-1:45 p.m. 200 C

### **Networking Events**

Attending Division events is the best way to meet colleagues in your interest area(s). Division events are open to all delegates, but some require a ticket.

Add these events to your meeting itinerary and view event presentations on The App! See page 8 for download instructions.

### Analytical Luncheon

Wednesday, May 9 | Noon-1:45 p.m. M 101 C

### **Biotechnology Poster Oral Presentations**

Monday, May 7 | 5:15 p.m.-6:15 p.m. Hall B — Fast Track

### **Biotechnology Dinner**

Tuesday, May 8 | 7 p.m.-9 p.m. M 100 H

### **Edible Applications Technology Dinner**

Monday, May 7 | 6:30 p.m.-8:30 p.m. M 100 D

### **Health and Nutrition Dinner**

Tuesday, May 8 | 7:30 p.m.-9 p.m. The Long Room at Brit's Pub. 1110 Nicollet Mall, Minneapolis, MN

### **Industrial Oil Products** Luncheon

Tuesday, May 8 | Noon-1:30 p.m. M 100 C

### **Lipid Oxidation and Quality** Luncheon

Tuesday, May 8 | Noon-1:30 p.m. M 100 H

### **Phospholipid Dinner**

Monday, May 7 | 7 p.m.-9 p.m. M 100 F

### **Processing Luncheon**

Tuesday, May 8 | Noon-1:30 p.m. M 100 F

### **Protein and Co-Products** Dinner

Tuesday, May 8 | 7 p.m.–9 p.m. M 100 G

### **Surfactants and Detergents Networking Reception**

Monday, May 7 | 6:30 p.m.-8:00 p.m. M 101 C

### **Surfactants and Detergents** Luncheon

Tuesday, May 8 | Noon-1:45 p.m. M 101 C

# **SECTION EVENTS**

AOCS Sections bring members together based on geographical location. Sections organize regional meetings, fund student travel grants, sponsor awards and provide leadership opportunities. Sections facilitate friendships, conversations and connections that often lead to new research collaborations.

Get involved with a Section — there are seven in all — by attending one of the events listed below. Most are open to all attendees, but some may require a ticket.

Add these events to your meeting itinerary on *The App*! See page 8 for download instructions.

### **Leadership Meetings**

### **Section Council**

Monday, May 7 | 3 p.m.–4 p.m. L 100 C

### Asian

Monday, May 7 | 12:45 p.m.–1:45 p.m. L 100 E

### China

Monday, May 7 | 4 p.m.–5 p.m. L 100 C

### **Networking Events**

### **Canadian Luncheon**

Monday, May 7 | 12:15 p.m.–1:45 p.m. M 100 F

### **China Luncheon**

Tuesday, May 8 | 12:15 p.m.-1:30 p.m. M 100 F

# **European Networking Reception**

Monday, May 7 | 5 p.m.–6 p.m. Hall B No ticket required.

### **Latin American Luncheon**

Tuesday, May 8 | Noon-1:30 p.m. M 100 G

# UNCOVER YOUR PERFECT PHO REPLACEMENT

**VOUR U.S.-GROWN DROP-IN SOLUTION** 

A superior product begins with your core ingredient. Fats and oils are central to formulation, and U.S.-grown high oleic soybean oil and interesterified shortening — now fully approved for global use — are exceptional solutions to the challenge of removing partially hydrogenated oils (PHOs) compared to imported alternatives.

Soy-based PHO replacements perform similarly to PHOs and oils high in saturated fat — without contributing trans fat or sacrificing functionality. They are an excellent option for applications that require high stability oils, such as baking, frying, snack foods and dressings.

# **COMMITTEE MEETINGS**

All committee meetings listed below are open, although full agendas may limit participation to committee members only.

**Algal Products Expert Panel** 

Tuesday, May 8 | 4-5 p.m. | L 100 F

### **AOCS Editors' Reception**

Tuesday, May 8 | 7–8 p.m. | The Clubhouse Room at Brit's Pub, 1110 Nicollet Mall, Minneapolis, MN

### **Asian Section Leadership Team**

Monday, May 7 | 12:45-1:45 p.m. | L 100 E

## **Books and Special Publications Committee**

Tuesday, May 8 | 3-4 p.m. | L 100 C

### **China Section**

Monday, May 7 | 4-5 p.m. | L 100 C

### **Division Council**

Sunday, May 6 | 11:15 a.m.-12:15 p.m. | 101 G

## **Division Executive Steering Committees**

Sunday, May 6 | 9:30-11 a.m. | 101 G

### **Foundation Board**

Wednesday, May 9 | 7-8 a.m. | L 100 D

### **Governing Board**

Wednesday, May 9 | 2-5 p.m. | L 100 B

### **ISF Executive Board**

See The App

### **JAOCS** Associate Editors Breakfast

Monday, May 7 | 7-9 a.m. | L 100 B

### **JAOCS Senior Associate Editors**

Sunday, May 6 | 2:30–4 p.m. | 101 A

### **JSD** Committee

Tuesday, May 8 | 11 a.m.-Noon | L 100 D

# **Laboratory Proficiency Program Committee**

Sunday, May 6 | 11 a.m.-Noon | 101 C

### **Lipid Library Committee**

Wednesday, May 9 | 7-8 a.m. | L 100 C

### **Lipids Luncheon**

Tuesday, May 8 | 12:15-2 p.m. | L 100 C

### **Methods Roundtable**

Sunday, May 6 | 1-3 p.m. | 101 E

### **Networking Value Center**

Wednesday, May 9 | 7-8:45 a.m. | M 101 A

### **Olive Oil Expert Panel**

Wednesday, May 9 | 9-11 a.m. | L 100 B

### **Process Contaminants Expert Panel**

Monday, May 7 | 4-5 p.m. | L 100 A

### **Program Committee**

Wednesday, May 9 | 9-11 a.m. | L 100 A

### **Recognition Program Committee**

Sunday, May 6 | 2-3 p.m. | 101 C

### **Section Council**

Monday, May 7 | 3-4 p.m. | L 100 C

### **Technical Leadership Meeting**

Sunday, May 6 | 9-10:30 a.m. | 101 C

### **Uniform Methods Committee**

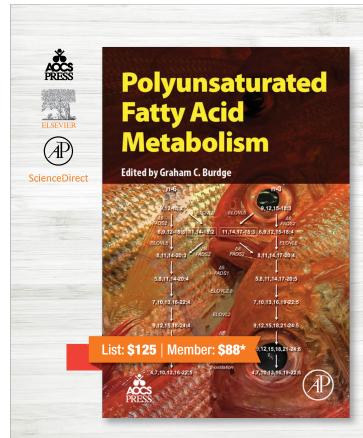

Sunday, May 6 | 3-4 p.m. | 101 E

Add these meetings to your itinerary on *The App*! See page 8 for download instructions.

### Polyunsaturated Fatty Acid Metabolism

### Edited by Graham C. Burdge

May 2018 | 272 pages | ISBN: 9780128112304 Available in softcover and eBook

Polyunsaturated Fatty Acid Metabolism explores major roles of PUFA in the body, including its role as a component of cell membranes where it provides substrates for the synthesis of lipid second messengers. Recent studies are unraveling the effect of interactions between diet and endocrine factors and genetic and epigenetic variation on the regulation of PUFA biosynthesis in animals. Together, these recent findings provide novel insight into the impact differences in PUFA supply have on health. This book captures these findings in a state-of-the-art manner that places them in the wider context of PUFA metabolism and nutritional science.

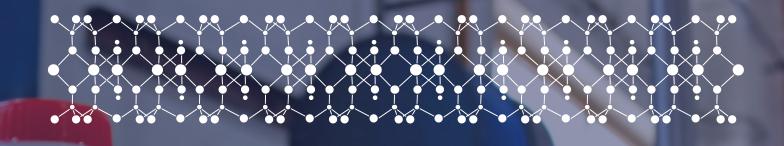

Users will find a comprehensive discussion on the topic that presents the contributions of leading researchers whose combined knowledge creates a cohesive academic resource for researchers, those involved in production of PUFA, and health policy makers.

### **Key Features**

- Provides a comprehensive view of polyunsaturated fatty acid metabolism
- Describes the underlying metabolism of lipids, including polyunsaturated fatty acids
- Includes discussions about recent findings related to the genetic and epigenetic regulation of polyunsaturated fatty acid metabolism

# **AOCS AWARD WINNERS**

AOCS honors those individuals and institutions who have taken the research and technology to the next level, who have advanced the quality and depth of the profession and who have leveraged their knowledge for the benefit of the Society.

AOCS congratulates each of the 2017–2018 award recipients! For information on award lecture schedules, please refer to *The App*. See page 8 for download instructions.

Award lectures are highlighted on the oral and poster presentation pages by a grey box.

**Join us in congratulating our AOCS award winners!** 

#AOCS2018

### **Society Awards**

Presented at the Welcome Plenary Session.

Sunday, May 6 | 4 p.m.-5:30 p.m. | 200 C

### **Fellow Award**

Recognizes: Achievements in science or extraordinary service to the Society.

Rotimi Aluko, Professor in the Department of Food and Human Nutritional Sciences at the University of Manitoba, Winnipeg. He is also the Assistant Director of the Richardson Centre for Functional Foods and Nutraceuticals, Winnipeg. He obtained a PhD (Food Science) degree in 1996 from the University of Guelph, Ontario, Canada. His work focuses on the structure-function properties of food proteins and pep-

tides with special focus on oilseeds and pulses. In addition to over 160 journal article publications, he also has 4 patents. Dr. Aluko has trained 12 PhD, 8 MSc and 9 postdoctoral fellows in addition to several undergraduate summer research interns. The excellence of his research program was recently acknowledged when he was named a "Highly Cited Researcher" in the Agricultural Sciences category, which is recognition given to researchers with peer-reviewed journal citations in the top 1% in the world. Dr. Aluko has been involved with AOCS as a regular conference attendee as well as a technical session organizer and oral paper presenter in the Protein and Co-Products (PCP) Division for the past 13 years. During this period, he has regularly sponsored his staff and students to enable them to attend the AOCS conference and make oral or poster presentations at both the PCP and Nutrition Divisions. His students have won several poster awards during the AOCS conferences and 3 of them are past recipients of the AOCS Honored Student Award. Dr. Aluko also served as Chair of the PCP Division from 2008 to 2010.

Nurhan Dunford, Professor in Oklahoma State University, Biosystems and Agricultural Engineering Department and has a joint appointment with the Robert M. Kerr Food and Agricultural Product Center as an oil and oilseed specialist. She contributes to all three missions of the university, teaching, research, and extension. Dr. Dunford's experience as an engineer and scientist encompasses over twenty-five years in

positions in Turkey, Canada and U.S.A. Her research focuses on optimization of sustainable processing technologies and advancing utilization of industrial by-products and waste streams for value-added product development including biofuels, functional foods and other industrial bioproducts. She is a two-time U.S. Fulbright Scholar, and mentored and hosted many students and scientists from Canada, Turkey, Mexico, China, Sweden, Columbia, South Korea, India, Iran, Iraq, Indonesia, and U.S.A. in her research group. Dr. Dunford has been very active in several professional organizations in the U.S., including the American Oil Chemists' Society (AOCS). She served on many leadership positions on Division and Society level committees; member-at-large, secretary/treasurer, and chair of the AOCS Processing Division, AOCS Division Council Chair, and 2012 AOCS Annual Meeting and Expo General Chairperson. She chaired many award committees, organized and chaired numerous annual meeting technical sessions, edited two books for the AOCS Press, and contributed scientific articles to the Society journals. In recognition of her contribution to the science and service to professional societies, she received many national and international awards including AOCS Edible Applications Division Timothy L. Mounts Award (2011) and the Merit Award (2015).

Daniel K.Y. Solaiman, Research Molecular Biologist/Lead Scientist at the Eastern Regional Research Center of ARS, USDA, has made significant scientific contribution to the field of microbially-produced lipid-based polymers and surfactants. He has authored or coauthored many publications and holds several patents as a result of his personal and team research on the characterization and applications of the ge-

netic systems of the biosynthesis of polyhydroxyalkanoate biopolymers and the sophoro-/rhamno-lipid biosurfactants, and on the utilization of agricultural and industrial byproduct waste-streams as low-cost fermentation feedstocks to produce these biobased products. His research team received AOCS' venerable ACI/NBB Glycerine Innovation Research Award in 2008, and the Philadelphia Federal Executive Board's Excellence in Government Gold Medal Award in 2016, in recognition of their outstanding accomplishment in their field. Since joining AOCS in 2000, Solaiman has actively involved

# **MPA II**

### NIR in a new light

The MPA II is the result of more than 40 years of engineering experience in FT-NIR Spectrometers. The MPA II incorporates state-of-the-art optical parts for outstanding performance and stability:

- Long-life light source
- Durable solid state laser for highest wavenumber accuracy
- Permanently aligned RockSolid<sup>™</sup> interferometer
- High-sensitivity InGaAs detectors
- 10 year warranty
- Hassle free low maintenance
- User friendly OPUS software
- Full cGMP and 21 CFR Part 11 Compliance

### Contact us:

# **microESR**

# Shelf life prediction in as little as 30 minutes

Introducing Bruker's new edible oil solution for measuring oxidation and shelf life. Fast, accurate determination of oxidative resistance from an electron spin resonance (ESR) free radical oxidation profile allows manufacturers to make timely, informed process control decisions.

### Why Choose Bruker for Shelf Life Prediction?

- Measures oxidation profiles in as little as 30 minutes
- Measures free radicals instead of end products
- Includes SOP and easy workflow
- Compact lightweight with very small footprint
- Faster results than Rancimat or OSI
- More accurate and reliable than peroxide value

Contact us: epr@bruker.com • www.bruker.com/epr

Applied Spectroscopy/EPR

and served the Society in many capacities. He is most active in the BIO Division, serving in its Executive Steering Committee (2008–2012) as Secretary/Treasurer, Vice Chair, and Chair. Dan was also active in the Publication Steering Committee (2003–2012), serving as its first Vice Chair, and was assigned to chair a few important search committees. When invited, Dan always willingly serves to chair or as a member in many awards, canvassing, and other selection committees. He also contributed to the Society's book publication efforts by coediting "Biobased Surfactants and Detergents: Synthesis, Properties, and Applications" in 2010. Dan is grateful to be a part of the AOCS family that provides him the opportunities to grow and serve in his profession.

Xuebing Xu, General Manager of Wilmar Global Research and Development Center, Shanghai, China. He received his Ph.D. degree from the Technical University of Denmark and had been a professor in Aarhus University, Denmark. Dr. Xu's areas of research include lipid technology, food/lipid/ingredients functionality, and enzyme technology. He has published more than 270 papers as author or co-author, (co-) edited 3

books, and is inventor/co-inventor of 33 patents. Dr. Xu is the president of the International Sunflower Oil Association (ISOA) (2015-present). He is on the board of the International Association of Rice Bran Oil (2014–present). He is the recipient of the European Lipid Technology Award (2017) and a list of other awards. He is senior advisor to UNOPS (2015–present).

Dr. Xu has been involved in a number of activities in AOCS. He is the associate editor of JAOCS (2005–present), was member of student paper award evaluation committees (2003–2006), member of evaluation committees for Chang Award (2009–2010, 2013) and Young Scientist Award (2016–2017). He is currently chairman of the Phospholipids Division and deputy chairman of the AOCS China Section (2017–present). Dr. Xu was in the organizing committee or co-organizer for a few AOCS associated conferences, such as the AOCS-CCOA Joint Symposium on Functional Lipids (2014), and the first AOCS China Section Congress (2017). He was session chair or co-chair numerous times in Annual AOCS Meetings.

### **Scientific Awards**

Award lectures, listed in order of presentation, will be given at the Awards Session.

Monday, May 7 | 10:05 a.m.-12:10 p.m. | 200 F

### **Stephen S. Chang Award**

Recognizes: A scientist or technologist who has made decisive accomplishments in research for the improvement or development of products related to lipids.

Endowed by: The late Stephen S. Chang and his wife, Lucy D. Chang.

N. A. Michael Eskin, Professor in the Department of Food and Human Nutritional Sciences at the University of Manitoba, Canada, has done extensive research on edible oils and was involved in the early development of canola oil. In 2016, he received the Order of Canada, the highest civilian honor, for his scientific contributions that led to the success of the Canadian canola oil industry. Michael has published over 130 research

papers and 60 chapters and is the author, co-author, and editor of 15 books, a number of which were translated into German, Japanese, Malay, and Portuguese. His current research focuses on the production and antioxidant properties of canolol from canola as well as improving the stability of hemp oil. He has been a member of AOCS for over 40 years, having served as Chair of the Lipid Oxidation and Quality Division, the first Chair of the newly formed Division Council, Associate Editor of JA-OCS, as well as Chair of the Flavor Quality and Stability Committee. Michael has also been active on the Education Committee and is currently Associate Editor of Education for the AOCS Lipid Library. He is the recipient of many awards and was made a Fellow of AOCS in 2004. This year marks his fiftieth year at the University of Manitoba, where he has served as Department Chair and Associate Dean. Last year, Michael was voted the Outstanding Professor by the students of his faculty. He is also known for his lipid rap songs, which are used in universities across North America as well as shown in a Nutrition Centre in Moscow.

### **Alton E. Bailey Award**

Recognizes: Outstanding research and exceptional service in the field of lipids and associated products. Sponsored by: Archer Daniels Midland Company

Dharma R. Kodali, Research Professor in Bioproducts and Biosystems Engineering at the University of Minnesota, and previously a professor at Boston University. He is a world-recognized expert in lipids and new product development and has over 35 years of research experience in academia and industry. His industrial experience includes working as a R&D Manager at Cargill for 13 years and as a Senior

Principal Scientist at General Mills for one year, developing several new products from concept to commercialization. His current areas of research continue to be developing value added products from fats and oils for industrial applications.

Dr. Kodali authored or co-authored over 75 publications and book chapters and edited two books on *trans* fats. He is an inventor/co-inventor on 30 patents. His accomplishments include Cargill's Chairman's Innovation Award (2001), the American Chemical Society's Industrial Innovation Award (2002), and the American Oil Chemists' Society's T.L. Mounts Award (2003). He is an elected Fellow of AOCS (2010) and the American Institute of Chemists. He has served in the American Oil Chemists' Society in various capacities, including chairing the Industrial Oil Products Division; teaching short courses; serving as an Associate Editor and peer reviewer of *JAOCS*; serving as Session Chair at National meetings and on Books and Publications and Recognition Program committees.

### **Supelco AOCS Research Award**

Recognizes: Outstanding original research in fats, oils, lipid chemistry, or biochemistry.

Sponsored by: MilliporeSigma, a subsidiary of Sigma-Aldrich Corp.

Alice H. Lichtenstein, the Stanley N. Gershoff Professor of Nutrition Science and Policy at the Friedman School, and Director of the Cardiovascular Nutrition Laboratory and Senior Scientist at the Jean Mayer USDA Human Nutrition Research Center on Aging, at Tufts University. She holds secondary appointments as Professor of Medicine at Tufts Medical Center, and an honorary doctoral degree from the University of Eastern

Finland. Dr. Lichtenstein's research group focuses on assessing the interplay between diet and heart disease risk factors. Past and current work includes addressing issues related to trans fatty acids, soy protein and isoflavones, sterol/stanol esters, and novel vegetable oils differing in fatty acid profile and alveemic index. Additional work focuses on population-based studies to assess the relationship between nutrient biomarkers and cardiovascular disease risk, and application of systematic review methodology to the field of nutrition. Dr. Lichtenstein serves as an Associate Editor of the Journal of Lipid Research and Executive Editor of the Tufts Health and Nutrition Letter. She served on the 2000 (member) and 2015 (vice-chair) Dietary Guidelines Advisory Committee, and is member of the American Heart Association's (AHA) Nutrition Committee, and Food and Nutrition Board of the National Academies of Sciences. She received the 2006 Robert H. Herman Memorial Award in Clinical Nutrition (ASN), 2008 Women's Mentoring Award (AHA), and 2010 Excellence in Dietary Guidance Award (American Public Health Association). In 2016 she received the David Kritchevsky Career Achievement Award in Nutrition (ASN) and in 2017 the Ralph Holman Lifetime Achievement Award (American Oil Chemists' Society).

### **AOCS Young Scientist Research Award**

Recognizes: A young scientist that has made a significant and substantial research contributions in one of the areas represented by an AOCS Division.

Chibuike Udenigwe, Associate Professor in Nutrition Sciences, with crossappointment in Chemistry and Biomolecular Sciences, University of Ottawa, Canada. He obtained a Ph.D. in Food and Nutritional Sciences from the University of Manitoba, Canada, and then joined the University of Guelph as a Natural Sciences and Engineering Research Council of Canada Postdoctoral Fellow (2011–2012). He then moved to

Dalhousie University, first as an Assistant Professor (2012–2014) and was later promoted to Associate Professor (2014–2016), prior to joining the University of Ottawa in 2016. His major areas of focus include chemistry, role and mechanisms of food peptides in nutrition and health, molecular behavior in food and biological matrices, food protein allergens, and functionality of emerging (e.g., edible insect) proteins.

Chibuike joined AOCS as a student member and received the Honored Student Award during the centennial meeting in 2009. Since becoming a professional member, he has served as the PCP Division Secretary-Treasurer (2016–2018), Co-chair of Technical Sessions (2013-present), ADM Best Paper Award Committee Chair (2016-2018), Student Poster Award Judge, PCP Newsletter Editor (2013–2016), Mentor-Student Common Interest Group events, and Vice Chair-Canadian Section of AOCS (2017-present). He has published more than 95 articles in peer-reviewed journals and books and presented invited papers at international conferences. In 2016, he was a visiting scientist at Wageningen University and Research, The Netherlands. He was a recipient of the International Union of Food Science and Technology Young Scientist Award (2012), and was elected into the Early Career Scientists Section of the International Academy of Food Science and Technology (2016).

### **Division Awards**

### **Analytical**

### Herbert J. Dutton Award

Walter Vetter, University of Hohenheim, Germany

Lecture: ANA Luncheon Wednesday, May 9 | Noon M 101 C

### Student Award

Subin R. C. K. Rajendran, Dalhousie University, Canada

Poster: ANA-P Tuesday, May 8 | 5:45 p.m.-6:45 p.m. Hall B

### **Biotechnology**

### Ching Hou Biotechnology Award

Thomas McKeon, USDA-ARS, WRRC, USA

Lecture: BIO Dinner Tuesday, May 8 | 7 p.m. M 100 H

### Student Award

First place: S.M. Mahfuzul Islam, The University of Akron, USA

Lecture: BIO 2 Tuesday, May 8 | 8 a.m. 200 I

Second place: Sarah A. Willett, University of Georgia, USA

Lecture: BIO 2.2/PRO 2 Tuesday, May 8 | 9:40 a.m.

Third place: Chen Hsu, National Taiwan University, Taiwan

Lecture: BIO-P Tuesday, May 8 | 5:45 p.m.-6:45 p.m. Hall B

### **Edible Applications Technology**

Student Award

Iris Tavernier, Ghent University, Belgium

Lecture: EAT 5/IOP 5 Wednesday, May 9 | 2:20 p.m. 200 H

### **Health and Nutrition**

### Ralph Holman Lifetime Achievement Award

Susan K. Raatz, USDA-ARS. USA

Lecture: H&N 4b Wednesday, May 9 | 11 a.m. 101 J

### New Investigator Research Award

Zhi-Hong Yang, CPB-NHLBI-NHI, USA

Lecture: H&N 3 Tuesday, May 8 | 3:20 p.m.

### Student Award

Juan J. Aristizabal Henao. University of Waterloo, Canada

Lecture: H&N 3 Tuesday, May 8 | 5 p.m.

### **Industrial Oil Products**

Student Award

Lucas J. Stolp, University of Minnesota, USA

Lecture: IOP 4 Wednesday, May 9 | 9 a.m.

### **Processing**

### Distinguished Service Award

Timothy G. Kemper, Desmet Ballestra Group, USA

Lecture: PRO Luncheon Tuesday, May 8 | Noon M 100 E

### Student Award

Andrés F. Aldana Rico, Universidad del Norte. Columbia

Lecture: PRO 3 Tuesday, May 8 | 3:20 p.m. 200 F

### **Surfactants and Detergents**

**Distinguished Service Award** 

Jan Shulman, Retired, USA Recognition: S&D Luncheon Tuesday, May 8 | Noon M 101 C

### Samuel Rosen Memorial Award

David Scheuing, Clorox Services Co., USA

Lecture: S&D Luncheon Tuesday, May 8 | Noon M 101 C

### Student Award

Lisa Van Renterghem, Ghent University, Belgium

### **Student Awards**

### **Hans Kaunitz Award**

Zipei Zhang, University of Massachusetts-Amherst, LISA

Lecture: EAT 2.1 Tuesday, May 8 | 10:20 a.m.

### **Ralph H. Potts Memorial Fellowship Award**

Thomas A. Kwan, Yale University, USA Lecture: PRO 5.1

Wednesday, May 9 | 2 p.m. 200 A

### **Lipid Chemistry and Nutrition** Award

Ruojie Zhang, University of Massachusetts-Amherst. USA

Lecture: ANA 4 Wednesday, May 9 | 11:40 a.m.

### **Lipid Processing and Biotechnology Award**

Jun Jin, Jiangnan University, China

Lecture: BIO 5

Wednesday, May 9 | 2:00 p.m.

### **AOCS Foundation**

### Manuchehr (Manny) Eiiadi Award

Ali Ubeyitogullari, University of Nebraska-Lincoln, USA

Lecture: H&N 5 Wednesday, May 9 | 3:20 p.m. 101 J

# How AOCS volunteer roles helped one member to connect, innovate and grow

Even in an organization filled with scientists, finding and connecting with new colleagues who share your discipline can be a daunting task. At AOCS, volunteering with a Division is a good way to start.

When Jill Moser, Research Chemist and Lead Scientist at the US Department of Agriculture's Agricultural Research Service (ARS), joined AOCS, she was both a new member of the Society and a new scientist at ARS. According to Moser, she wanted to get to know people and make connections. Her colleagues encouraged her to volunteer for the Lipid Oxidation and

Quality (LOQ) Division because the interests of the Division most closely aligned with her research project.

Moser first volunteered as a Member-at-Large for the LOQ Division. Since then, she has held the positions of Division Council Representative, Annual Meeting Program Division Representative and Secretary/Treasurer. In addition, Moser has volunteered on the Editorial Advisory Board of *INFORM* magazine and as the George Schroepfer Medal Canvassing Chair. She currently serves as a Senior Associate Editor for the *Journal of the American Oil Chemists' Society (JAOCS)*.

"Volunteering for AOCS has helped me to develop professional contacts and collaborations and has enabled me to develop and hone leadership and organizational skills. Most importantly, as a scientist, the opportunity to share

### How to get involved?

- Join a Division, Section or Common Interest Group

   apply for leadership roles
- Organize a session for Annual Meeting
- Host a webinar about trending topics or professional development
- Apply to be a reviewer or content editor for an AOCS journal

my research and learn about new research, technologies, ideas and perspectives from other members in academics and industry has been one of the most enriching experiences," according to Moser.

However, volunteering does bring challenges. For Moser, the most challenging aspect has been juggling work time with volunteering, but she has found both the experience and results of volunteering to be rewarding. Moreover, she has found plenty of support and willingness to help from other members of her Division, including some very active student members, and AOCS in general.

As far as choosing the most positive aspect of volunteering — that is also a challenge.

"I have enjoyed making contributions to *JAOCS* and the LOQ Division, and my professional career and my knowledge in the field have benefitted immensely."

Most of all, the LOQ Division and other volunteering opportunities have given her a sense of community with fellow scientists.

"I think what I have enjoyed most are the friendships and comraderies that have developed with people near and far. I definitely feel that volunteering has helped enable me to experience that aspect of membership."

### Where to get involved?

- 11 Divisions: Analytical Biotechnology Edible Applications Technology Health and Nutrition
   Industrial Oil Products Lipid Oxidation and Quality Phospholipid Processing Protein and Co-Products Surfactants and Detergents
- 7 Sections: Asian Australasian Canadian
   China European India Latin American
- 3 Common Interest Groups: Young Professional
   Drefessional Educator Student
- Professional Educator Student
   3 AOCS journals: Journal of the American Oil
- Chemists' Society Lipids Journal of Surfactants and Detergents

   Working Committees for awards, INFORM

magazine and Lipid Library

# Support the Society. Get free coffee (or tea).

Did you know that meeting attendees wearing black lanyards are not yet members of AOCS? Current members can earn FREE coffee certificates and a President's Club mug when they start a conversation with these peers and invite them to join our community.

Nonmembers who join onsite save 40% on their Active membership dues for the rest of 2018. And if they mention your name while joining, you will be eligible for the mug and coffee certificates on the spot. So, start spreading the word about why you love AOCS!

*PLUS*! As a special grand prize, every onsite recruiter will be entered in a drawing for a free registration to the 2019 AOCS Annual Meeting & Expo!

### Thank you for growing your AOCS community!

During 2017, 39 AOCS members encouraged more than 50 of their peers to join the Society. You can recognize them as the attendees already enjoying their complimentary coffee out of their AOCS President's Club mug and wearing a President's Club ribbon.

Congratulations to our top recruiter Xingguo Wang, who recruited eight members!

# **HOT TOPIC SYMPOSIA**

Monday, May 7

These sessions will feature global discussions on matters that affect the future of our industries, and expand beyond the science to address how current, critical issues impact the business of fats and oils. The presenter is the first author listed.

# What session has people talking?

#AOCS2018

Add these sessions to your meeting itinerary and connect with presenters on *The App*! See page 8 for download instructions.

# HT 1: Healthy Oils: The New Functional Ingredient?

7:55 a.m.-10 a.m. | 200 C

Organizer: Patricia Kearney, PMK Associates, Inc., USA

This session will provide a comprehensive look at how the latest changes in the scientific, consumer, regulatory, and business landscapes will impact the oilseed supply chain. The FDA has postponed the labeling regulation timetable to sync with USDA on GMO labeling regulations, and the National Academies of Science has recommended a newly designed framework for the 2020 Dietary Guidelines for Americans that will determine how oil consumption is positioned in the American diet. New nutrition research is showing that healthy oils, and specific fatty acids, provide multiple benefits beyond heart health and now can help in the management of obesity and diabetes. The American Heart Association has also issued new Guidelines for Fats and Oils. In addition, consumers are also demanding clean labels, transparency, and sustainability in the foods they buy, and the food chain and manufacturers are responding. This session will examine the evolving landscape for ingredient innovation, product development, and brand messaging, and explore how major food companies can meet the growing demand for healthier, functional products.

- 7:55 **Opening Remarks.**
- 8 How New Food Policies and Label Regulations Could Reset Consumer Perception of Oils. Patricia Kearney, PMK Associates, Inc., USA.
- 8:25 The Latest Nutrition Science Suggests a New Role for Fats and Oils. Cyril Kendall, Department of Nutritional Sciences, University of Toronto, Canada.
- 8:50 Food Chain Innovations that Address the Latest Consumer and Food Manufacturing Trends. David Dzisiak, Corteva Agriscience, Agriculture Division of DowDuPont, USA.
- 9:15 **Meeting the Challenge of New Consumer Demands.**Naina Shah, Global R&D, PepsiCo, USA.
- 9:40 Panel Discussion, Q & A.

# **HT 2: Advancing Plant Proteins Along the Value-Chain: Challenges and Opportunities**

7:55 a.m.-10 a.m. | 200 E

Organizers: Janitha Wanasundara, Agriculture and Agri-Food, Canada; James D. House, University of Manitoba, Canada; Curtis Rempel, Canola Council of Canada, Canada; and Lisa Campbell, Canola Council of Canada, Canada Consumers are demanding foods with higher contents of quality protein, particularly plant-based proteins. For decades, soy has been positioned as the primary plant-based protein. However consumers, and therefore industry, are seeking additional options. This Hot Topic Symposium will provide an opportunity to discuss the processes whereby soy established the primary market position for plant-based proteins and the lessons learned, followed by 3 presentations on the challenges and opportunities for the introduction of alternative proteins, including those derived from canola, pulses, and cereals. The session will conclude with a discussion of how changing consumer habits have affected the demand and acceptance of plant protein-based food.

- 7:55 Opening Remarks.
- 8 Opportunities and Challenges for Plant Protein-Based Foods: Lessons from the Soy Industry. Phillip Kerr, SERIO Nutrition Solutions, LLC, USA.
- 8:20 Exploring Pulse Proteins An Overview of Technology, Applications, Opportunities and Challenges.
  Mehmet Tulbek, AGT Foods, Canada.
- 8:40 Opportunities and Challenges for Advancing Canola Proteins. Martin Schweizer, Burcon NutraScience (MB) Corp., Canada.
- 9:00 Opportunities and Challenges for Advancing Oat Proteins. Nancy Ames, Agriculture and Agri-Food Canada, Canada.
- 9:20 Changing Consumer Preference and Habits for Plant-Based Foods. Evan Fraser, University of Guelph, Canada.
- 9:40 Panel Discussion. Q & A.

# HT 3: Bridging the Gaps in a Diverse Workplace

7:55 a.m.-10 a.m. | 200 H

Organizer: Leann Barden, RXBAR, USA

# **Sponsored by the AOCS Young Professional Common Interest Group**

### Session is sponsored in part by Clasen Quality Chocolate and DSM

Each speaker will address an aspect of diversity and inclusion, whether it's breaking barriers in a new role, promoting change from the top-down or bottom-up, and/or finding work/life balance in two-income households, particularly as young professionals struggle to launch both their careers and their families. This session recognizes the changes in AOCS membership/

leadership composition since its inception in 1909, and the unique challenges facing this more diverse group; AOCS member companies are facing the same changes.

- 7:55 Opening Remarks.
- 8 Strategies to Create an Equitable Workplace through Ethnic and Gender Diversity. Pam White, Past AOCS President; College of Human Sciences, lowa State University, USA.
- 8:20 "Lean In": How Organizations Can Take Diversity from Theory to Practice. Dawn Siler, International Services, Inc., USA.
- 8:40 Seeing and Seizing Opportunities to Learn, Lead and Succeed. Su Rankin, Land O'Lakes, USA.
- 9 Diversity and Inclusion: Succeeding in a Foreign Culture. Anand Rao, Agropur, USA.
- 9:20 How Employers and Employees Can Support Young Professionals Starting their Careers and Families at the Same Time. Jennifer Chiao, The Procter & Gamble Company, USA.
- 9:40 Panel Discussion, Q & A.

# HT 4: 3-MCPD and Glycidol Esters — What Now?

7:55 a.m.-10 a.m. | 200 I

Organizers: Hans Christian Holm, Novozymes, Denmark; and Fabiola Dionisi, Nestlé, Switzerland

New legislation on 3-MCPD and Glycidol esters is under development in Europe. As a result, palm oil processors must seek new technologies to minimize formation of these by-products.

- 7:55 **Opening Remarks.**
- 8 A Reflection on Ten Years of Research around 3-MCPD and Glycidyl Esters in Fats and Oils. Karel Hrnčiřik, Unilever, The Netherlands.
- 8:20 Palm Oil Sustainability and 3-MCPD Esters and Glycidyl Esters Mitigation. Ahmad Parveez Ghulam Kadir, Malaysian Palm Oil Board, Malaysia.
- 8:40 Approaches for the Mitigation of 3-MCPD Esters and Glycidyl Esters in Baby Food. Constantin Bertoli, Nestlé, Switzerland.
- 9 Mitigation Strategies for 3-MCPD Esters and Glycidol Esters during Vegetable Oil Refining. Nils Hinrichsen, ADM, Germany.
- 9:20 **3-MCPD Mitigation from a Process Perspective.**Antonios Papastergiadis, R&D Center, Desmet Ballestra, Belgium.
- 9:40 Panel Discussion, Q & A.

# **HT 5: Safety Aspects of Frying Oils: Academia and Industry Perspectives**

7:55 a.m.-10 a.m. | 200 A

Organizer: Diliara Iassonova, Cargill, Inc., USA

Recent global regulatory changes in requirements and recommendations regarding frying oil and fried food necessitates this symposium, which will address global views on frying oils and different approaches to managing safety of the oils during frying. Presenters will summarize solutions to address new global regulatory requirements, and consumer focus of fried food safety.

- 7:55 **Opening Remarks.**
- 8 Safety Aspects of Frying Oils Global Overview.
  Diliara lassonova, Cargill, Inc., USA.
- 8:20 Special Heat Capacity Measurements of Frying Oil Using Modulated DSC. Fangfang Chen, Wilmar Global R&D Center, China.
- 8:40 Methods to Improve Frying Oil Quality in Restaurants. Peter L. Bordi, Penn State University, USA.
- 9 Advanced Methods of Monitoring Oil Degradation in Restaurants. Daniel Baier, Testo, Germany.
- 9:20 New Ways for Reduction of 3-MCPD Esters in Frying Oil. Christina Luo, Cargill, Inc., USA.
- 9:40 Panel Discussion, Q & A.

# HT 6: State of the Industry: Navigating a Post-PHO Landscape

10:05 a.m.-12:10 p.m. | 200 E

Organizers: Richard Galloway, QUALISOY, USA

### Session is sponsored in part by QUALISOY

Presenters in this session will discuss the state of the baking and frying industries in a post-partially hydrogenated oil (PHO) world. Discover current challenges facing these industries, as well as consumer research on labeling products made with fully hydrogenated oil. Hear from experts in the field about the functionality testing results of various PHO alternatives. Finally, learn from a USDA research leader about the health impacts of high stability oils, including results from a recent clinical study.

- 10:05 Opening Remarks.
- 10:10 **Overview of PHO Alternatives.** Robert Collette, Institute of Shortening and Edible Oils, USA.
- 10:30 **State of the Baking Industry.** Joshua Tuinstra, Stratas Foods, LLC, USA.
- 10:50 **State of the Foodservice Industry.** Michael Seidel, Performance Food Group, USA.
- 11:10 Effect of Trait-enhanced Oils on the Risk Factors Used to Define Metabolic Syndrome. David Baer, USDA, ARS, Beltsville Human Nutrition Research Center, USA.
- 11:30 Panel Discussion, Q & A.

### HT 7: Olive Oil: Innovative Analytical Strategies to Guarantee Quality and Fight Fraud; Focus on the Advancements of the EU H2020 Project OLEUM

10:05 a.m.-12:10 p.m. | 200 H

Organizers: Tullia Gallina Toschi, Università di Bologna, Italy; and Luisito Cercaci, Pompeian Inc., USA

### Session is sponsored in part by Pompeian, Inc.

Olive oils, especially extra virgin, represent a healthy source of diets, and possess unique sensory attributes, making them high-value products. This fact, together with the lack of harmonized and efficient analytical methods for detecting some types of frauds, make olive oil one of the most popular targets for food adulteration.

The EU H2020 OLEUM project runs from 2016 to 2020 and

aims to better guarantee olive oil (OO) quality and authenticity by improving detection and prevention of olive oil fraud. To solve these gaps, thus enhancing the competitiveness of the OO market both within and outside the EU, the project will develop innovative and revise existing analytical methods, share relevant results, and establish a wide community of institutions involved in the olive oil sector.

- 10:05 Opening Remarks.
- 10:10 The OLEUM Project: Analytical Solutions Addressing Olive Oil Quality and Authenticity Issues. Tullia Gallina Toschi, Università di Bologna, Italy.
- 10:30 Olive Oil Regulatory Framework Analysis, Update and Implementation. Alessandra Bendini, Università di Bologna, Italy.
- 10:50 Analytical Solutions Addressing Olive Oil Quality Issues. Diego Luis García González, Instituto de la Grasa, Spain.
- 11:10 **The Development of an OLEUM Databank.** Alain Maquet, Joint Research Centre, Belgium.
- 11:30 Networking and Technology Transfer of the OLEUM Project; a Focus on the OLEUM Network. Tassos Koidis, Queen's University Belfast, UK.
- 11:50 How to Communicate and Implement the Results of the OLEUM Project in the U.S. Selina C. Wang, UC Davis Olive Center, USA.
- Noon **Closing Remarks and Discussion.** Tullia Gallina Toschi, Università di Bologna, Italy.

### HT 8: The Role of Medium-Chain Triglycerides and Ketones throughout the Lifespan

10:05 a.m.-12:10 p.m. | 200 I

Organizers: Kaori Nakajima and Kinya Tsuchiya, The Nisshin OilliO Group, Ltd., Japan

### Session is sponsored in part by The Nisshin OilliO Group, Ltd.

There is growing awareness of the importance of medium-chain triglycerides (MCTs) and their usefulness throughout the lifespan in health and disease. MCT oil is added to infant and follow-on formulas, nutritional foods for athletes, foods for surgical patients; foods for the elderly, for children and adults with malabsorption syndromes; foods for weight control and even for Alzheimer's disease (AD). This session will review the use of MCTs by focusing on how they help prevent and benefit AD, and coconut oil will be discussed regarding its properties that could ameliorate the effects of AD.

- 10:05 Opening Remarks.
- 10:10 MCTs and Coconut Oil: Ketones as Alternative Fuel for the Brain. Mary T. Newport, Springhill Neonatology, Inc., USA.
- 10:45 MCT and Ketones: Important Roles in Brain Development and Aging. Stephen Cunnane, Département de médecine, Université de Sherbrooke, Canada.
- 11:20 The Role of Dietary MCT/Coconut Oil in the Prevention of Alzheimer's Disease. Ralph Martins, Centre of Excellence for Alzheimer's Disease Research and Care, Edith Cowan University, and Department of Biomedical Sciences, Macquarie University, Australia.
- 11:55 Panel Discussion, Q & A.

### **HT 9: Fat and Oils for Generations**

10:05 a.m.-12:10 p.m. | 200 A

Organizers: Serpil Metin, April Parker, Paul Smith and Jeff Fine, Cargill, Inc., USA

This session is aimed to discuss the consumer's fat and oil choices in different geographies and their knowledge on health effects of fats and oils, nutritional needs of fats and oils during life span, offerings as well as approaches of food manufacturing companies to the customer needs.

- 10:05 Opening Remarks.
- 10:10 FATitudes: Consumer Perceptions of Fats and Oils from the View of Millennials, Gen-Xers and Baby Boomers. Jamie Mayec, Cargill Inc., USA.
- 10:40 A View from Europe: Oils and Fats Consumption Driven by Nutrition, Health and Sustainability Opportunities and Concerns. Ignace Debruyne, Ignace Debruyne & Associates, Belgium.
- 11:10 Fats and Oils Needs During the Lifespan and their Effects on Health and Well-Being. Penny M. Kris-Etherton, Department of Nutritional Sciences, Penn State University, USA.
- 11:40 Emerging Opportunities to Solve Food Industry Challenges. Fabiola Dionisi, Nestlé, Switzerland.

# HT 10: Research and Technology Priorities for Fats and Oils from U.S. Government and Industrial Perspectives

10:05 a.m.-12:10 p.m. | 200 C

Organizers: Doug Hayes, Biosystems Engineering, University of Tennessee, USA; Deland Myers, Agriculture, Nutrition and Human Ecology, Prairie View A&M University, USA; and Sara Shinn, Food Science and Nutrition, California State University-Fresno, USA

# Sponsored by the AOCS Professional Educator Common Interest Group

Program officers from U.S. funding agencies will discuss research priorities of their respective agencies related to fats and oils science and technology and upcoming opportunities for extramural funding. Emerging grand challenges in lipids from an industrial perspective, including areas that may bridge collaborative research between academia, government laboratories, and industrial sectors, will also be discussed.

- 10:05 Opening Remarks.
- 10:10 Funding Priorities and Emerging Areas of Science and Technology from the USDA Perspective. Timothy W. Conner, USDA-NIFA, USA.
- 10:40 Funding Priorities and Emerging Areas of Science and Technology Pertaining to Health and Nutrition. Sharon Ross, NIH–National Cancer Institute, USA.
- 11:10 Emerging Areas of Science and Technology from an Industrial Perspective. Phillip Kerr, SERIO Nutrition Solutions, LLC, USA.
- 11:40 Panel Discussion, Q & A.

# **LEADING PROVIDER** OF EQUIPMENT AND TECHNOLOGY

Oilseeds Preparation, Solvent Extraction, Refining, Oleochemicals

Adhering to concept of energy-saving and environment-friendliness, Myande is committed to constructing advanced, intelligent and green plants.

# **SPECIAL SESSIONS**

Add these sessions to your meeting itinerary and connect with award winners on *The App*! See page 8 for download instructions.

### **SS 1: Welcome Plenary**

Sunday, May 6 | 4 p.m.-5:30 p.m. | 200 C

Attend this must-see opening session to learn what the Society is planning for the year ahead and to recognize the achievements of our members. AOCS President Neil Widlak and AOCS President-elect Len Sidisky will each deliver a brief address as part of our Business Meeting and Society and Scientific Award winners will be recognized.

### **ISF Kaufmann Memorial Lecture**

**Fish Oil Oxidation: What is the Problem?** Kazuo Miyashita, Department of Bio-resources Chemistry, Hokkaido University, Japan.

Dr. Miyashita is a world-leading scientist with more than 30 years of research and education experience in lipid chemistry. His academic achievements in the fields of food and nutritional chemistry of lipids, oils and fats are well known. Dr. Miyashita has extensive publications: 173 research papers, 3 book editions, 92 book chapters and reviews and

18 patents. His ISF Kaufmann Memorial lecture will address fish oil, which is well known to be easily oxidized. What is the impact of the oxidation on foods and biological systems?

### **Plenary Lecture**

Positioning Plant Proteins to Consumers: What Innovations are Needed Along the Value Chain? James D. House, Department of Food and Human Nutritional Sciences, University of Manitoba, Canada.

Consumers are increasingly seeking foods identified as sources of protein, particularly plant-based proteins. Innovations in breeding, agronomy, food processing, and protein quality evaluation will lead to new opportunities to position plant proteins to consumers. This session will provide an overview of key innovations, both realized and required, along the value chain, with particular reference to factors influencing the protein quality of pulses.

Dr. House has authored or co-authored 275 publications, book chapters and conference abstracts/proceedings, in areas related to nutrition and metabolism, including those linked to the study of factors influencing plant protein quality.

# SS 2: Awards Session/ISF Lectureship Series

Monday, May 7 | 10:05 a.m.-12:10 p.m. | 200 F

Get inspired and gain new knowledge from the following AOCS Society and Scientific Award winners. Award lectures are listed in the order of presentation. View pages 22–23 to read a short biography of each presenter.

### What session cannot be missed?

#AOCS2018

### SS 3: Omega-3 Fatty Acids: Health Benefits and Dietary Recommendations

Tuesday, May 8 | 11 a.m.-Noon | 101 J

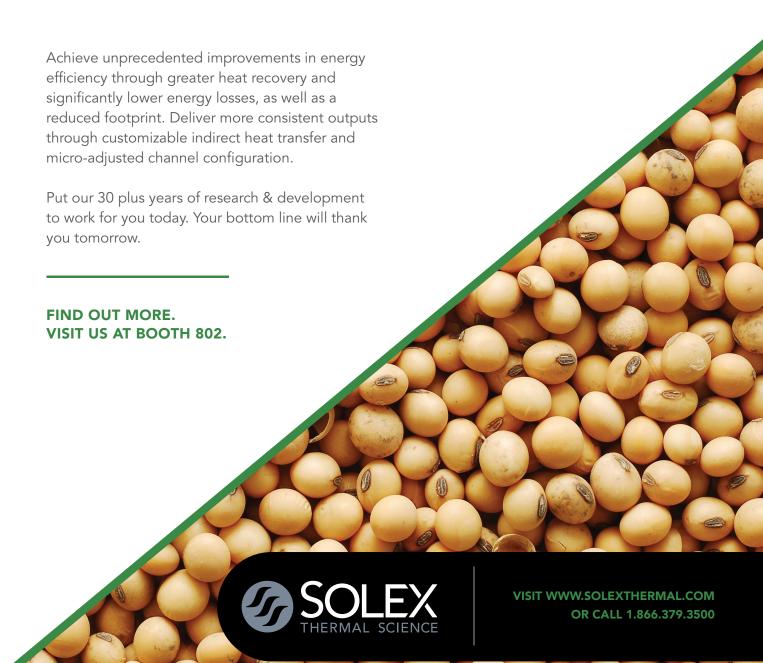

Organized by: The Council for Agricultural Science and Technology (CAST)

Much scientific and public attention has focused on a group of dietary fatty acids called the omega-3 polyunsaturated fatty acids. This attention has developed because of the many potential human health benefits that have been proposed for this class of dietary lipids. This presentation will emphasize the health benefits, food sources, and dietary recommendations of the omega-3 polyunsaturated fatty acids.

11 Omega-3 Fatty Acids: Health Benefits and Dietary Recommendations. Donald C. Beitz, Departments of Animal Science and of Biochemistry, Biophysics, and Molecular Biology, Iowa State University, USA.

### TO INNOVATIVE INDIRECT HEAT EXCHANGE TECHNOLOGY AND OPTIMIZED EFFICIENCY.

# Managing mycotoxin risk using AOCS methods and laboratory proficiency testing

Aflatoxins were among the top reasons for food-related recalls in the fourth quarter of 2017, according to a report by the European Recall Index (stericycleexpertsolutions. co.uk/recall-index/). The Index often places aflatoxins among the top causes for food-related recalls. For example, aflatoxins were among the top causes in every quarter of 2016. In the first quarter of 2015, aflatoxins were the top cause for 21% of food-related recalls, which was more than salmonella. listeria and E. coli.

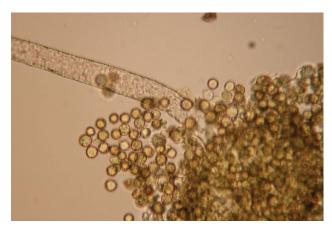

Aflatoxins are a type of mycotoxin, which is a metabolic product of fungal organisms that is harmful to humans and animals in high enough concentrations. Aflatoxins can contaminate agricultural commodities, leading to recalls. In addition, fumonisins are another type of mycotoxin that can contaminate agricultural commodities. To help producers mitigate the risk of these mycotoxins, AOCS provides standardized analytical methods and proficiency testing programs.

"AOCS has several methods, which are focused on aflatoxins and fumonisins," said Scott Bloomer, Director of Technical Services at AOCS. "We also have several Laboratory Proficiency Program series so that labs can confirm their ability to detect and quantify mycotoxins."

"AOCS has several methods, which are focused on aflatoxins and fumonisins"

The AOCS methods for detecting aflatoxin provide procedures to test cottonseed, corn and peanuts — the last of which is particularly susceptible to contamination. These methods mostly use thin-layer chromatography, but a few use post-column photochemical derivatization, high-performance liquid chromatography (HPLC) fluorescence,

Mycotoxins, such as aflatoxins produced by the fungus *Aspergillus flavus* (shown here), ruin millions of dollars of crops each year.

minicolumn or enzyme-linked immunosorbent assay (ELISA). The methods for detecting fumonisins provide procedures to test corn and corn-based food using liquid chromatography.

"We have plans to expand that by adding methods that test for more toxins because we think that the food supply chain needs to be able to test for more potentially toxic fungal metabolites," Bloomer added.

In the AOCS Laboratory Proficiency Program (LPP), participating labs receive quarterly reports with a statistical analysis of results from all participants. These reports allow labs to compare their results against peers and build customer confidence (learn about the experience of two participants on page 66). The LPP series for aflatoxins are for commodities that include corn meal, peanut butter and paste, and pistachio and almond. The LPP series for fumonisin is for corn meal.

Learn more about specific AOCS methods and proficiency testing programs for aflatoxins at aocs.org/aflatoxin

### **CUSTOM SOLUTIONS. OPTIMUM RESULTS.**

We understand the importance equipment reliability and performance have on your bottom line. That's why we partner with our customers to understand their unique requirements and custom design our roller mills, screw presses and preparation equipment to deliver optimum results.

Since 1900, we have supplied durable equipment and systems for most commercial food and industrial uses. Our process solutions can exceed industry standards of extraction efficiencies and have a worldwide reputation for years of reliable operation with low life cycle costs.

Our experienced team of engineers is ready to start your process optimization.

Let us be Your Partner in Processing.

### **ORAL PRESENTATIONS**

Add presentations to your meeting itinerary and connect with presenters on The App! See page 8 for download instructions.

### **Presentation Information**

- ▶ The presenter is the first author or otherwise indicated with an asterisk (\*).
- ▶ Abstracts are available online or on *The App* through May 31, 2018. See page 8 for download instructions.
- ▶ Access and print abstracts in the computer lab located in room M 100 J on the mezzanine level of the Convention Center.
- ► Following the meeting, select presentations will be available to AOCS members in the AOCS Premium Content Library. Visit www.informconnect. org/JoinAOCS for details. Many of the papers presented during the meeting may also appear in AOCS Press publications.
- Award presentations are highlighted by a gray box.
- AOCS journal authors invited to present at Annual Meeting are indicated by a •

### **MONDAY AFTERNOON**

Analytical

### ANA 1a: Spectroscopic, Spectrometric and Chemometric Methods for Lipid Analysis

Chairs: Sanjeewa Karunathilaka, US Food and Drug Administration, USA; and Bernd W.K. Diehl, Spectral Service AG, Germany

#### 101 G

- 1:55 Introduction.
- 2:00 Portable Raman Spectroscopy and Chemometric Methods for the Analysis of Marine Oil Dietary Supplements. Betsy J. Yakes, Sanjeewa R. Karunathilaka, Kyungeun Lee, Lea Brückner, and Magdi Mossoba. US Food and Drua Administration. USA
- 2:20 Vibrational Spectroscopy and Chemometric Procedures for the Rapid Assessment of Olive Oil Authenticity. Magdi Mossoba, Sanjeewa R. Karunathilaka, Cynthia Srigley, Kyungeun Lee, Lea Brückner, and Betsy J. Yakes, US Food and Drug Administration, USA
- 2:40 Automated Multicomponent Phospholipid Analysis using <sup>31</sup>P NMR Spectroscopy: Example of Vegetable Lecithin and Krill Oil. Bernd W.K. Diehl and Yulia B. Monakhova, *Spectral Service AG, Germany*
- 3:00 Analysis and Detection of Olive Oil Adulteration using Fourier Transform Near-Infrared Spectroscopy. Ariel Bohman<sup>1</sup>, Kathryn J. Lawson-Wood<sup>2</sup>, and Robert Packer<sup>1</sup>, <sup>1</sup>PerkinElmer, USA; <sup>2</sup>PerkinElmer, UK

Analytical

### **ANA 1b: Lipidomic Analysis**

Chairs: Francesca Giuffrida, Nestec SA, Switzerland; and J. David Pinkston, Kellogg Co., USA

#### 101 G

- 3:35 Introduction.
- 3:40 Lipidomic Profiling An Integral Technology for Research and Development. Elizaveta Freinkman, *Metabolon, Inc., USA*
- 4:00 Non-targeted Analysis for Quality and Authenticity Determination of Olive Oil. James A. Donarski¹, Victoria Bailey-Horne¹, Enrico Valli², Diego L. García González³, and Tullia G.T. Gallina Toschi⁴, ¹Fera Science Ltd., UK; ²University of Bologna; ³Instituto de la Grasa (CSIC), Spain; ⁴Alma Mater Studiorum University of Bologna, Italy
- 4:20 Supercritical Chromatography in Lipidomics Applications: "Finally Ready for Prime Time?" Paolo Lecchi<sup>1</sup>, Yao Lu<sup>1</sup>, Erwin Kaal<sup>2</sup>, Rob Van der Hoeven<sup>2</sup>, and Dominik Burger<sup>1</sup>, <sup>1</sup>DSM Nutritional Products, USA; <sup>2</sup>DSM Food Specialties, The Netherlands

4:40 **A Rapid Non-destructive Method for Determining Quality Parameters of Edible Oils.** Kathryn J. Lawson-Wood\*1, Ariel Bohman², and Robert Packer², <sup>1</sup>PerkinElmer, UK; <sup>2</sup>PerkinElmer, USA

Biotechnology

### **BIO 1: Biocatalysis I**

This session is sponsored in part by Malaysian Palm Oil Board, Nisshin OilliO Group, Ltd. and Nitto Pharmaceutical Industries, Ltd. Chairs: Jun Ogawa, Kyoto University, Japan; and Ching T. Hou, USDA, ARS, NCAUR. USA

### 200 I

- 1:55 Introduction.
- 2:00 Identification of Molecular Species of Acylglycerols Containing Hydroxy Fatty Acids of Philippine Wild Edible Mushroom, Ganoderma lucidum. Ching T. Hou¹, Jiann-Tsyh Lin², Rich M. Dulay³, and Karen Ray⁴, ¹USDA, ARS, NCAUR, USA; ²WRRC, USDA, USA; ³Center for R&D, Central Luzon State University, Philippines; ⁴NCAUR, USDA, USA
- 2:20 Expression of Cyclooxygenase in *Mortierella alpina* 1S-4 for the Production of a Prostaglandin, PGF2\alpha. Jun Ogawa\(^1\), Mohd Fazli Farida Asras\(^1\), Hideaki Nagano\(^1\), Yoshimi Shimada\(^1\), Miho Takemura\(^2\), Shigenobu Kishino\(^3\), and Akinori Ando\(^1\), \*Div. Applied Life Sciences, Graduate School of Agriculture, Kyoto University, Japan; \*2Res. Ins. Biore. Biotech., Ishikawa Prefectural University, Japan; \*3Kyoto University, Japan
- 2:40 **Biotechnological Research for the Development of Sustainable Oil Palm Industry.** Ahmad Parveez Ghulam Kadir, Rajinder Singh,
  Meilina Ong-Abdullah Ong-Abdullah, Umi Salamah Ramli, Omar
  Abdul Rasid, Mohamad Arif Abd Manaf, and Kushairi A, *Malaysian*Palm Oil Board, Malaysia
- 3:00 Screening of Fatty Acids Showing Selective Antibacterial Activity Against Acne-associated Propionibacterium acnes.

  Ayaka Uyama¹, Teizo Sugino¹, Shimemitsu Tanaka², and Toshihiro Nagao\*², ¹Momotani Juntenkan Ltd., Japan; ²Osaka Research Institute of Industrial Science and Technology, Japan
- 3:20 **Metabolism of Soy Sugars by Genetically Engineered** *Pseudomonas chlororaphis.* Daniel K.Y. Solaiman, Richard D. Ashby, and Nicole V. Crocker, *USDA, ARS, ERRC, USA*

### **Share your Annual Meeting experience!**

#AOCS2018

- 3:40 Xylose and Levulinic Acid: Two Inexpensive, Renewable Substrates for the Mixed-culture Biosynthesis of Unique poly(hydroxyalkanoate) Polymer Blends with Controllable Properties. Richard D. Ashby, Daniel K.Y. Solaiman, and Gary Strahan, USDA, ARS, ERRC, USA
- 4:00 **Biorefinery Process for Valuable Lipid Production by Thraustochytrids.** Kenshi Watanabe, Kim H.V. Arafiles, Yoshiko
  Okamura, Takahisa Tajima, Yukihiko Matsumura, Yutaka
  Nakashimada, and Tsunehiro Aki\*, *Hiroshima University, Japan*
- 4:20 **Challenges to Develop Bioprocess for Lignin Paint.** Yomi Watanabe, *Osaka Research Institute of Industrial Science and Technology, Japan*
- 4:40 Enzymatic Characterization of Metabolism of Food Derived Polyunsaturated Fatty acids by Gut Microorganisms Generating Bioactive Fatty Acids. Michiki Takeuchi¹, Shigenobu Kishino¹, Si-Bum Park¹, Nahoko Kitamura¹, and Jun Ogawa², ¹Kyoto University, Japan; ²Div. Applied Life Sciences, Graduate School of Agriculture, Kyoto University, Japan

Biotechnology

### **BIO 1.1/IOP 1: Biorenewable Polymers**

Chairs: Richard D. Ashby, USDA, ARS, ERRC, USA; and Baki Hazer, Kapadokya University and Bülent Ecevit University, Turkey

### 200 H

- 1:55 Introduction.
- 2:00 Synthesis of Resinic Acid and Lignin Derivative Dimers for Copolymerization with Vegetable Oil-based Monomers. Audrey Llevot, *LCPO*, *France*
- 2:20 Dual Cure Alkyds. Mark D. Soucek, University of Akron, USA
- 2:40 Reflection of Structural Features of Oils on Properties of Polymeric Materials. Zoran Petrovic, Pittsburg State University, USA
- 3:00 **Bio-based Oil Potential in Additive Manufacturing.** Ivan Javni<sup>1</sup>, Olivera Bilic<sup>2</sup>, Jian Hong<sup>2</sup>, Vivek Sharma<sup>1</sup>, Xianmei Wan<sup>1</sup>, and Jamie M. Messman<sup>4</sup>, <sup>1</sup>Pittsburg State University, USA; <sup>2</sup>Kansas Polymer Research Center, Pittsburg State University, USA; <sup>3</sup>Dept. of Energy's National Security Campus, managed by Honeywell FMT, LLC, USA
- 3:20 Multifunctional Fatty Acid Macroperoxide Initiators Obtained by the Autoxidization. Synthesis of Block/Graft Copolymers via Free Radical and Ring Opening Polymerization. Baki Hazer, Kapadokya University and Bülent Ecevit University, Turkey
- 3:40 Super Palm Stearin from Enzymatic Directed Interesterification of Palm Oil. Noor Lida Habi Mat Dian<sup>1</sup>, Miskandar Mat Sahri<sup>1</sup>, Tan Chin Ping<sup>2</sup>, and Lai Oi Ming<sup>2</sup>, <sup>1</sup>Malaysian Palm Oil Board, Malaysia; <sup>2</sup>Universiti Putra Malaysia, Malaysia
- 4:00 **Transesterification of Waste Vegetable Oil using Spent FCC Catalyst-based Solid Base Catalyst.** Zakir Hussain and Rakesh Kumar, *Rajiv Gandhi Institute of Petroleum Technology, India*

Edible Applications Technology

### EAT 1: Phase Transition in Edible Applications (A Session Dedicated to David Pink)

Chairs: Gianfranco Mazzanti, Dalhousie University, Canada; and David A. Pink, St. Francis Xavier University, Canada

### 101 A

- 1:55 Introduction.
- 2:00 An Alternative to the Avrami Model in Fat Crystallization: A Chemical Potential Approach (CPA). Alejandro G. Marangoni, University of Guelph, Canada
- 2:20 **Phase Transitions in Edible Fats and Oils.** David A. Pink, *St. Francis Xavier University, Canada*
- 3:00 Effect of Acoustic Power Level on Cavitation Events in Oil.

  Silvana Martini<sup>1</sup>, Peter Birkin<sup>2</sup>, P. Martin<sup>2</sup>, Jack Youngs<sup>2</sup>, Tadd

  Truscott<sup>1</sup>, and Andrew Merritt<sup>1</sup>, <sup>1</sup>Utah State University, USA;

  <sup>2</sup>University of Southampton, UK

- 3:20 The Role of Mechanical Processing on Water Droplet Distribution in the Manufacture of Margarine. Steven Robbins, Richardson International, Canada
- 3:40 Influence of Droplet Size on Salt and pH-induced Attractive Gelation in Food-Protein Stabilized Nanoemulsions. Aakash Patel, Natalie Longmore, and Supratim Ghosh\*, *University of Saskatchewan, Canada*
- 4:00 Impact of Margarine and Shortening on Puff Pastry Attributes. Rachel E. Mertz, Dilip Nakhasi, and Roger Daniels, Stratas Foods, USA
- 4:20 Evaluation of Stabilizer Type on Peanut Butter Physical Attributes. Don Gifford, Rachel E. Mertz, Dilip Nakhasi, and Roger Daniels, Stratas Foods, USA
- 4:40 **Can Humans Detect if a Chocolate is in the**  $\alpha$  **or**  $\beta_{\nu}$  **Form?** Fernanda Peyronel, *Dept. of Food Science, University of Guelph, Canada*

Health and Nutrition

### **H&N 1/PHO 1: Emerging Bioactives and Health Impacts**

Chairs: Eileen Bailey Hall, DSM Nutritional Products, USA; and Xiaosan Wang, Jiangnan University, China

#### 101 J

- 1:55 Introduction.
- 2:00 Health Impact of the Newly Discovered Elovanoids: Stroke, Retinal Degenerations, Neurotrauma and Alzheimer's Disease.
  Nicolas G. Bazan, LSU Health New Orleans Neuroscience Center, USA
- 2.40 Evidence for the Use of Docosahexaenoic Acid in the Treatment of Breast Cancer. Catherine J. Field, Newell Marnie, and Lynne M. Postovit, *University of Alberta, Canada*
- 3:00 A Brief Overview of Palmitoleic Acid, the Forgotten MUFA.
  Gretchen Vannice, Organic Technologies, USA
- 3:20 Arachidonic Acid has Anti-diabetic Actions. Gundala K. Naveen Kumar and Undurti Das\*, *BioScience Research Centre, India*
- 3:40 **Effects of Sesamol on Lipid Metabolism and Neurodegeneration.** Xuebo Liu and Zhigang Liu, *Northwest A&F University, China*
- 4:00 A Novel Method for Evaluating Anti-inflammatory Activity of Camellia Seed Oil. Ruijie Liu¹, Niannian Lan², Ming Chang¹, Qingzhe Jin¹, and Xingguo Wang¹, ¹Jiangnan University, China; ²School of Food Science and Technology, Jiangnan University, China
- 4:20 Dietary Krill Oil Enhances Neurocognitive Functions and Modulates Proteomic Changes in Brain Tissues of Aging Mice.
  Ling Zhi Cheong, Tingting Sun, and Xiurong Su, Ningbo University, China
- 4:40 Role of Oxidized Phospholipids in Myocardial Reperfusion Injury. Amir Ravandi, *University of Manitoba, Canada*•

Industrial Oil Products

### **BIO 1.1/IOP 1: Biorenewable Polymers**

Chairs: Richard D. Ashby, USDA, ARS, ERRC, USA; and Baki Hazer, Kapadokya University and Bülent Ecevit University, Turkey

#### 200 H

Joint session: for details, see BIO 1.1/IOP 1, above.

Lipid Oxidation and Quality

### **LOQ 1a: Lipid Oxidation Fundamentals**

Chairs: Fereidoon Shahidi, Memorial University of Newfoundland, Canada; and Weerasinghe Indrasena, DSM Nutritional Products, Canada

#### 101 H

- 1:55 Introduction.
- 2:00 **Role of Antioxidants and Stability of Frying Oils.** S.P.J. Namal Senanayake, *Camlin Fine Sciences, USA*
- 2:20 Impact of Oxidized Proteins and Lipids and Suppression of Atherosclerosis Development by Functional Food Bioactives

- and Their Metabolites. Jack N. Losso, *Louisiana State University, USA*
- 2:40 Antioxidant Evaluation: Why in vitro and in vivo Results do not Always Correspond? Fereidoon Shahidi, Memorial University of Newfoundland, Canada
- 3:00 Application of Differential Pulse Voltammetry to Determine the Efficiency of Stripping Tocopherols from Commercial Fish Oil. Rachele A. Lubeckyj¹, Jill Moser², and Matthew Fhaner\*³ (Edwin N. Frankel Award for Best Paper in Lipid Oxidation and Quality; Lipid Oxidation and Quality Division Travel Grant Winner), ¹Michigan State University, USA; ²USDA, ARS, NCAUR, USA; ³University of Michagan-Flint, USA

Lipid Oxidation and Quality

### LOQ 1b: Optimal Application of Antioxidants in Food with Respect to their Protection Mechanism

Chairs: Xin Tian, Kalsec, Inc., USA; and Thanh P. Vu, University of Massachusetts Amherst, USA

#### 101 H

- 3:35 Introduction.
- 3:40 The Oxidative Stability of Fish Oil Enriched Cow and Soy Milk and the Effect of Adding Rosemary Extract. Xujian Qiu, Charlotte Jacobsen, and Ann-Dorit Moltke Sørensen, *Technical University of Denmark, Denmark*
- 4:00 Enzymatic Functionalization of Vinyl Phenols and Evaluation of their Resulting Antioxidant Properties in Cell Model Systems.

  Jérome Lecomte, Erwann Durand, and Pierre Villeneuve, CIRAD, France
- 4:20 Impact of Modified Lecithin on the Antioxidant Activity of alpha-Tocopherol in Bulk Oils. Eric A. Decker and Anuj G. Shanbhag\*, University of Massachusetts Amherst, USA
- 4:40 Controlling Oxidation in Skin Care Products with Novel Seaweed Antioxidants. Ditte B. Hermund<sup>1</sup>, Birgitte R. Thomsen<sup>1</sup>, Niruja Sivasubramaniam<sup>2</sup>, Shuk Y. Heung<sup>3</sup>, Randi Neerup<sup>4</sup>, Louise M. Klinder<sup>5</sup>, Susan Holdt<sup>2</sup>, and Charlotte Jacobsen\*<sup>1</sup>, <sup>1</sup>Technical University of Denmark, Denmark; <sup>2</sup>National Food Institute, Technical University of Denmark, Denmark; <sup>3</sup>DTU Food, Denmark; <sup>4</sup>Danish Technological Institute, Denmark; <sup>5</sup>Mellisa Aps, Denmark

Phospholipid

### **H&N 1/PHO 1: Emerging Bioactives and Health Impacts**

Chairs: Eileen Bailey Hall, DSM Nutritional Products, USA; and Xiaosan Wang, Jiangnan University, China

#### 101 J

Joint session: for details, see H&N 1/PHO 1 on page 39.

Processing

### PRO 1: Processing ABC — Part I

Chairs: Farah Sköld, Solex Thermal Science Inc., Canada; and Naudy Suarez, Richardson Oilseed Ltd., Canada

### 200 F

- 1:55 Introduction.
- 2:00 Advancements in Vegetable Oil Extraction and Oil Processing.

  Mohammad S. Alam, Texas A&M University, USA
- 2:20 **Screw Press Technology for Oil Extraction.** Eric D. Stibora, *Anderson International, USA*
- 2:40 Pilot Plant Concept "EthaNa" for Ethanolic Extraction of Dehulled Canola Seeds. Gunter Börner and Bernd Steinhauer, B+B Engineering GmbH, Germany
- 3:00 Energy Optimization in Soybean Processing. Mohamed Abid, Solex Thermal Science Inc., Canada
- 3:20 **Oilseed Conditioning and Effects on Extraction.** William C. Morphew, *Crown Iron Works, USA*

3:40 **Solvent Extraction Overview.** Timothy G. Kemper, *Desmet Ballestra, USA* 

Protein and Co-Products

### **PCP 1a: Protein Nutrition and Health**

Chairs: Janitha Wanasundara, Agriculture and Agri-Food Canada, Canada; Lamia L'Hocine, Agriculture and Agri-Food Canada, Canada; and Navam Hettiarachchy, University of Arkansas, USA

#### 101 C

- 1:55 Introduction.
- 2:00 **Overview of the Protein Quality Assessment of Quinoa** (*Chenopodium quinoa*). Matthew G. Nosworthy and James D. House, *University of Manitoba, Canada*
- 2:20 Effects of Soy Protein Isolate Hydrolysates on Cholecystokinin Released by Rat Intestinal Mucosal Cells and Food Intake in Rats. Na Zhang and Yan-Guo Shi, Harbin University of Commerce, China
- 2:40 Functional Properties and ACE Inhibitory Activity of Mealworm Protein Isolates and Hydrolysates. Navam S. Hettiarachchy¹, Hongrui Jiang², and Ronny Horax¹, ¹University of Arkansas, USA; ²Institute of Light Industry and Food Engineering, Guangxi University, China
- 3:00 Mushroom Phenolics as Inhibitors of Tryptophan Oxidation and Carbonyl Formation in Bovine Proteins with Salt. Natalie G. Tom and Lilian M. Were, *Chapman University, USA*

Protein and Co-Products

### **PCP 1b: Advances in Bioactive Peptides**

Chairs: Hitomi Kumagai, Nihon University, Japan; and Hisham Ibrahim, Kagoshima University, Japan

#### 101 C

- 3:35 Introduction.
- 3:40 Occurrence of Cyclic Peptides in Human Blood after Collagen Hydrolysate Ingestion. Yasutaka Shigemura<sup>1</sup> and Kenji Sato<sup>2</sup>, <sup>1</sup>Tokyo Kasei University, Japan; <sup>2</sup>Kyoto University, Japan
- 4:00 **Bioactive Peptides for Brain Health and its Mechanistic Exploration.** Shigeru Katayama, Takakazu Mitani, and Soichiro Nakamura, *Shinshu University, Japan*
- 4:20 **Potential Bioactive Peptides from Hydrolyzed Tomato Seed Proteins.** Apollinaire Tsopmo and Nasim Meshginfar, *Carleton University, Canada*
- 4:40 Suppression of Postprandial Hyperglycemia by Bioactive Peptides from Rice (*Oryza sativa*) Albumin. Yusuke Yamaguchi¹, Shigenobu Ina², Aya Hamada³, Hanae Nakamura³, Nozomi Fujisawa³, Makoto Akao⁴, Hitoshi Kumagai⁵, and Hitomi Kumagai⁴, ¹Nihon University, Japan; ²College of Bioresource Sciences, Nihon University; ⁴Dept. of Chemistry and Life Science, College of Bioresource Sciences, Nihon University, Japan; ⁵Faculty of Home Economics, Kyoritsu Women's University, Japan

Surfactants and Detergents

### **S&D 1: Home Care and Laundry Performance Boosters and New Benefits**

Chairs: Michael Williams, Evonik Industries, USA; and Stephen Gross, BASF Corporation, USA

### 200 C

- 1:55 Introduction.
- 2:00 A Rapid Screen to a Dispersion Builder System. Fred Holzhauer, Univar USA, USA
- 2:20 **Formulating Liquid Detergents with Improved Enzyme Stability.**Eric Dodge¹ and Arjen J. Hoekstra², ¹DuPont Industrial Biosciences, USA; ²DuPont Industrial Biosciences, The Netherlands

- 2:40 Cationic Inulin, A Novel Biopolymer for Home and Fabric Care.
  Robert Nolles, Cosun Biobased Products, USA
- 3:00 Improving Color and Fabric Care in Fabric Softeners. David Joiner¹ and Nathan Reese\*2, ¹Novozymes North America, Inc., USA; ²Novozymes, USA
- 3:20 **Study on the Comfort Created by Fabric Softener.** Sae Kumagami, Emiko Hashimoto, Eiji Ogura, Yoshiko Ito, and Takahiro Okamoto, *Lion Corporation, Japan*
- 3:40 New ADW Formulation Opportunities with Improved Polyitaconate Polymers. Jim W. Gordon, *Itaconix, USA*
- 4:00 **High Performing Rinse Aid Surfactant for Plastics.** Ashish Taneja, BASF Corporation, USA
- 4:20 **Re-thinking Value-tier Formulations New Technologies to Boost Performance.** Ann Lee and David Joiner, *Novozymes North America, Inc., USA*

Surfactants and Detergents

### S&D 1.1a: New Technologies in Industry

Chairs: Eric (Rick) Theiner, Evonik Industries, USA; and Hongwei Shen, Colgate-Palmolive Co., USA

### 200 E

Normal restrictions on the use of product trade names and logos are suspended; presenters can freely discuss commercial aspects and opportunities of their products.

- 1:55 Introduction.
- 2:00 NINOL® CAA: A Novel Multifunctional Amide for Mass Efficient Formulation. Ron A. Masters, Sarah Kovach, Anatoly Dameshek, Renata Butikas, and Scott Dillavou, Stepan Company, USA

- 2:20 **New and Unique Biorenewable Hydrophobes for Surfactants.** Risha Bond, *REG Life Sciences, USA*
- 2:40 Rheology Modifiers in Personal Cleansing Applications: Recent Trends. Martin S. Vethamuthu, *Ashland Specialty Ingredients G.P., USA*
- 3:00 A Novel Amphoteric Surfactant for Personal and Home Care.

  Marcie Anne Natale and Neil Boaz, Eastman, USA
- 3:20 Structure-property Relationships of Co-solvents and Cosurfactants in Microemulsion Formation Using High Throughput Techniques. Troy Knight, Neeraj Rohillia\*1, Pramod Patil1, Carol Mohler1, Christopher Nelson1, Tom Kalantar1, Pete Rozowski1, and Quoc Nguyen2, 1The Dow Chemical Company, USA; 2The University of Texas at Austin, USA

Surfactants and Detergents

### S&D 1.1b: Manufacturing, Commercialization and Delivery of Raw Materials and Finished Products

Chairs: Troy Graham, LightBox Laboratories, LLC, USA; and Sukhwan Soontravanich, Ecolab, USA

### 200 E

- 3:45 Introduction.
- 3:50 Phase-stable Surfactant-thickened Formulations at High Caustic Levels. Daniela Fritter, *The Clorox Company, USA*
- 4:10 **Preservation: Finished Goods and Manufacturing.** Vidya Ananth and Mrudula Srikanth<sup>2</sup>, *Clorox, USA*
- 4:30 Screening and Scaling Liquid-to-Solid Conversions for Efficient Process Development of Solid Products. Steve D. Rowley, *Division by Zero Labs, USA*
- 4:50 The Effect of Alcohol Ethoxylate Branching on Dry Mix Powder Flow Chasing the Ghost. Michael Wint, Amway Corporation, USA

42

### **TUESDAY MORNING**

Analytical

### ANA 2a: Analysis of Fats and Oils Applying Advanced Lipid Analysis Techniques

Chairs: William C. Byrdwell, USDA, ARS, BHNRC, FCMDL, USA; and Walter Vetter, University of Hohenheim, Germany

### 101 G

- 7:55 Introduction.
- 8:00 Use of Countercurrent Chromatography (CCC) for the Preparative Isolation of Lipid Compounds. Walter Vetter, Marco Müller, Katharina Wasmer, Andrea Goncalves Peca, and Medisa Muric, University of Hohenheim, Germany
- 8:20 Investigation of Olive Oil Substitution with Other Edible Oils by Ultra High-Performance Liquid Chromatography Separation of Triglycerides. Pierluigi Delmonte and Andrea Milani, US Food and Drug Administration, USA
- 8:40 Comprehensive Dual Liquid Chromatography with Quadruple Mass Spectrometry, LC2MS4, for *Jacaranda Mimosifolia* Triacylglycerols. William C. Byrdwell, *USDA*, *ARS*, *BHNRC*, *FCMDL*, *USA*
- 9:00 Development of Lipidomics-based Reference Materials and Reference Data for Oils. John A. Bowden, National Institute of Standards and Technology, Marine Biochemical Sciences Group, USA
- 9:20 Profiling Fatty Acids in Vegetable Oil Based on Photochemical Derivatization Reaction Coupled with Mass Spectrometry. Shuling Xu, Fang Wei\*, and Hong Chen, Oil Crops Research Institute of the Chinese Academy of Agricultural Sciences, China
- 9:40 The Hybrid Search: A New Mass Spectral Library Search Approach for Compound Classification. Arun S. Moorthy¹, Brian T. Cooper², William E. Wallace¹, and Stephen E. Stein¹, ¹National Institute of Standards and Technology, USA; ²University of North Carolina at Charlotte, USA

Analytical

### **ANA 2b: Olive Oil, including Sensory Analysis**

Chairs: Selina C. Wang, University of California-Davis, Olive Center, USA; and Susan Seegers, Bunge North America, USA

### 101 G

10:15 Introduction.

- 10:20 Contribution of Flavor Compounds to Explain New Sensory Defects in Virgin Olive Oil: The Example of "Frostbitten Olives".

  Diego L. García González¹, Inmaculada Romero¹, Ramón Aparicio-Ruiz¹, Noelia Tena¹, Ana Lobo¹, María Teresa Morales², and Aparicio Ramón¹, ¹Instituto de la Grasa (CSIC), Spain; ²University of Seville, Spain
- 10:40 The Profitable Relation between Sensory and Analytics in Virgin Olive Oil Quality Detection. Tullia Gallina Toschi¹, Sara Barbieri¹, Chiara Cevoli¹, Ole Winkelmann², Karolina Brkić Bubola³, Florence Lacoste⁴, Milena Bučar-Miklavčič⁵, Ummuhan Tibet⁶, Ramón Aparicio-Ruiz⁷, Diego L. García González⁷, and Alessandra Bendini¹, ¹DISTAL University of Bologna, Italy; ²Eurofins Analytik GmbH, Germany; ³Institute of Agriculture and Tourism, Croatia; ⁴Institut des Corps Gras, France; ⁵Science and Research Centre Koper, Slovenia; ⁴Ulusal Zeytin ve Zeytinyağı Konseyi, Turkey; ¬Instituto de la Grasa (CSIC), Spain
- 11:00 Deep Insight Into the Minor Fraction of Virgin Olive Oil by Using New LC-MS and GC-MS Multi-class Methodologies: Application to Discriminate Samples from Different Protected Designations of Origin. Alegria Carrasco-Pancorbo, *University of Granada, Spain*

- 11:20 <sup>1</sup>H NMR-metabolic Profiles of Monocultivar EVOOs for PDO, PGI and 100% Italian Blend Production Assessment. Chiara Roberta Girelli, Laura Del Coco¹, Federica Angilè², and Francesco Paolo Fanizzi\*², ¹Dept. of Biological and Environmental Sciences and Technologies (Di.S.Te.B.A.), University of Salento, Italy; ²Dipartimento di Scienze e Tecnologie Biologiche ed Ambientali Università del Salento, Italy
- 11:40 "Musty", "Fusty, Muddy Sediment", and "Rancid" Off-flavors in olive Oils are Well-known: but what is Behind on a Molecular Level? Michael Granvogl, Anja Neugebauer, and Peter Schieberle, Technical University of Munich, Germany

Analytical

### ANA 2c/LOQ 2a: Evaluation and Prediction of Oxidative Stability and Shelf-life

Chairs: Min Hu, DuPont Nutrition & Health, USA; and Richard Della Porta, Frito-Lay, USA

### 101 H

- 7:55 Introduction.
- 8:00 The Combination of High Oleic Oils and Natural Antioxidants as a Powerful Tool for Shelf Life Extension. Susan Knowlton, *DuPont Company, Pioneer, USA*
- 8:20 The Antioxidative Activity of Soluble Bound Phenolic Compounds Fractions Extracted from Germinated Chickpea in Oil-in-Water Emulsions. Minwei Xu (Lipid Oxidation and Quality Division Travel Grant Winner) and Bingcan Chen, North Dakota State University, USA
- 8:40 Antioxidant Activities of Sugars and Protein in Low Moisture Cracker System. Thanh P. Vu, Lili He, D. Julian McClements, and Eric A. Decker, *University of Massachusetts Amherst, USA*
- 9:00 **Oxidative Stability of Margarines, Shortenings and Spreads.** Min Hu, *DuPont Nutrition & Health, USA*
- 9:20 Shelf-life Extension of Meat and Meat Products by Using Natural Antioxidants. Henna F.S. Lu. Kalsec Europe Ltd., UK
- 9:40 am Differential Stability of Linoleic Sun, Soy and Rapeseed Oils Using TBHQ and Rosemary in Fried Potatoes. Richard Della Porta, Frito-Lay, USA

Analytical

### ANA 2d/LOQ 2b: Sensory Analytics and Analytical Methods for Assessing Lipid Oxidation and Shelf-life

Chairs: Jian Kong, Abbott Nutrition, USA; and Richard Della Porta, Frito-Lay, USA

### 101 H

10:15 Introduction.

- 10:20 Antioxidant Efficacy and Impact of Storage Conditions.

  Marie Shen¹, Lan Ban¹, and Chandra Ankolekar\*², ¹Kemin Food Technologies, USA; ²Kemin Industries Inc., USA
- 10:40 Sensory Directed Chemical Analysis of Oxidized Marine Oils.
  Roy D. Desrochers, *Tufts University Sensory and Science Center, USA*
- 11:00 **Developing a Sensory Oxidation Quality Scale.** Monica L. Godbout, *Abbott Nutrition, USA*
- 11:20 Assessing Virgin Olive Oil Stability and Shelf Life at Moderate Conditions by FTIR Spectroscopy Endowed with a Mesh Cell Accessory. Noelia Tena¹, Ramón Aparicio-Ruiz¹, Ana Lobo², María Teresa Morales³, Aparicio Ramón², and Diego L. García González\*¹, ¹Instituto de la Grasa (CSIC), Spain; ²Instituto de la Grasa (CSIC); ³University of Seville, Spain

### **BIO 2: Biocatalysis II**

This session is sponsored in part by Malaysian Palm Oil Board, Nisshin OilliO Group, Ltd. and Nitto Pharmaceutical Industries, Ltd.

Chairs: Lu-Kwang Ju, University of Akron, USA; and Masashi Hosokawa, Hokkaido University, Japan

#### 200 I

- 7:55 Introduction.
- 8:00 Better Understanding of Enzymatic Soy Processing through Modeling Monomeric Sugar Release. S.M. Mahfuzul Islam (Biotechnology Student Award Winner) and Lu-Kwang Ju, <sup>1</sup>The University of Akron, USA
- 8:20 Biosynthetic Pathways of Functional Carotenoids in Red Seaweed Pyropia yezoensis. Masashi Hosokawa, Hokkaido University. Japan
- 8:40 **Production of Microbial Lipids using Crude Glycerol.** Eiji Sakuradani, Naomi Murakawa, and Takaiku Sakamoto, *Tokushima University, Japan*
- 9:00 **Alteration of Lipase Selectivity by Protein Engineering.**Katja Zorn<sup>1</sup>, Isabel Oroz-Guinea<sup>1</sup>, Henrike Brundiek<sup>2</sup>, and Uwe T.
  Bornscheuer\*<sup>3</sup>, <sup>1</sup>Institute of Biochemistry, Germany; <sup>2</sup>Enzymicals AG, Germany; <sup>3</sup>University of Greiswald, Germany
- 9:20 Efficient Production of MLCT Oils by Lipase Reactions. Yutaro Kataoka, Yoshihiro Ueda, and Hidetaka Uehara, *The Nisshin OilliO Group, Ltd., Japan*
- 9:40 Preparation of Diethylhexyl Adipate by Lipase-catalyzed Esterification. In-Hwan Kim<sup>1</sup>, TaeHoon Kim<sup>1</sup>, Heejin Kim<sup>2</sup>, and Nakyung Choi<sup>1</sup>, <sup>1</sup>Korea University, Republic of Korea; <sup>2</sup>Dept. of Public Health Sciences, Graduate School, Korea University, Republic of Korea
- 10:00 Enzymatic Preparation of Medium- and Long-chain Diacylglycerols of High Purity in Combination with Solvent Extraction. Guanghui Li¹, Jiazi Chen¹, Zhen Zhang², Ying Li³, and Yong Wang\*⁴, ¹Dept. of Food Science and Engineering, Jinan University, China; ²South China University of Technology, China; ³Guangdong Saskatchewan Oilseed Joint Laboratory, Dept. of Food Science and Engineering, Jinan University, China; ⁴Jinan University, China
- 10:20 Stearidonic Acid Soybean Oil Concentration and Enzymatic Modification. Casimir C. Akoh, *University of Georgia, USA*
- 10:40 Enzymatic Preparation of Monogalactosyldiacylglycerols Containing Pinolenic Acid. Byung Hee Kim, Sookmyung Women's University. Republic of Korea
- 11:00 Ultrasound Promoted Enzymatic Synthesis of Monoglyceryl Phenolic Acids and the Activities Study. Mingming Zheng, *Oil Crops Research Institute, CAAS, China*
- 11:20 ELOVL6 Catalyzes Elongation of n-13:0 and n-15:0 Odd Chain Saturated Fatty Acids in Human Cells. Zhen Wang<sup>1,2</sup>, Dong Hao Wang<sup>1</sup>, Yuliya Goykhman<sup>1</sup>, Yuanyuan Yan<sup>1</sup>, Peter Lawrence<sup>1</sup>, Kumar S. D. Kothapalli<sup>2</sup>, and J. Thomas Brenna<sup>2</sup>, <sup>1</sup>Cornell University, USA; <sup>2</sup>University of Texas at Austin, USA

Biotechnology

### BIO 2.1/H&N 2: Dietary Lipids and the Gut Microbiota

This session is sponsored in part by DuPont Nutrition & Health and Nitto Pharmaceutical Industries, Ltd.

Chairs: Barry Tulk, DuPont Nutrition & Health, USA; and Jun Ogawa, Kyoto University, Japan

#### 101 J

- 7:55 Introduction.
- 8:00 **Effect of Diet on the Gut Microbiota.** Joanne Slavin, *University of Minnesota, USA*
- 8:20 Interaction Between Diets and Gut Commensal Bacteria in the Regulation of Immunological Health and Diseases. Jun Kunisawa, *NIBIOHN*, *Japan*

- 8:40 Role of Bile Acid in Gut Microbiota Alterations in Rats Fed a High-fat Diet. Atsushi Yokota, Masamichi Watanabe, Satoshi Ishizuka, and Satoru Fukiya, Research Faculty of Agriculture, Hokkaido University, Japan
- 9:00 **Correlation Between Dietary Lipid, Gut Microbiota and Health.**Jun Ogawa<sup>1,2</sup>, <sup>1</sup>Div. Appl. Life Sci., Grad. Sch. Agric., Kyoto University.,
  Japan; <sup>2</sup>Res. Unit Physiol. Chem. Kyoto University, Japan
- 9:20 **Dietary Fatty Acid Metabolism in Gut Microbiota.** Shigenobu Kishino<sup>1</sup>, Akiko Hirata, Michiki Takeuchi<sup>1</sup>, and Jun Ogawa<sup>2</sup>, <sup>1</sup>Kyoto University, Japan; <sup>2</sup>Div. Applied Life Sciences, Graduate School of Agriculture, Kyoto University, Japan
- 9:40 10-oxo-12(Z)-octadecenoic Acid, a Linoleic Acid Metabolite Produced by Gut Microbiota, Enhances Energy metabolism by Activation of TRPV1. Tsuyoshi Goto¹, Minji Kim², Tomoya Furuzono², Kunitoshi Uchida³, Shigenobu Kishino¹, Haruya Takahashi², Huei-Fen Jheng², Jun Yamazaki⁴, Makoto Tominaga³, Jun Ogawa⁵, and Teruo Kawada², ¹Kyoto University, Japan; ²Division of Food Science and Biotechnology, Graduate School of Agriculture, Kyoto University, Japan; ³Okazaki Institute for Integrative Bioscience, National Institute for Physiological Sciences, Japan; ⁴ ⁵Dept. of Physiological Science and Molecular Biology, Fukuoka Dental College, Japan; ⁴ Div. Applied Life Sciences, Graduate School of Agriculture, Kyoto University, Japan
- 10:00 Effects of Fatty Acid Metabolites by a Gut Lactic Acid Bacterium on Lipid Metabolism in NASH Model Mice. Neng Tanty Sofyana<sup>1</sup>, Jiawen Zheng<sup>1</sup>, Yuki Manabe<sup>1</sup>, Yuta Yamamoto<sup>2</sup>, Shigenobu Kishino<sup>1</sup>, Jun Ogawa<sup>3</sup>, and Tatsuya Sugawara<sup>4</sup>, <sup>1</sup>Kyoto University, Japan; <sup>2</sup>Dept. of Anatomy and Cell Biology, Wakayama Medical University; <sup>3</sup>Div. Applied Life Sciences, Graduate School of Agriculture, Kyoto University, Japan; <sup>4</sup>Laboratory of Marine Bioproduct of Technology, Division of Applied Bioscience, Japan
- 10:20 **Gut Microbiota and Free Fatty Acids Receptors Mediated Host Energy Regulation.** Junki Miyamoto and Ikuo Kimura, *Tokyo University of Agriculture and Technology, Japan*
- 10:40 Effects of the Intake of a Gut Microbial Linoleic Acid Metabolite, 10-hydroxy-cis-12-octadecenoic Acid (HYA), on Postprandial Hyperglycemia. Yasunori Yonejima and Kohey Kitao, *Nitto* Pharmaceutical Industries, Ltd., Japan

Biotechnology

### BIO 2.2/PRO 2: Advances in Enzyme Processing Technologies

Chairs: Xuebing Xu, Wilmar Global Research and Development Center, China; and Flavio Galhardo, Bunge Global Innovation, USA

### 101 D

- 7:55 Introduction.
- 8:00 Overview and Recent Developments in Degumming, Interesterification and Biodiesel. Hans Christian Holm, Novozymes A/S, Denmark
- 8:40 Design and Synthesis of New Lipid Molecules by Assemblying
  Nature Segments for Multi-functionalities. An Enzymatic
  Solution. Zheng Guo Aarhus University, Denmark
- 9:00 Value and Potential of Phospholipase C Assisted Enzymatic Degumming in Vegetable Oils. Ying Zha¹, Arjen Sein², Steve Gregory³, Greg LeFebvre⁴, and Michael Jung³, ¹DSM, The Netherlands; ²DSM Biotechnology Center, The Netherlands; ³DSM, USA; ⁴DSM Food Specialties, Inc, USA
- 9:20 **Enzymatic Interesterification.** Chris Dayton, *Bunge Limited, USA*
- 9:40 Enzymatic Modification of Menhaden Oil to Incorporate Caprylic and/or Stearic Acid. Sarah A. Willett (Biotechnology Student Award Winner), Casimir C. Akoh<sup>1</sup>, and Silvana Martini<sup>2</sup>, <sup>1</sup>University of Georgia, USA; <sup>2</sup>Utah State University, USA
- 10:00 Cold Enzymatic Degumming on Sunflower Seed Oil. Ling Hua and Alexey Shevchenko, Alfa Laval Copenhagen A/S, Denmark
- 10:20 How to Overcome the Barrier of Mucilage for Extraction of Omega 3 from Chia Oil? Gwendoline Gravé¹. Sidrine Koumba¹. Jean-Francois

The ultimate collaboration of industry, academia and government; embracing the full spectrum of oil science, from field to product.

and more!

Visit annualmeeting.aocs.org/2019 to get started!

- Fabre<sup>2</sup>, Eric Lacroux<sup>3</sup>, Muriel Cerny<sup>4</sup>, Romain Valentin<sup>5</sup>, Othmane Merah<sup>1</sup>, and Zéphirin Mouloungui<sup>4</sup>, <sup>1</sup>INP ENSIACET, France; <sup>2</sup>LCA UMR1010 INRA-INP/ENSIACET, France; <sup>3</sup>Chimie Agro-Industrielle, France; <sup>4</sup>Laboratoire de Chimie Agro-Industrielle, France; <sup>5</sup>INRA, France
- 10:40 Pilot Enzymatic Production of Medium- and Long-Chain Triacylglycerols Using a Solvent-free Packed Bed Reactor. Zhen Zhang¹, Siwen Zhang², Xiaodong Xie², Xiang Ma³, Huihua Huang¹, and Yong Wang²\*, ¹School of Food Science and Engineering, South China University of Technology, China; ²Guangdong Saskatchewan Oil Seed Joint Laboratory, Dept. of Food Science and Engineering, Jinan University, China; ³Research School of Chemistry, The Australian National University, Australia
- 11:00 Lipid Modification by Enzymes and Engineered Microbes. Uwe T. Bornscheuer, *University of Greiswald, Germany*
- 11:20 **Recent Progress of Enzymatic Synthesis of Polymers.** Douglas G. Hayes, *University of Tennessee, USA*

Edible Applications Technology

### **EAT 2: Confectionery Fats**

This session is sponsored in part by IOI Loders Croklaan.

Chairs: Farnaz Maleky, Ohio State University, USA; and Linsen Liu, IOI Loders Croklann, USA

### 101 A

- 7:55 Introduction.
- 8:00 Fat Bloom and Anti-bloom in Confectionery Application. Linsen Liu and Guang (Gil) Wang\*, IOI Loders Croklann, USA
- 8:20 Studies on the Effect of Thermal Pre-treatment on the Isothermal Crystallisation of Cocoa Butter. Marjorie Ladd Parada<sup>1</sup>, Josélio Vieira<sup>2</sup>, Peng Siong Chong<sup>2</sup>, Michael Ries<sup>1</sup>, Michael Rappolt<sup>1</sup>, and Malcolm J.W Povey<sup>1</sup>, <sup>1</sup>University of Leeds, UK; <sup>2</sup>Nestlé Product Technology Centre, UK
- 8:40 Functional Properties of Fats and Emulsifiers in Candy Application. Linsen Liu, Guang (Gil) Wang, and Aliess Bedford\*, IOI Loders Croklann. USA
- 9:00 Shea-based Shortenings. How to Overcome the Post-hardening Effect. Krish Bhaggan, Raul F. Petrut\*¹ and Jun Ma, *IOI Loders Croklaan, The Netherlands*
- 9:20 Confectionary Coating and Filling Fat: A Review. Linsen Liu and Guang (Gil) Wang\*, IOI Loders Croklann, USA
- 9:40 The Solubilization-Recrystallization-Diffusion Model to Quantify Oil Migration Kinetics in Cocoa Butter. Alejandro G. Marangoni, University of Guelph, Canada

10:00 Break

- 10:20 Synthesis of Cocoa Butter Equivalent by Enzymatic Interesterification of Illipe Butter and Palm Mid-fraction.

  Adiguna Bahari and Casimir C. Akoh. *University of Georgia, USA*
- 10:40 Polymorphic Transition and Bloom in Cocoa Powder. Paige Palmieri and Richard W. Hartel, University of Wisconsin-Madison, USA
- 11:00 **The Art and Science of Ganache.** Jade McGill¹ and Richard W. Hartel\*², ¹Nassau Candy, USA; ²University of Wisconsin-Madison, USA

Edible Applications Technology

### **EAT 2.1: Delivery and Dispersed Systems**

Chairs: Dérick Rousseau, Ryerson University, Canada; and Christopher Gregson, Ingredion, USA

### 101 E

- 7:55 Introduction.
- 8:00 Modelling the Effect of Confectioner's Sugar on Processing Interactions in Palm Oils. Ryan West and Dérick Rousseau, Ryerson University, Canada
- 8:20 Flavor partitioning into short-chain phospholipids: Effects of self-assembled structure. Andrew P. Karman, Stephanie R. Dungan, Susan E. Ebeler, and Nitin Nitin, *University of California, Davis, USA*
- 8:40 Thermal Analysis of Cough Drops Using Microstructure

- **Evolution Analysis.** Matt Vanden Eynden<sup>1</sup>, Roland Ramsch<sup>2</sup>, Giovanni Brambilla<sup>2</sup>, Pascal Bru<sup>2</sup>, and Gerard Meunier<sup>2</sup>, <sup>1</sup>Formulaction, Inc., USA; <sup>2</sup>Formulaction, France
- 9:00 Milk Fat Globules, A Novel Carrier for Delivery of Vitamin D<sub>3</sub>.

  Maha Alshehab¹, Mariza Gomes Reis², Li Day², and Nitin Nitin¹,

  ¹University of California, Davis, USA; ²AgResearch, Grasslands
  Research Centre, New Zealand
- 9:20 Enhanced Antimicrobial and Mycotoxin Inhibitory Activity of Clove Oil in Water Nanoemulsion. Jiajia Rao and Jing Wan\*, North Dakota State University, USA
- 9:40 **Emulsified Lipid Crystallinity Affects Early in vitro Lipolysis and beta-carotene Bioaccessibility.** Samantha M. Hart, Xinjie Lin\*, Surangi K.P.H. Thilakarathna, and Amanda Wright, *University of Guelph, Canada*
- 10:00 **Spray Drying Flavor Encapsulation Process at 25-100°C.** Charles Beetz, Daniel M. Schlipf, and Jason Z. Li, *ZoomEssence, USA*
- 10:20 Encapsulation of Lactase (β-galactosidase) into Novel Hydrogel Beads for the Effective Treatment of Lactose Intolerance. Zipei Zhang (Hans Kaunitz Award Winner), Ruojie Zhang, and D. Julian McClements, University of Massachusetts Amherst, USA
- 10:40 Effect of Water Addition on Physical Properties of Emulsion Gels. Thais L.T. da Silva¹, Daniel B. Arellano\*¹, and Silvana Martini², ¹University of Campinas, Brazil; ²Utah State University, USA
- 11:00 Insect Lipids as Food Ingredients: Oil Extraction, Characterization and Perspectives as Food Ingredient. Daylan A. Tzompa-Sosa¹, Liya Yi², Hein H.J van Valenberg², Martinus A.J.S. van Boekel², and Catriona M.M. Lakemond², ¹Ghent University, Belgium; ²Wageningen University, The Netherlands

Health and Nutrition

### BIO 2.1/H&N 2: Dietary Lipids and the Gut Microbiota

This session is sponsored in part by DuPont Nutrition & Health and Nitto Pharmaceutical Industries, Ltd.

Chairs: Barry Tulk, DuPont Nutrition & Health, USA; and Jun Ogawa, Kyoto University, Japan

### 101 J

Joint session: for details, see BIO 2;1/H&N 2 on page 44.

Special Session

### SS 3: Omega-3 Fatty Acids: Health Benefits and Dietary Recommendations

Organized by: The Council for Agricultural Science and Technology (CAST) 101 J

11:00 Omega-3 Fatty Acids: Health Benefits and Dietary Recommendations. Don Bietz, Iowa State University, USA

Industrial Oil Products

#### **IOP 2: Biofuels**

Chairs: Lieve Laurens, National Renewable Energy Laboratory, USA; and Steve Howell, M4 Consulting, Inc., USA

### 200 H

- 7:55 Introduction.
- 8:00 **Technical Needs for Biodiesel Blends Over B20.** Steve Howell, *M4 Consultina. Inc.. USA*
- 8:20 The Equilibrium Solubility Behavior of Glycerol in Biodiesel Fuels at Reduced Temperatures. Richard W. Heiden¹ and Martin Mittelbach², ¹R.W. Heiden Associates, LLC, USA; ²Institute of Chemistry, University of Graz, Austria
- 8:40 Green Diesel by Hydrotreatment of Vegetable Oils: Effect of Oil
  Quality on Hydrocarbon Yield and Composition. Elisa Volonterio,
  Juan Bussi, Jorge Castiglioni, Ignacio Vieitez, and Iván Jachmanián\*,
  Facultad de Química, Universidad de la República, Uruguay

- 9:00 **Biodiesel Production Using Agricultural Waste Derived Solid Acid Catalyst.** Zakir Hussain and Rakesh Kumar, *Rajiv Gandhi Institute of Petroleum Technology, India*
- 9:20 Spent FCC Catalyst-based Solid Catalyst for Efficient Biodiesel Production. Zakir Hussain and Rakesh Kumar, Rajiv Gandhi Institute of Petroleum Technology, India
- 9:40 Extractability and Quality of Lipids in Algae, a Study of Speciesspecific Lipase Activation. Ryan A. Herold and Lieve Laurens\*, National Renewable Energy Laboratory, USA
- 10:00 Correlating the Cold Flow and Melting Properties of Fatty Acid Methyl Ester (FAME) Mixtures. Robert O. Dunn, *USDA, ARS, NCAUR, USA*
- 10:20 Hydroprocessing Algal Lipids to Renewable Diesel Blend Stock. Jake Kruger, Earl Christensen, Tao Dong, Gina Fioroni, Robert McCormick, and Philip Pienkos, National Renewable Energy Laboratory, USA

Lipid Oxidation and Quality

### ANA 2c/LOQ 2a: Evaluation and Prediction of Oxidative Stability and Shelf-life

Chairs: Min Hu, DuPont Nutrition & Health, USA; and Richard Della Porta, Frito-Lay, USA

101 H

Joint session: for details, see ANA 2c/LOQ 2a on page 42.

Lipid Oxidation and Quality

### ANA 2d/LOQ 2b: Sensory Analytics and Analytical Methods for Assessing Lipid Oxidation and Shelf-life

Chairs: Jian Kong, Abbott Nutrition, USA; and Richard Della Porta, Frito-Lay, USA

101 H

Joint session: for details, see ANA 2d/LOQ 2b on page 42.

Phospholipid

### PHO 2: Chemical and Biochemical Advancements in the Phospholipid Field

Chairs: Moghis Ahmad, Jina Pharmaceuticals Inc., USA; and Swapnil Jadhav. Archer Daniels Midland Co., USA

### 200 A

- 7:55 Introduction.
- 8:00 **Phospholipids Modification with Enzymes: A Re-visit.** Xuebing Xu, *Wilmar Global Research and Development Center, China*
- 8:40 **Phenolipids for Delivery Systems: Synthesis and Characterization.** Sampson Anankanbil<sup>1</sup>, Bianca Perez<sup>1</sup>, Chiranjib Banerjee<sup>2</sup>, Katarzyna Widzisz<sup>2</sup>, and Zheng Guo<sup>2</sup>, <sup>1</sup>Dept. of Engineering, Aarhus University, Denmark; <sup>2</sup>Aarhus University, Denmark
- 9:00 **New Approaches in Non-aqueous Enzymology for Modification of Lipids and Phospholipids.** Douglas G. Hayes, *University of Tennessee, USA*
- 9:20 **Ability of Soy Lecithin Oleogel Emulsions to Protect Probiotics and Prevent Oxidation.** Nicole I. Gaudino, Stephanie Clark, and Nuria C. Acevedo, *Iowa State University, USA*
- 9:40 **Lipids as Mediators of Cardiomyocyte Cell Death During Ischemia/Reperfusion Injury.** Aleksandra Stamenkovic<sup>1</sup>, Kimberley A. O'Hara<sup>2</sup>, David C. Nelson<sup>2</sup>, Andrea L. Edel<sup>2</sup>, Grant N. Pierce<sup>2</sup>, and Amir Ravandi<sup>1</sup>, 'University of Manitoba, Canada; 'Institute of Cardiovascular Sciences, Canada
- 10:00 Sunflower and Soy Bean Lecithin: Interfacial Rheology and Kinetics at the Oil / Water Interface plus the Influence of Counter Ions. Arnulf Schoeppe and Prashandh Sankarappan, Cargill Texturizing Solutions Deutschland GmbH & Co.KG, Germany
- 10:20 Development of Phospholipid-Enriched Oleogels and Oleogel

### **DVC PROCESS TECHNOLOGISTS**

TECHNOLOGY WITH INNOVATION

♦ Oil Refining ♦ By-products Processing
 ♦ Process Automation ♦ Edible Soya White Flakes

### DEGUMMING / NEUTRALIZATION

- Long Mix Degumming
- HIGHSHEAR<sup>™</sup> mixer

### **BLEACHING**

- Inline slurry preparation
- Wet bleaching & Mechanical agitation

### **DEODORIZATION**

- PACKD™
- KOMPOSITE<sup>™</sup>
- LOWTRANS<sup>™</sup>
- DUALSCRUB<sup>™</sup> 2 Stage Scrubbing of Deodorization distillates

To be a part of Innovations in Technology, Contact us:

### **DVC Process Technologists**

DVC House, Survey No.111/11/1, Plot No.4, Opposite B.U. Bhandari Mercedes Benz Showroom, Mumbai-Bangalore Highway, Service Road, Baner, Pune 411 045, Maharashtra (INDIA)

**E-mail**: sales@dvcprocesstech.com **Website**: www.dvcprocesstech.com

- Emulsions Edible Semisolid Applications. Nicole I. Gaudino<sup>1</sup>, Saeed Mirzaee Ghazani<sup>2</sup>, Alejandro G. Marangoni<sup>2</sup>, Stephanie Clark<sup>1</sup>, and Nuria C. Acevedo<sup>1</sup>, \*Iowa State Unviersity, USA; \*2University of Guelph, Canada
- 10:40 Achieving a Docosahexaenoic Acid Content of 7% Improved the Efficacy of Chemotherapy in Mice Bearing a Triple Negative Breast Cancer Human Xenograft. Marnie Newell, Vera Mazurak, Lynne M. Postovit, and Catherine J. Field, *University of Alberta, Canada*

Processing

### BIO 2.2/PRO 2: Advances in Enzyme Processing Technologies

Chairs: Xuebing Xu, Wilmar Global Research and Development Center, China; and Flavio Galhardo, Bunge Global Innovation, USA

101 D

Joint session: for details, see BIO 2.2/PRO 2 on page 44.

Processing

### PRO 2.1: Environment, Health, Safety and Sustainability

Chaira: Richard Barton, N. Hunt Moore & Associates, USA; and William S. Minor, CHS, USA

200 F

- 8:55 Introduction.
- 9:00 Managing Environmental Challenges in Uncertain Times. Michael J. Boyer, AWTMS, USA
- 9:40 **Creating Triple Win Sustainability Programs.** William S. Minor, *CHS, USA*
- 10:00 Test Tube to Tanker: Stage Gate Engineering as a Guide to Process Development. Cecil T. Massie, Wood, USA
- 10:20 Challenges and Opportunities in Effluent Water Treatment for Oil Seed Processing Plants. Rakesh Patel, ADF Engineering, USA
- 10:40 Creating an Effective Dust Hazard Analysis for NFPA 652 Compliance. Matthew Williamson, ADF Engineering, USA
- 11:00 Towards Sustainable Production of Structured Lipids for the Food Industry. Suzana Ferreira-Dias, *Universidade de Lisboa, Instituto Superior de Agronomia, Portugal*
- 11:20 Challenges of the Palm Oil Industry. Peter J. Clarke, *The Tintometer Ltd., UK*
- 11:40 The Compliance Audit—A Challenge to Your Process Safety Management Program. John Mulholland, N. Hunt Moore & Associates, USA

Protein and Co-Products

### **PCP 2a: Proteins for Delivery Functions**

Chairs: Lingyun Chen, University of Alberta, Canada; and Chibuike Udenigwe, University of Ottawa, Canada

### 101 C

- 7:55 Introduction.
- 8:00 Nature-inspired Protein Nanotechnology for Delivery of Nutraceuticals and Anti-cancer Drugs. Yoav D. Livney, Dept. of Biotechnology and Food Engineering, Technion, Israel Institute of Technology, Israel
- 8:30 **Protein-lipid Complexes for Delivery of Nutraceutical Compounds.** Lingyun Chen, Guangyu Liu, and Zhigang Tian, *University of Alberta, Canada*
- 8:50 Design of Alginate Based Microgels for Protein Encapsulation and Delivery: pH Triggered Release. Ruojie Zhang (Thomas H. Smouse Memorial Fellowship Award Winner), Zipei Zhang, and D. Julian McClements, University of Massachusetts Amherst, USA

- 9:10 **Hemp Protein as an Encapsulating Agent to Produce Hemp Oil Powders.** Anusha Samaranayaka, Moumita Ray, and Udaya N. Wanasundara, *POS Bio-Sciences, Canada*
- 9:30 **Development of Protein-based Filled Hydrogels for Oral Delivery of Lipophilic Active Ingredients.** Zipei Zhang and D.
  Julian McClements, *University of Massachusetts Amherst, USA*

Protein and Co-Products

### PCP 2b: Current Trends in New and Minor Proteins, New Methods and New Uses

Chairs: Keshun Liu, USDA, ARS, USA; Xiaonan Sui, Northeast Agricultural University, China; and Hui Wang, Iowa State University, USA

101 C

- 9:55 Introduction.
- 10:00 Understanding Cohesive Strength from Plant and Animal Proteins. Charles R. Frihart, Forest Products Laboratory, USA
- 10:40 Enzyme-assisted Aqueous Extraction of Soybean Oil and Protein: Focus on Solving the Wastewater Problem. Xiaonan Sui and Lianzhou Jiang, Northeast Agricultural University, China
- 11:00 An Improved Wet Method to Process Oats into Fractions Enriched with Protein, Beta-Glucan, Starch or Other Carbohydrates. Keshun Liu, USDA, ARS, USA
- 11:20 Functional Properties of Mealworm Proteins. Changqi Liu<sup>1</sup>, Emily Woolf<sup>1</sup>, Jing Zhao<sup>2</sup>, Sarah Kim<sup>1</sup>, and Shruti Shertukde<sup>1</sup>, <sup>1</sup>San Diego State University, USA; <sup>2</sup>California State University, Los Angeles, USA;
- 11:40 Emerging Camelina Protein: Extraction, Modification and Structural/Functional Characterization. Baraem Ismail, *University of Minnesota, USA*

Surfactants and Detergents

### **S&D 2: New Technologies for Cold Water Laundry Detergency**

Chairs: Rajan Panandiker, Procter and Gamble Company, USA; and Paul T. Sharko, Shell Global Solutions, Inc., USA

200 C

- 7:55 Introduction.
- 8:00 **The Fundamentals of Low-Temperature Laundry: Property Control of Grease.** Bernhard von Vacano<sup>1</sup>, Matthias Kellermeier<sup>2</sup>, Juergen G. Tropsch<sup>2</sup>, and Keith E. Gutowski<sup>1</sup>, <sup>1</sup>BASF Corporation, USA; <sup>2</sup>BASF SE, Germany
- 8:20 Detergent Compositions Containing a Branched Surfactant for Cleaning Laundry in Cold Water. Phillip K. Vinson and Patrick Stenger, 'The Procter & Gamble Co., USA
- 9:00 **Detergent Amylases for Cleaning at Low Temperature.** Rajendra Kulothungan Sainathan, *Novozymes South Asia Pvt. Ltd. India*
- 9:20 **Delivering Effective Bleaching under Low Wash Temperatures.**Jane Mathews<sup>1</sup>, Jenny Wilkinson<sup>1</sup>, and Smita Brijmohan\*<sup>2</sup>, <sup>1</sup>Lubrizol Corporation, UK; <sup>2</sup>Lubrizol Corporation, USA
- 9:40 The Effect of Surfactant and Additives on Cold Water Detergency of Semi-solid Soil. Parichat Phaodee and David A. Sabatini, University of Oklahoma, USA
- 10:00 Laundry Detergency of Solid Non–Particulate Soil or Waxy Solids: Effect of Surfactant Type. David A. Sabatini<sup>1</sup>, Jarussri Chanwattanakit<sup>2</sup>, John Scamehorn<sup>1</sup>, and Sumaeth Chavadej<sup>2</sup>, <sup>1</sup>University of Oklahoma, USA; <sup>2</sup>Chulalongkorn University, Thailand
- 10:40 Microbes in Your Laundry: Does Washing on "Cold" Make a Difference? Darci L. Ferrer, American Cleaning Institute, USA
- 11:00 **Study on Bacteria Flora to Prevent Fabric Odors.** Keisuke Mori, Nanami Sasaki, Takahiro Hayashi, Hiroyuki Masui, and Takahiro Okamoto, *Lion Corporation, Japan*

### **TUESDAY AFTERNOON**

Analytical

### **ANA 3: General Analytical**

Chairs: Torben Küchler, Eurofins Analytik GmbH, Germany; and Pierluigi Delmonte, US Food and Drug Administration, USA

### 101 G

- 2:35 Introduction.
- 2:40 Rapid Identification and Relative Quantification of the Phospholipid Composition in Commercial Lecithins by <sup>31</sup>P-NMR. Ying Yang, Richard Hiserodt, and Jing Li, *International Flavors & Fragrances Inc., USA*
- 3:00 Applications for the LC-GC Technique in Routine Fat and Oil Analysis. Torben Küchler, Eurofins Analytik GmbH, Germany
- 3:20 Overcoming Issues and Challenges in the Analyses of Tocols in Oils. Mei Han Ng and Ahmad Kushairi Din, *Malaysian Palm Oil Board, Malaysia*
- 3:40 Tocopheryl Esters Analysis of Novel Vitamin E Conjugates in Vegetable Foods: Occurrence, Concentrations and Digestibility.
  Walter Vetter, Stephanie Krauß, and Vanessa Darwisch, *University of Hohenheim, Germany*
- 4:00 A Method for Detection of Partially Hydrogenated Oils (PHO) in Food Matrices Containing Vegetable Oils. Sneh Bhandari<sup>1</sup>, Ming Gao<sup>1</sup>, and Pierluigi Delmonte<sup>2</sup>, <sup>1</sup>Merieux Nutrisciences, USA; <sup>2</sup>US Food and Drug Administration, USA
- 4:20 Supplementation Studies Involving Natural trans Fatty Acids: Real Technical Challenges, Actual Solutions. Etienne Guillocheau, Daniel Catheline, Philippe Legrand, and Vincent Rioux, Agrocampus-Ouest, France
- 4:40 Determination of sn2-position Fatty Acid in Longchain Triglycerides(LCTs) and Medium- and Long-chain

- Triglycerides(MLCTs) with Enzymatic Alcoholysis by GC-FID. Wei Ting Ting, Wen Ming Cao, and Yuan Rong Jiang, Wilmar (Shanghai) Biotechnology Research & Development Center Co., Ltd., China
- 5:00 Normal Phase UV Compatible HPLC Separation of Hydroxylated and Non-hydroxylated Lipids for Metabolic Flux Analysis.

  Hari Kiran Kotapati and Philip D. Bates, *The University of Southern Mississippi, USA*
- 5:20 Mitigating the Deteriorating Effect of Biofuel in Engine Oil.

  Jerome D.A. Kpan<sup>1</sup>, and Juergen Krahl<sup>2</sup>, <sup>1</sup>Technology Transfer
  Automotive Centre of Coburg University of Applied Sciences and
  Arts, Germany, Germany; <sup>2</sup>Coburg University of Applied Sciences and
  Arts; Ostwestfalen-Lippe University of Applied Sciences, Germany

Analytical

### ANA 3.1/PCP 3a: Bioprocessing for New/Value-added Protein Utilization: Digestibiity Issues/Analytical Measurements

Chairs: Sneh Bhandari, Merieux Nutrisciences, USA; Buddhi Lamsal, Iowa State University, USA; and Bishnu Karki, South Dakota State University, USA 101 C

- 2:35 Introduction
- 2:40 Matrix Effect on the in vitro Immunodetection of Food Allergens. Qinchun Rao, Xingyi Jiang, and Behnam Keshavarz, Florida State University. USA
- 3:00 Protein Quality Evaluation in Protein Enhanced Formulations Including Those Based on Oilseed Based Proteins. Sneh Bhandari, Merieux Nutrisciences, USA
- 3:20 Simultaneous Quantification of Hydrolysis Degree, Protein and Mean Weight of Peptides Released during Enzymatic Proteolysis. Sophie Beaubier<sup>1</sup>, Irina Ioannou<sup>1</sup>, Xavier Framboisier<sup>2</sup>, Olivier Galet<sup>3</sup>, and Romain Kapel<sup>2</sup>, <sup>1</sup>LRGP UMR CNRS 7274, France;

EP Minerals, LLC / (800) 366-7607 / www.epminerals.com EP Engineered Clays Corporation / (844) 714-1102 / www.epengineeredclays.com 50

- <sup>2</sup>Reaction and Process Engineering Laboratory UMR-7274, France; <sup>3</sup>Avril Group, France
- 3:40 **Nutritional Evaluation of Modified Carinata Meals in Finfish.** Tom Kasiga and Michael Brown, *Dept. of Natural Resource Management, South Dakota State University, USA*

Biotechnology

### **BIO 3: PUFA Biotechnology**

Chairs: Suk-Hoo Yoon, Woosuk University, Republic of Korea; and Tsunehiro Aki, Hiroshima University, Japan

#### 200 I

- 2:35 Introduction.
- 2:40 Lipase-catalyzed Butanolysis of Echium Oil for the Selective Enrichment in Gamma-linolenic and Stearidonic Acids. Marta C. Corzo-Martinez<sup>1</sup>, Eduardo López <sup>2</sup>, Luis C. Vazquez<sup>1</sup>, Elena Ortego<sup>2</sup>, Erika Olaya<sup>2</sup>, Guillermo Reglero<sup>1</sup>, and Carlos Torres\*<sup>1</sup>, 

  1 University Autonoma of Madrid, Spain; 2 Dept. of Production and Characterization of Novel Foods, Institute of Food Science Research (CIAL, CSIC-UAM), Spain
- 3:00 Efficiency Improvement in the Enzymatic Fractionation of PUFA. Yomi Watanabe<sup>1</sup>, Ryosuke Hoshina<sup>2</sup>, Kazumi Katagiri<sup>2</sup>, and Hideaki Kobayashi<sup>2</sup>, <sup>1</sup>Osaka Research Institute of Industrial Science and Technology, Japan; <sup>2</sup>Kewpie Corporation, Japan
- 3:20 Engineering Yarrowia lipolytica for the Production of Fatty Alcohols from Sugars and Fats. Michael Spagnuolo, Murtaza Shabbir Hussain, and Mark Blenner\*, Clemson University, USA
- 3:40 **Production of Various PUFAs by Filamentous Fungus Mortierella** *alpina.* Eiji Sakuradani¹, Akinori Ando², Sakayu Shimizu³, and Jun Ogawa², ¹Tokushima University, Japan; ²Div. Applied Life Sciences, Graduate School of Agriculture, Kyoto University, Japan; ³Kyoto University, Japan
- 4:00 Practical Eicosapentaenoic Acid (EPA) Production by Mortierella alpina Molecular Breeding under Ordinary Temperature. Akinori Ando¹, Yuki Takemoto², Ryohei Nakatsuji³, Shigeru Hiramoto⁴, Eiji Sakuradani⁵, and Jun Ogawa¹, ¹Div. Applied Life Sciences, Graduate School of Agriculture, Kyoto University, Japan; ²Nisshin Pharma Inc., Japan; ³Kyoto University, Japan; ⁴Nisshin Pharma Inc. Japan; ⁵Tokushima University, Japan
- 4:20 Metabolic Engineering for Rare PUFA Production by an Oilproducing Fungus Mortierella alpina. Hiroshi Kikukawa¹, Eiji Sakuradani², Akinori Ando³, Sakayu Shimizu⁴, and Jun Ogawa³, ¹Gifu University, Japan; ²Tokushima University, Japan; ³Div. Applied Life Sciences, Graduate School of Agriculture, Kyoto University, Japan; ⁴Kyoto University, Japan
- 4:40 **Lipase-polymer Nanoconjugates for Biosynthesis in Non-aqueous Media: Synthesis and Characterization.** Bianca Perez<sup>1</sup>, Ana Moles<sup>2</sup>, Jannik Pedersen<sup>2</sup>, Steen V. Petersen<sup>2</sup>, Jan Skov S. Pedersen<sup>3</sup>, Adam Perriman<sup>4</sup>, and Zheng Guo<sup>2</sup>, <sup>1</sup>Dept. of Engineering,

- Aarhus University, Denmark; <sup>2</sup>Aarhus University, Denmark; <sup>3</sup>Interdisciplinary Nanoscience Center, Aarhus University, Denmark; <sup>4</sup>School of Cellular and Molecular Medicine, Bristol University, UK
- 5:00 Extraction and Refining of Lipids Containing Arachidonic Acid from Single Cell Oil, Mortierella sp. Suk-Hoo Yoon, Woosuk University, Republic of Korea

Biotechnology

### **BIO 3.1/PRO 3.1: Biodiesel**

Chairs: Per Munk Nielsen, Novozymes A/S, Denmark; Casimir C. Akoh, University of Georgia, USA; and Anders Rancke-Madsen, Novozymes, Denmark

#### 101 D

- 2:35 Introduction
- 2:40 Improving Pre-treatment Efficiency of Oil Feedstock using Adsorbent Filter Aids. David Gittins, Li-Chih Hu, and Nathan Dias\*, Imerys Filtration Minerals Inc., USA
- 3:00 Online Real-time Quality Control of Biodiesel using Near-Infrared Spectroscopy. Dominik Margraf, BUCHI NIR-Online GmbH, Germany
- 3:20 **FFA Reduction and Production Control.** Frankie Mathis and Bo Munk, *Tactical Fabrication LLC, USA*
- 3:40 Integrating Conventional and Enzymatic Approaches Towards Industrial Biodiesel Production. Marcelo Cantele, *Tranfertech Gestão de Inovações LTDA, Brazil*
- 4:00 Enzymatic Esterification to Handle the FFA in Biodiesel Production. Per Munk Nielsen, Novozymes A/S, Denmark
- 4:20 Liquid Lipases for Enzymatic Refining: Technical Advantages Beyond Green Technology. Zheng Guo, Aarhus University, Denmark
- 4:40 A New Enzymatic Biodiesel Polishing Process Based on Esterification of FFA into Methyl Esters. Anders Rancke-Madsen, Novozymes, Denmark
- 5:00 **Soapstock Acidulation using Carbon Dioxide.** Rusty Sutterlin, *Inventure Renewables, USA*

**Edible Applications Technology** 

### **EAT 3: Nano-, Micro- and Macrostructure**

Chairs: Silvana Martini, Utah State University, USA; and Alejandro G. Marangoni, University of Guelph. Canada

### 101 A

- 2:35 Introduction.
- 2:40 **Determination of Phase Transition Temperatures of Micro Crystals from Sequential Microscopic Images.** Hironori Hondoh<sup>1</sup>, Mio Aoki<sup>2</sup>, Seiya Takeguchi<sup>3</sup>, and Satoru Ueno<sup>1</sup>, <sup>1</sup>Graduate School of Biosphere Science, Hiroshima University, Japan; <sup>2</sup>Hiroshima University, Japan; <sup>3</sup>The Nisshin OilliO Group, Ltd./Hiroshima University, Japan
- 3:00 Addition of Phytosterol Esters to Palm Oil Influences its

### **Antitrust Policy**

The American Oil Chemists' Society (the "Society") intends to strictly comply with the antitrust laws of the United States, all state governments, and any other relevant governing authority (the "Antitrust Laws"), and in furtherance of this intention, proclaims the following Antitrust Policy:

- The Society shall not be used in a manner which violates the Antitrust Laws, and members
  of the Society, in their capacity as representatives of the Society, shall not tolerate, encourage
  or participate in any activity which could reasonably be expected to result in a violation of
  the Antitrust Laws.
- II. This policy shall apply to all membership, board, committee and other meetings of the Society, and all events attended by individual members of the Society in their capacity as representatives of the Society.
- III. The Society recognizes that the Antitrust Laws make certain activities between industry participants unlawful, and the Society expressly prohibits participation in such activities at any event which the Society holds or sponsors, or by any member of the Society at any event in which such member participates as a representative of the Society. Such prohibited activities include the following:
- A. Non-competition, territorial division, or operationally restrictive agreements;

- B. Boycotting, blacklisting, or unfavorable reporting; or
- C. Discussion of these and other prohibited matters, including the following:
  - i. Price, price fixing, price calculation, or price changes;
- ii. Cost
- iii. Terms or conditions of sales;
- iv. Quote decisions;
- v. Discounts;
- vi. Product or service offerings; or
- vii. Production or sales volume, capacity or plans.
- IV. In the course of any event in which activities or discussion threatens to border on a prohibited matter, any member, officer, director, employee or representative of the Society present at such event in such capacity shall request that the activity or discussion be terminated immediately, and if such termination does not immediately occur, such person shall seek recordation of the problem if appropriate, shall cease all participation in the event, and shall report the matter to the Society at the earliest possible opportunity.
- V. A copy of this Antitrust Policy shall be given at least annually to each officer, director, member, representative, or employee of the Society, or any other party participating in the Society, and the Antitrust Policy shall be readily available at all membership meetings.

# AOCS Laboratory Proficiency Program 2016/2017 Award Winners 1st Place GOED Nutraceutical Oils

lipid analysis

UK MHRA & US FDA approved for GMP analysis Successfully GCP inspected by the UK MHRA

Specialised analyses & analytical development:

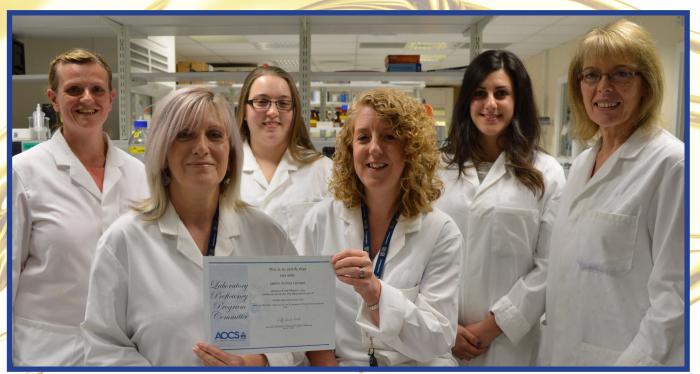

**Skin lipids & sebum** 

Clinical trials, including sampling & handling advice

**Nutraceuticals, especially Omega-3** 

**Stability & storage testing** 

**Method development & method validation** 

**Visit www.lipid.co.uk or contact claire.traynor@huttonltd.com** 

Consultants: Professor William Christie, Mr Peter Clough, Dr Charlie Scrimgeour

MyInefield Lipid Analysis is a part of James Hutton Limited, the commercial subsidiary of the James Hutton Institute, Scotland.

- **'Equilibrium' and Isothermal Crystallization Behavior.** Eva Daels<sup>1</sup>, Bart Goderis<sup>1</sup>, and Imogen Foubert<sup>2</sup>, <sup>1</sup>Katholieke Universiteit Leuven, Belgium; <sup>2</sup>Katholieke Universiteit Leuven Kulak, Belgium
- 3:20 Tailoring Promotion or Retardation of Nucleation Kinetics of Fats with Emulsifiers. Katsuyoshi Saitou¹, Ken Taguchi², Rika Homma¹, Masao Shimizu¹, Koichi Yasunaga¹, Yoshihisa Katsuragi¹, Satoru Ueno³, and Kiyotaka Sato\*⁴, ¹Kao Corporation, Japan; ²Graduate School of Integrated Arts and Sciences, Hiroshima University, Japan; ³Graduate School of Biosphere Science, Hiroshima University, Japan; ⁴Hiroshima University, Japan
- 3:40 The Coalescence Behavior of Fat Globules in the Presence of Protein, mono/diglycerides and Polysorbate 80. Abbey E. Thiel and Richard W. Hartel, *University of Wisconsin-Madison, USA*
- 4:00 Adsorption Mechanisms for Hydrophobic Food Surfactants at an Oil-Water Interface. Jennifer A. Staton and Stephanie R. Dungan, *University of California, Davis, USA*
- 4:20 Stability Studies of Pickering Emulsions Based on Different Types of Oils and its Application in Chocolate. Cunhong Chen¹, Yanchao Liu², Hong Zhang³, Yanlan Bi², Qi Shen¹, Zhenbo Xu¹, and Xuebing Xu⁴, ¹Wilmar (Shanghai) Biotechnology Research & Development Center Co., Ltd., China; ²Henan University of Technology, China; ³Wilmar (Shanghai) Biotechnology Research & Development Center Co., Ltd., Denmark; ⁴Wilmar Global Research and Development Center, China
- 4:40 Particulate Effects in Chocolate on Fat Bloom during Storage. Jiayang Jin and Richard W. Hartel, University of Wisconsin-Madison, USA
- 5:00 Examining Aerated Peanut Butter Systems Containing Lactic Acid Esters of Monoglycerides Compared to Traditional Samples. Kaustuv Bhattacharya, Niall Young, and Henrik Kragh, DuPont Nutrition & Biosciences ApS, Denmark

Edible Applications Technology

### EAT 3.1a/LOQ 3b: Manufacture and Stabilization of W/O and O/W Emulsions for Optimal Shelf-life

Chairs: Tanu Tokle, Qualitech, USA; Ann-Dorit Moltke Sørensen, Technical University of Denmark, Denmark; and Chandra Ankolekar, Kemin Industries Inc., USA

#### 101 H

- 4:15 Introduction
- 4:20 Stability and Functionality of Colloidosomes as Delivery Systems for Small Molecules. Umut Yucel, Kansas State University, USA
- 4:40 Impact of Phospholipids and Tocopherols on the Oxidative Stability of Soybean Oil-in-Water Emulsions. Gautam Samdani, D. Julian McClements, and Eric A. Decker, *University of Massachusetts* Amherst. USA
- 5:00 Effect of Droplet Size and Interfacial Crystallization on the Rheology of Fat Crystal-stabilized Water-in-Oil Emulsions.

  Dérick Rousseau and Ruby R. Rafanan, Ryerson University, Canada
- 5:20 Label Friendly EDTA Alternative for Oxidative Stability Improvement in Food Emulsions. Lan Ban, Yvonne Gildemaster, and Joan Randall, *Kemin Food Technologies, USA*

Edible Applications Technology

### EAT 3.2/H&N 3.1: Influence of Fat Composition and Structure in Foods on Metabolic Status

This session sponsored in party by Danone Nutricia Research.

Chairs: Amanda Wright, University of Guelph, Canada; and Marie-Caroline Michalski, INRA, France

### 101 E

- 2:35 Introduction.
- 2:40 Introducing the Importance of Molecular and Supramolecular Lipid Structures on Metabolism and Beyond. Marie-Caroline Michalski, *INRA*, *France*

- 3:20 Is the Food Matrix an Important Factor for Lipid Bioaccessibility and their Subsequent Metabolism? Sylvie Turgeon, INAF, Laval University. Canada
- 4:00 Citric Acid Esters-stabilized Emulsions During in vitro
  Digestion: Effect of the Physical State of Emulsifier. Qing Guo,
  Nick Bellissimo, and Dérick Rousseau\*, Ryerson University, Canada
- 4:20 Impact of Emulsion Droplet Physical State on *in vitro* Lipid Digestion. Surangi K.P.H. Thilakarathna and Amanda Wright, *University of Guelph, Canada*
- 4:40 Monounsaturated Fats and Stearic Acid: Summary of Impact on Human Cardiometabolic Outcomes. Dariush Mozaffarian, Friedman School of Nutrition & Health Policy, Tufts University, USA
- 5:20 *In vitro* and *in vivo* Evidence of Dietary trans-vaccenic Acid Retroconversion to trans-palmitoleic Acid. Etienne Guillocheau, Garcia Cyrielle, Léo Richard, Daniel Catheline, Philippe Legrand, and Vincent Rioux, *Agrocampus-Ouest, France*

Health and Nutrition

### **H&N 3: Lipids through the Lifespan**

This session is sponsored in part by DSM Nutritional Products.

Chairs: Adriana Gaitán, Louisiana State University, USA; and Ignacio Vieitez, UdelaR, Uruguay

### 101 J

- 2:35 Introduction.
- 2:40 Fats and Oils Needs during the Lifespan and their Effects on Health and Well-being Part 2 The Potential Health Effects of the Changing Fat Landscape. Penny Kris-Etherton, *The Pennsylvania State University, USA*
- 3:20 Dietary Monounsaturated Fatty Acids and Cardiovascular Disease Prevention: a Surprising Story Beyond Oleic Acid. Zhi-Hong Yang (Health and Nutrition New Investigator Research Award Winner), Lipoprotein Metabolism Section, Cardio-Pulmonary Branch, NHLBI, NIH, USA
- 3:40 Understanding the Relationship Between Dietary Fatty Acids and Blood and Tissue Fatty Acid Composition. Ken D. Stark, University of Waterloo, Canada
- 4:20 Antioxidant Potential of Esterified Resveratrol Derivatives in Different Model Systems. Won Young Oh and Fereidoon Shahidi, Memorial University of Newfoundland. Canada
- 4:40 Effect of Fatty Acid Chain Length and Saturation on the Lipid Profiles of Wistar Rats. Chathuri M. Senanayake<sup>1</sup>, Gangi R. Samarawickrama<sup>2</sup>, Nimanthi Jayathilaka<sup>2</sup>, and Kapila N. Seneviratne\*1, \*\*University of Kelaniya, Sri Lanka;\*\*2Dept. of Chemistry, University of Kelaniya, Sri Lanka
- 5:00 Identifying Novel Docosahexaenoic Acid-containing Phospholipids in Human Whole Blood as Indicators of Omega-3 PUFA Intake. Juan J. Aristizabal Henao (Honored Student Award Winner; Peter and Clare Kalustian Award Winner; Health and Nutrition Student Award Winner) and Ken D. Stark, University of Waterloo, Canada

Health and Nutrition

### EAT 3.2/H&N 3.1: Influence of Fat Composition and Structure on in Foods on Metabolic Status

This session sponsored in party by Danone Nutricia Research.

Chairs: Amanda Wright, University of Guelph, Canada; and Marie-Caroline Michalski, INRA, Francce

#### 101 E

Joint session: for details, see EAT 3.2/H&N 3.1, above.

### **IOP 3: Green Chemistry**

Chairs: Nurhan T. Dunford, Oklahoma State University, USA; Dharma Kodali, University of Minnesota, USA; and Jerry W. King, Critical Fluid Symposia, USA

#### 200 H

- 2:35 Introduction.
- 2:40 **Oil and Oilseed Processing with Sustainability in Mind.** Nurhan T. Dunford, *Oklahoma State University, USA*
- 3:00 Biobased Surfactants: A Useful Biorefinery Product That Can be Prepared Using Green Manufacturing. Douglas G. Hayes, University of Tennessee, USA
- 3:20 Eastern Red Cedar: Critical Fluid Extraction and Bioactivity of Extracts. Fred J. Eller, USDA, ARS, NCAUR, USA
- 3:40 Synthesis of Biobased Building Blocks from Cashew Nutshell Liquid: A Chemical Platform Approach for Polymer Synthesis.

  Sylvain Caillol, *Institut Charles Gerhardt, France*
- 4:00 Feruloylated Soy Glycerides: UV Absorbance Capacity and Photostability. David L. Compton<sup>1</sup>, John R. Goodell<sup>2</sup>, and Kervin O. Evans<sup>1</sup>, <sup>1</sup>USDA, ARS, NCAUR, USA; <sup>2</sup>iActive Naturals, USA
- 4:20 Subcritical Water Hydrolysis of Hemp Seed Oil in a Continuous Flow Coil Reactor. Andres F. Aldana Rico<sup>1</sup>, Ruben O. Morawicki<sup>2</sup>, Jerry W. King<sup>3</sup>, Marco E. Sanjuan Mejia<sup>1</sup>, and Antonio J. Bula Silvera<sup>1</sup>, 

  1 Universidad del Norte, Colombia; 2 University of Arkansas, USA; 3 Critical Fluid Symposia, USA
- 4:40 Green Chemistry in Cannabis "Oils" Extraction, Processing and Derived Products. Jerry W. King, Critical Fluid Symposia, USA

Lipid Oxidation and Quality

### LOQ 3a/PRO 3.2a: Effect of New Processing Technologies on Lipid Oxidation

Chairs: David Johnson, Kalsec Inc., USA; and Antonios Papastergiadis, Desmet Ballestra, Belgium

### 101 H

- 2:35 Introduction.
- 2:40 Oxidative Stability of Tomato-based Matrices Enriched with n-3-LC-PUFA Derived from Microalgae. Lore Gheysen<sup>1</sup>, Nele Lagae<sup>1</sup>, Jolien Devaere<sup>2</sup>, Koen Goiris<sup>4</sup>, Luc De Cooman<sup>2</sup>, and Imogen Foubert<sup>1</sup>, <sup>1</sup>Katholieke Universiteit Leuven Kulak, Belgium; <sup>2</sup>Katholieke Universiteit Leuven, Technology Campus Ghent, Belgium
- 3:00 Oxidation and Hydrolysis of Lipids in Marine Edible Shellfishes

  During Hot Drying Process. Dayong Zhou¹, Zhongyuan Liu², Kaiqi
  Gang³, Fereidoon Shahidi⁴, and Tong Wang⁵, ¹Dalian Polytechnic
  University, China; ²College of Food Science & Technology, Dalian
  Polytechnic University, China; ³School of Food Science and
  Technology, Dalian Polytechnic University, China; ⁴Memorial
  University of Newfoundland, Canada; ⁵lowa State University, USA
- 3:20 Effect of SprayDried Flavonoid Microparticles on Oxidative Stability of Methyl Linoleate as Lipid Model System. Manuel J. Palma¹, Gloria Márquez-Ruiz², Paula García ³, Francisca Holgado⁴, Cristina Vergara ³, Begoña Giménez⁵, and Paz S. Robert⁶, ¹Universidad de Chile, Chile; ²Instituto de Ciencia y Tecnología de Alimentos y Nutrición (ICTAN-CSIC), Spain; ³Departamento de Ciencia de los Alimentos y Tecnología Química, Facultad de Ciencias Químicas y Farmacéuticas, Universidad de Chile, Chile; ⁴Instituto de Ciencia y Tecnología de Alimentos y Nutrición (ICTAN-CSIC); ⁵Departamento de Ciencia y Tecnología de los Alimentos, Facultad Tecnológica, Universidad de Santiago de Chile, Chile; ⁶Universidad de Chile, Chile
- 3:40 The Impact of Diacylglycerol on Association Colloids Formation and Lipid Oxidation. Mizue Ouchi<sup>1</sup>, Eric A. Decker<sup>2</sup>, and D. Julian McClements<sup>2</sup>, <sup>1</sup>Kao Corporation, Japan; <sup>2</sup>University of Massachusetts Amherst, USA

### EAT 3.1a/LOQ 3b: Manufacture and Stabilization of W/O and O/W Emulsions for Optimal Shelf-life

Chairs: Tanu Tokle, Qualitech, USA; Ann-Dorit Moltke Sørensen, Technical University of Denmark, Denmark; and Chandra Ankolekar, Kemin Industries Inc., USA

### 101 H

Joint session: for details, see EAT 3.1a/LOQ 3b on page 52

Processing

### **PRO 3: By-product Processing**

Lipid Oxidation and Quality

Chairs: Norman J. Smallwood, The Core Team, USA; and Samia Mezouari, FoodScience-R&D-qc, Canada

### 200 F

- 2:35 Introduction.
- 2:40 Current Situation for Spent Bleaching Earth Disposal. Norman J. Smallwood, The Core Team, USA
- 3:00 Processing of Atlantic Salmon (*Salmo salar*) Heads for the Extraction of Proteoglycans. Subin R.C.K. Rajendran¹, Aishwarya Mohan², Zied Khiari³, and Beth Mason², ¹Dept. of Chemistry, Dalhousie University, Canada; ²Verschuren Centre for Sustainability in Energy and the Environment, Canada; ³Lethbridge College, Canada
- 3:20 Oil Recovery from Palm Kernel Meal using Subcritical Water Extraction in a Stirred Tank Reactor. Johnnys A. Bustillo Maury<sup>1</sup>, Andres F. Aldana Rico\*<sup>1</sup> (Processing Student Award Winner), Jerry W. King<sup>2</sup>, Cindy L. Garcia Pinto<sup>1</sup>, Ingrid N. Hernandez Medina<sup>1</sup>, Jose Urbina<sup>3</sup>, Juan C. Urueta<sup>3</sup>, Marco E. Sanjuan Mejia<sup>1</sup>, and Antonio J. Bula Silvera<sup>1</sup>, <sup>1</sup>Universidad del Norte, Colombia; <sup>2</sup>Critical Fluid Symposia, USA; <sup>3</sup>Palmaceite SA, Colombia
- 3:40 Use of Lipids for Enhancing the Nutritional Value, Digestibility and Health Safety of Hay. William J. Hausmann, The Core Team, USA
- 4:00 Investigation of the Selective Extraction of Non-polyisoprenic Compounds from Parthenium argentatum Biomass with Pressurized Fluids. Teerasak Punvichai¹, Daniel Pioch², Serge Palu², and Eric Tardan², ¹Prince of Songkla University, Thailand; ²CIRAD, UR 114 Biowooeb, France
- 4:20 Orange Oil Based Highly Flame-retardant Rigid Polyurethanes Foams for Industrial Applications. Sanket Bhoyate, Mihail Ionescu, Pawan Kahol, and Ram Gupta\*, Pittsburg State University, USA
- 4:40 Impact of Heat and Pressure on the Polyphenol Composition of Plant Extracts. Michael Eskin and Usha Thiyam\*, University of Manitoba, Canada
- 5:00 Challenges of Extraction and Downstream Processing of Polyunsaturated Oils from Microbial Biomass. Thushan S. Withana-Gamage and Udaya N. Wanasundara, POS Bio-Sciences, Canada

Processing

### BIO 3.1/PRO 3.1: Biodiesel

Chairs: Per Munk Nielsen, Novozymes A/S, Denmark; Casimir C. Akoh, University of Georgia, USA; and Anders Rancke-Madsen, Novozymes, Denmark

### 101 D

Joint session: for details, see BIO 3.1/PRO 3.1 on page 50.

Processing

### LOQ 3a/PRO 3.2a: Effect of New Processing Technologies on Lipid Oxidation

Chairs: David Johnson, Kalsec Inc., USA; and Antonios Papastergiadis, Desmet Ballestra, Belgium

### 101 H

Joint session: for details, see LOQ 3a/PRO 3.2a, above.

### ANA 3.1/PCP 3a: Bioprocessing for New/Value-added Protein Utilization: Digestibiity Issues/Analytical Measurements

Chairs: Sneh Bhandari, Merieux Nutrisciences, USA; Buddhi Lamsal, Iowa State University, USA; and Bishnu Karki, South Dakota State University, USA

### 101 C

Joint session: for details, see ANA 3.1a/PCP 3a on page 49.

Protein and Co-Products

### PCP 3b: Bioprocessing for New/Value-added Protein Utilization: Technologies

Chairs: Buddhi Lamsal, Iowa State University, USA; and Bishnu Karki, South Dakota State University, USA

### 101 C

- 4:15 Introduction
- 4:20 Fungal Fermentation of Rapeseed Meal for Better Animal Feed. Bo Hu, *University of Minnesota, USA*
- 4:40 Extraction and Properties of Protein from Camelina Engineered to Produce Acetyl-triacylglycerols (Camelina Acetyl-TAG). Mila P. Hojilla-Evangelista<sup>1</sup>, Roque L. Evangelista<sup>1</sup>, and John Ohlrogge<sup>2</sup>, <sup>1</sup>USDA, ARS, NCAUR, USA; <sup>2</sup>Michigan State University, USA
- 5:00 **Oilseed Protein Based Biomimetic Adhesive Inspired by Mussel Adhesion.** Nandika Bandara<sup>1</sup>, Hongbo Zeng<sup>2</sup>, and Jianping Wu<sup>2</sup>,

  <sup>1</sup>Dept. of Agricultural, Food and Nutritional Science, University of Alberta, Canada; <sup>2</sup>University of Alberta, Canada
- 5:20 **Production of Proteins from Partially De-oiled Mustard Flour.** Levente L. Diosady and Bih King Chen\*, *Dept. of Chemical Engineering, University of Toronto, Canada*

Surfactants and Detergents

### **S&D 3a: Surfactants in Agricultural Applications**

Chairs: Michael Tate, Dow Chemical Company, USA; and Ryan Totten, Stepan Company, USA

### 200 C

- 2:35 Introduction.
- 2:40 **Compatibility Agents for Complex Tank Mix Systems.** Jacob P. Bell, Julia A. Sheehan, and Kelly Buchek, *Stepan Company, USA*
- 3:00 Fundamentals of Multi-Surfactant/Solvent/Water Phase Behavior in Agricultural Applications Using High Throughput Techniques. Michael Tate, Laura Havens, Matthew Benedict, Thomas Boomgaard, Jeff Michalowski, Matt Entorf, Romain Britton, and Bethany Karl, *The Dow Chemical Company, USA*
- 3:20 Adjuvant Use for Crop Protection Products. Douglas J. Linscott, Madan M. Somasi, Hongyoung Jeon, and Suresh B. Annangudi Palani, *DowAgroSciences, LLC, USA*
- 3:40 Structured Surfactants as Rheology Modifiers for Electrolyte Systems. Kelly Buchek, Elodie Shaw, and Ryan Totten\*, Stepan Company, USA

Surfactants and Detergents

### **S&D 3b: General Surfactants**

Chairs: Robert Coots, Colonial Chemical, USA; Erika Szekeres, Method, USA; and Dennis Abbeduto, Colonial Chemical Inc., USA

### 200 C

- 4:15 Introduction
- 4:20 Virtual Detergency Experimentation. Rodrigo J. Olmedo and Nicolas A. Olmedo, CONSUMERTEC, Ecuador

- 4:40 Characteristic Curvature of Ether Carboxylate Surfactants and Contribution of Functional Groups. Thu Nguyen and Carla Morgan, Sasol Performance Chemicals. USA
- 5:00 Thickener for Cationic Disinfectant-based Formulations. Grace N. Mahfouz, Smita Brijmohan, Mark Paczkowski, and Chris Belock, Lubrizol Corporation, USA
- 5:20 Surface Activity of Plant Oil-based Monomers in Emulsion Copolymerization. Kyle Kingsley<sup>1</sup>, Vasylyna Kirianchuk<sup>2</sup>, Oleh Shevchuk<sup>1</sup>, and Andriy Voronov<sup>1</sup>, <sup>1</sup>North Dakota State University, USA; <sup>2</sup>Lviv Polytechnic National University, Ukraine

Surfactants and Detergents

### S&D 3.1: Surfactants and Additives in Enhanced Oil Recovery and Oilfield Applications

This session is sponsored in part by Harcros Chemicals and Ultimate EOR Services.

Chairs: Upali Weerasooriya, University of Texas at Austin, USA / Harcros Chemicals & Ultimate EOR Services, USA; and Jeffrey Harwell, University of Oklahoma, USA

#### 200 A

- 2:35 Introduction.
- 2:40 A Novel Microfluidic Platform to Measure Dynamic Interfacial Tensions at Short Time Scales. Sachin Goel<sup>1</sup>, Samson Ng<sup>2</sup>, Edgar Acosta<sup>3</sup>, and Arun Ramchandran<sup>3</sup>, <sup>1</sup>Dept. of Chemical Engineering and Applied Chemistry, University of Toronto, Canada; <sup>2</sup>Syncrude Canada Limited, Canada; <sup>3</sup>University of Toronto, Canada
- 3:00 Quantiative Crude Oil Demulsification Analysis Using Multiple Light Scattering. Matt Vanden Eynden<sup>1</sup>, Christelle Tisserand<sup>2</sup>, Yoann Lefeuvre<sup>2</sup>, Pascal Bru<sup>2</sup>, and Gerard Meunier<sup>2</sup>, <sup>1</sup>Formulaction, Inc.. USA; <sup>2</sup>Formulaction, France
- 3:20 **Novel Surfactants for Chemical Enhanced Oil Recovery.**Himanshu Sharma<sup>1</sup>, Krishna Panthi<sup>1</sup>, Pinaki Ghosh<sup>1</sup>, Upali P.
  Weerasooriya<sup>2</sup>, and Kishore K. Mohanty<sup>1</sup>, 'The University of Texas at
  Austin, USA; <sup>2</sup>University of Texas, Harcros Chemicals & Ultimate EOR
  Services, USA
- 3:40 Comprehensive Evaluation of Scleroglucan Biopolymer for EOR under Harsh Reservoir Conditions. Mohannad Kadhum, Tryg Jensen, Briana Kozlowicz, Eric S. Sumner, Jeffrey Malsam, and Ramakrishna Ravikiran, *Cargill, USA*
- 4:00 **Surfactants as Steam Foam Additives for Thermal EOR Processes.** Thu Nguyen¹, Ajay Raj¹, and Jorge M. Fernandez², ¹Sasol Performance Chemicals, USA; ²Sasol North America, USA
- 4:20 Amido-Amine Based Surfactants: Synthesis, Characterization, and Physico-Chemical Investigation for Enhanced Oil Recovery in Carbonate Reservoirs. Syed S. Hussain and Muhammad Sha Kamal, King Fahd University of Petroleum and Minerals, Saudi Arabia
- 4:40 Oil Compatible Cylindrical Micelles at a Very Wide Range of Temperatures and Salinities. Krishna Panthi¹, Himanshu Sharma¹, Upali P. Weerasooriya³, and Kishore K. Mohanty¹, ¹University of Texas at Austin, USA; ³University of Texas, Harcros Chemicals & Ultimate EOR Services, USA
- 5:00 The Ultra-low IFT Behavior and Mechanism of a Novel Combined Cationic/Anionic-nonionic Gemini Surfactants System for Chemical Flooding. Haishun Feng¹, Jirui Hou¹, Liming Zhang¹, Zhe Li¹, Wanli Kang³, and Hairong Wu¹, ¹China University of Petroleum (Beijing), China; ²China University of Petroleum (East China), China
- 5:20 Use of Carbonaceous Nanoparticles as Surfactant Carrier in Crude Oil Recovery: Part I. Laboratory Study. Changlong Chen, Ben Shiau, and Jeffrey Harwell, *University of Oklahoma, USA*

### **WEDNESDAY MORNING**

Analytical

### ANA 4: Trace Contaminants, including Processing Contaminants

Chairs: Jessica K. Beekman, US Food and Drug Administration, USA; and Mark W. Collison. Archer Daniels Midland Co.. USA

### 101 G

- 7:55 Introduction.
- 8:00 Comparison of Analytical Methodologies for the Analysis of Bound MCPD and Glycidol in Edible Oils and Infant Formula.

  Jessica K. Beekman<sup>1</sup>, Kaitlin Grassi<sup>1</sup>, Shaun MacMahon<sup>1</sup>, Jan Kuhlmann<sup>2</sup>, Adam Becalski<sup>3</sup>, Greg Jaudzems<sup>4</sup>, and Fabien Robert<sup>4</sup>, <sup>1</sup>US Food and Drug Administration, USA; <sup>2</sup>SGS Germany GmbH, Germany; <sup>3</sup>Health Canada, Canada; <sup>4</sup>Nestle Quality Assurance Center, USA
- 8:20 **Detection Limits and Challenges in Low Level Analysis of MCPD and Glycidol using AOCS Method Cd 29c-13.** Mark W. Collison and Kevin Adlaf, *Archer Daniels Midland Co., USA*
- 8:40 Recent Status of EU-regulation on 3-MCPD and Glycidol in Oils/ Fats, Infant Formulae and Analytical Solutions Available. Jan Kuhlmann, SGS Germany GmbH, Germany
- 9:00 Modern Analytical Tools in MCPD and Glycidol Analysis: Research and Routine Analysis Perspectives. Katerina Mastovska¹, Vojtech Hrbek², Beverly Belkova², Barbara A. Mitchell³, Urairat Koesukwiwat⁴, and Jana Hajslova², ¹Covance Food Solutions, USA; ²University of Chemistry and Technology, Czech Republic; ³Covance Labs, Inc., USA; ⁴Covance Food Solutions, Singapore
- 9:20 Toxicity Evaluation of 2-MCPD and Estimation of Intestinal Absorption of the Monoesters. Yomi Watanabe¹, Naoki Kaze², Kaeko Murota³, Hirofumi Sato⁴, Yuri Osafune⁵, and Araki Masuyama⁵, ¹Osaka Research Institute of Industrial Science and Technology, Japan; ²Ueda Oils & Fats MFG., Japan; ³Kindai University, Japan; ⁴Osaka Municipal Technical Research Institute, Japan; ⁵Osaka Institute of Technology, Japan
- 9:40 Break
- 10:00 The Importance of Aligning Analytical Lmits with Health-based Guidance Values: Process-formed Compounds Case Study. Paul R. Hanlon, *Abbott Nutrition*, *USA*
- 10:40 Healthy but also Flavorful Food: Mitigation Strategies for Foodborne Toxicants Combined with Sensory Properties Accepted by Consumers. Michael Granvogl, *Technical University of Munich, Germany*
- 11:00 MOSH/MOAH and Plasticizers: Status quo of Analysis and Activities of the Authorities in the EU. Jan Kuhlmann, SGS Germany GmbH, Germany
- 11:20 Immuno Magnetic Solid Phase Extraction Combined with Cleanup to Determine Aflatoxin B1 in Vegetable Oils. Hongshun Yang and Xi Yu, National University of Singapore, Singapore
- 11:40 Effect of the Composition and Structure of Excipient Emulsion on the Bioaccessibility of Pesticide Residue in Agricultural Products. Ruojie Zhang¹ (Honored Student Award Winner; Lipid Chemistry and Nutrition Award Winner) D. Julian McClements¹, Lilli He¹, Zipei Zhang¹, Wenhao Wu², Yeonhwa Park³, and Baoshan Xing², ¹University of Massachusetts Amherst, USA; ²Stockbridge School of Agriculture, University of Massachusetts Amherst, USA; ³Dept. of Food Science, University of Massachusetts Amherst, USA

Biotechnology

### BIO 4: Plant and Algae Lipid Biotechnology and Genomics

Chairs: Jay Shockey, USDA, ARS, SRRC, USA; and Timothy P. Durrett, Kansas State University, USA

### 200 I

7:55 Introduction.

- 8:00 **Genome Editing and Plant Agriculture.** Daniel Voytas, *University of Minnesota, USA*
- 8:40 Improving the World's Nutrition with Next Generation Canola Oils. Lorin R. Debonte, Xinmin Deng, Richard Fletcher, Kristin P. Monser-Gray\*, Diliara lassonova, and Willie Loh, *Cargill Inc., USA*
- 9:00 Generation and Characterization of Multiple Mutated Oilseeds via CRISPR Cas9 Genome Editing. Jay Shockey, Catherine Mason, and Tien Thuy Vuong, SRRC-ARS-USDA, USA
- 9:20 CRISPR-Cas9 Genome Editing to Alter Oil Production in the Hexaploid Oilseed Crop Camelina sativa. Jose A. Aznar-Moreno and Timothy P. Durrett, Kansas State University, USA
- 9:40 Advancing Genomic Solutions in Algae Biofuels and Bioproducts. Eric R. Moellering, *Synthetic Genomics, Inc, USA*
- 10:00 Break
- 10:20 Molecular Breeding Tools for Rapid Conversion of Cover Crop Pennycress into a Novel Oilseed Crop. Tim Ulmasov, *Arvegenix*, USA
- 10:40 Employing Synthetic Biology Approaches to Facilitate Value-added Oil Production in the Oilseed Cover Crop Pennycress.

  John Sedbrook¹, Michaela McGinn¹, Malihe Esfahanian¹, Sunil Bansal², Brice Jarvis¹, Taylor Suo¹, Tara Nazarenus³, M. David Marks⁴, Ed Cahoon⁵, and Timothy P. Durrett², ¹Illinois State University, USA; ²Kansas State University, USA; ³University of Nebraska, USA; ⁴University of Minnesota, USA; ⁵University of Nebraska-Lincoln, USA;
- 11:00 Glycolytic Genes Influences Mesocarp Oil Content in Oil Palm.

  Jaime Y.S. Low¹, Nurliyana Y.S. Ruzlan², Noor Azizah Musa Musa³,
  Ai-Ling Ong³, David R. Appleton¹, Fook Tim Chew⁴, Hirzun M. Yusof²,
  and Harikrishna Kulaveerasingam⁵, ¹Biotechnology & Breeding
  Department, Sime Darby Plantation R&D Centre, Malaysia; ²Sime
  Darby Renewables, Sime Darby Plantation Sdn Bhd, Malaysia;
  ³Biotechnology & Breeding Department, Sime Darby Plantation
  R&D Centre; ⁴Dept. of Biological Sciences, National University of
  Singapore, Singapore; ⁵Sime Darby Plantation R&D Centre, Malaysia
- 11:20 Recapitulation of Triacylglycerol Biosynthesis Pathways to Increase Hydroxy-Fatty Acid Accumulation. Daniel Lunn, James Wallis, and John Browse, *Washington State University, USA*

Biotechnology

### **BIO 4.1/S&D 4: Biosurfactants and Additives**

Chairs: Daniel K.Y. Solaiman, USDA, ARS, ERRC, USA; and George A. Smith. Sasol North America. USA

#### 200 C

- 7:55 Introduction.
- 8:00 **Next Generation Castor Oil Ethoxylates.** Ollie James, Dustin Landry, Liam McMillan, and George Smith, *Sasol North America, USA*
- 8:20 **Glycolipid Biosurfactants: Characteristic Curvature and Applications in Microemulsions and Emulsions.** Zheng Xue, Dennis Parrish, Eric Theiner, Khalil Yacoub, Andras Nagy, and Terrence Everson, *Evonik Corporation, USA*
- 8:40 **Glucamide Surfactants: Structural and Interfacial Aspects.**Brajesh Jha, *Colgate Palmolive, USA*
- 9:00 NMR Investigation of the Effect of pH on Micelle Formation by an Amino Acid-based Surfactant. Kevin F. Morris¹, Gabriel Rothbauer¹, Elisabeth Rutter¹, Chelsea Reuter-Seng¹, Simon Vera², Eugene Billiot², Yayin Fang³, and Fereshteh Billiot², ¹Carthage College, USA; ²Texas A&M Corpus Christi, USA; ³Howard University, USA
- 9:20 Effects of Rhamnolipid on Phagotrophic Algae as Sensitive Ecologically Important Model Organism. Krutika Invally, Suo Xiao, and Lu-Kwang Ju\*, *University of Akron, USA*
- 9:40 **Application of Sophorolipids to Control Food Pathogens.** Daniel K.Y. Solaiman, Richard D. Ashby, Xuetong Fan, and Modesto Olanya, *USDA, ARS, ERRC, USA*
- 10:00 The Stability of Nanoemulsions and Emulsions Containing Cinnamaldehyde and Biosurfactants, and their Antimicrobial Performance against Escherichia. coli 0157:H7 and Listeria

- Monocytogenes. Kangzi Ren and Buddhi Lamsal, *Iowa State University, USA*
- 10:20 Unique Characteristics of Sophorolipid, Yeast Glycolipid Biosurfactants, and its Application as Eco-friendly Biodetergents. Yoshihiko Hirata, Glen Lelyn Quan, Michiaki Araki, and Mizuyuki Ryu, Saraya, Japan
- 10:40 Applisurf: Functionality Driven Design and Synthesis of Newto-Nature Glycolipid Biosurfactants. Sophie L.K.W. Roelants<sup>1</sup>, Sofie Demaeseneire<sup>2</sup>, and Wim Soetaert<sup>3</sup>, <sup>1</sup>Bio Base Europe Pilot Plant, Belgium; <sup>2</sup>Ghent University, Belgium; <sup>3</sup>Centre for Industrial Biotechnology and Biocatalysis (InBio.be), Ghent University, Belgium

Edible Applications Technology

### EAT 4: Lipid Gels: Application and Functionality in Edible Products

This session is sponsored in part by Cargill, Inc.

Chairs: Michael Rogers, University of Guelph, Canada; and Serpil Metin, Cargill Inc., USA

#### 101 A

- 7:55 Introduction.
- 8:00 Oil Gel: Its Historic Development and Technical Hurdles to Overcome for Future Commercialization. Linsen Liu, IOI Loders Croklann, USA
- 8:20 Peptide-based Low Molecular Weight Organogelators (LMOGs): Structural Influence of Side Chain, Chain Length and D/L Configuration On Gelation Behavior. Yaqi Lan and Yong Cao, South China Agricultural University, China
- 8:40 Physical Properties, Microstructure and Intermolecular forces of Soybean Oil Oleogels Structured by Different Polysaccharides.

  Zong Meng¹, Keyu Qi², and Yuanfa Liu³, ¹School of Food Science and Technology, Jiangnan University, China; ²School of Food Science and Technology, State Key Laboratory of Food Science and Technology, Jiangnan University, China; ³School of Food Science and Technology, State Key Laboratory of Food Science and Technology, Jiangnan University, China
- 9:00 **Natural Saponin-based Emulsion Templates for Edible Oil Structuring.** Xaioquan Yang, *South China University of Technology, China*
- 9:20 Photoprotective Mechanism of Supramolecular Oleogels on Retinyl Palmitate. Yixing Tian and Nuria C. Acevedo\*, *lowa State University, USA*
- 9:40 Break
- 10:00 Interaction between Different Lipid Structuring Agents in Organogels. Thais L.T. da Silva¹ (Honored Student Award Winner), Silvana Martini², and Daniel B. Arellano¹, ¹University of Campinas, Brazil; ²Utah State University, USA
- 10:20 Engineering Mechanical Properties of Edible Oleogels Based on Ethylcellulose and Lecithin. Mayra Aguilar-Zarate<sup>1</sup>, Jorge F. Toro-Vazquez<sup>1</sup>, and Alejandro G. Marangoni<sup>2</sup>, <sup>1</sup>Universidad Autónoma de San Luis Potosí, Mexico; <sup>2</sup>University of Guelph, Canada
- 10:40 Crystallization Behavior of Low Saturated, Non-Hydrogenated Fat Systems Structured with Different Oleogels Monoglycerides, Vegetable Wax and its Combinations. Fernanda Davoli<sup>1</sup>, Serpil Metin<sup>1</sup>, and Paul Smith<sup>3</sup>, <sup>1</sup>Cargill, USA; <sup>2</sup>Cargill Global Foods Research. Belgium
- 11:00 Whey Protein and Vegetable Oil Interactions within Oleocolloid Matrices. Clifford Park, Rafael Jimenez-Flores, and Farnaz Maleky, *Ohio State University, USA*
- 11:20 Influence of Polar Compounds and Fatty Acid Composition on the Formation of Organogels. Eckhard Flöter, Maria Scharfe, and Yassin Ahmane Technical University of Berlin, Germany •

Edible Applications Technology

### EAT 4.1/LOQ 4b: Food Structuring to Reduce Lipid Oxidation

Chairs: Hong-Sik Hwang, USDA, ARS, NCAUR, USA; Alex Kripps, Caldic USA, USA; and Yaqi Lan, South China Agricultural University, China

### 101 H

- 10:15 Introduction
- 10:20 Formation of Free-flowing Fish Oil-loaded Hollow Solid Lipid Micro- and Nanospheres Using Carbon Dioxide. Junsi Yang and Ozan N. Ciftci\*, *University of Nebraska-Lincoln, USA*
- 10:40 Natural Wax Oleogels-A Method to Prevent Oxidation of Fish Oil. Hong-Sik Hwang¹, Matthew Fhaner², Jill Moser¹, and Sean Liu³, ¹USDA, ARS, NCAUR, USA; ²University of Michagan-Flint, USA; ³USDA, ARS, USA
- 11:00 Self-assembled Colloidal Complexes of Polyphenol—gelatin and their Stabilizing Effects on Emulsions. Chaoying Qiu, Yu Huang¹, Zhen Zhang², Ying Li³, and Yong Wang¹, ¹Jinan University, China; ²South China University of Technology, China; ³Guangdong Saskatchewan Oilseed Joint Laboratory, Dept. of Food Science and Engineering, Jinan University, China
- 11:20 Ability of SDS Micelles to Increase the Antioxidant Activity of α-tocopherol. Raffaella Inchingolo¹ (European Section Travel Grant Winner and Lipid Oxidation and Quality Travel Grant Winner), Sezer S. Kiralan¹, Sibel Uluata¹, MariaTeresa Rodriguez Estrada², D. Julian McClements³, and Eric A. Decker³, ¹University of Massachusetts, USA; ²University of Bologna, Italy; ³University of Massachusetts Amherst. USA
- 11:40 Impact of Reduced Oxygen Environment and Natural Antioxidants on the Oxidative Stability of Oil-in-Water Emulsions. Eric A. Decker¹ and David R. Johnson\*2, ¹University of Massachusetts Amherst, USA; ²Kalsec Inc., USA

Health and Nutrition

### H&N 4a: Nutrigenetics and Nutrigenomics of Lipid Metabolism

This session is sponsored in part by National Cattlemen's Beef Association and Young Living Essential Oils.

Chairs: Susan K. Raatz, USDA, ARS, Grand Forks Human Nutrition Research Center, USA; and Fabiola Dionisi, Nestlé Research Center, Switzerland

### 101 J

- 7:55 Introduction.
- 8:00 Genetic Determinants of the Cardiometabolic Risk Factor Response to an N-3 PUFA Supplementation. Marie-Claude Vohl, Laval University, Canada
- 9:00 Effect of Fatty Acid Chain Length on Regulation of Hepatic Gene Expression by Saturated Fats. Harsha Hapugaswatte<sup>1</sup>, Chathuri M. Senanayake<sup>1</sup>, Gangi R. Samarawickrama<sup>2</sup>, Kapila N. Seneviratne<sup>1</sup>, and Nimanthi Jayathilaka\*<sup>2</sup>, \*\*Iniversity of Kelaniya, Sri Lanka; \*\*2Dept. of Chemistry, University of Kelaniya, Sri Lanka
- 9:20 Trans Fatty Acids Suppress TNFalpha-induced Inflammatory Gene Expression in Endothelial and Hepatocellular Carcinoma Cells. Marine S. Da Silva¹, Sarah O¹Connor², Pierre Julien², Jean-François Bilodeau², Olivier Barbier³, and Iwona Rudkowska\*², ¹Centre de recherche du CHU de Québec Université Laval, Canada; ²Endocrinology and Nephrology Unit, Centre de recherche du CHU de Québec Université Laval, Canada; ³Laboratory of Molecular Pharmacology, Centre de recherche du CHU de Québec Université Laval, Canada ◆
- 9:40 Gene-dietary Fat Interactions and Cardiometabolic Health. José M. Ordovás, Tufts University, USA

### H&N 4b: Ralph Holman Lifetime Achievement Award Lecture

Chairs: Douglas M. Bibus, Lipid Technologies LLC, USA; and Fabiola Dionisi. Nestlé Research Center, Switzerland

01 J

11:00 Ralph Holman, Omega 3 and Me. Susan K. Raatz, USDA, ARS, Grand Forks Human Nutrition Research Center. USA

Industrial Oil Products

### **IOP 4: Oleochemicals**

Chairs: Xiaofei P. Ye, University of Tennessee, USA; and Franck Dumeignil, Université de Lille, France

### 200 H

- 7:55 Introduction.
- 8:00 **The Global Challenges in Chemicals and Energy.** Mischa Schneider, *Chemspeed Technologies AG, Switzerland*
- 8:20 Effective Magnesium Oxide-Zeolite Catalysts to Produce Iso-Oleic Acid, Precursor of Isostearic Acid. Helen Ngo Lew, Jianwei Zhang, and Robert A. Moreau, USDA, ARS, Eastern Regional Research Center, USA
- 8:40 A Soybean Oil-based Adhesive and its Application for Birdseed Binding. Tao Fei, Melissa Slagle, Darren H. Jarboe, and Tong Wang, *lowa State University, USA*
- 9:00 Bioplasticizers Derived from Regular and High Oleic Soybean Oil. Lucas J. Stolp (Industrial Oil Products Student Award Winner) and Dharma R. Kodali, University of Minnesota, USA
- 9:20 Innovations in Biodiesel Production Value Chain Toward Circular Economy. Xiaofei P. Ye, University of Tennessee, USA
- 9:40 Improved Synthesis and Cost Estimates for the Production of Saturated Branched-Chain Fatty Acids from Vegetable Oils.

  Jianwei Zhang, Winnie Yee, Robert A. Moreau, and Helen Ngo Lew, USDA, ARS, Eastern Regional Research Center, USA
- 10:00 Laser-assisted Catalytic Oxidation of Glycerol over Gold Supported Catalysts. Zeinab Chehadi¹, Jean-Sébastien Girardon², Mickaël Capron³, Franck Dumeignil\*⁴, and Safi Jradi¹, ¹Laboratoire de Nanotechnologie et d'Instrumentation Optique, Institut Charles Delaunay, UMR 6281 CNRS, Université de Technologie de Troyes, France; ²Univ. Lille, CNRS, Centrale Lille, ENSCL, Univ. Artois, UMR 8181 UCCS Unité de Catalyse et Chimie du Solide; ³Univ. Lille, CNRS, Centrale Lille, ENSCL, Univ. Artois, UMR 8181 UCCS Unité de Catalyse et Chimie du Solide, France; ⁴Université de Lille, France
- 10:20 The Effect of Plant Oil-Based Monomer Structure on Properties of Latex Synthesized in Miniemulsion Polymerization. Zoriana Demchuk¹, Ananiy Kohut², Ihor Tarnavchyk¹, Stanislav Voronov², and Andriy Voronov¹, ¹North Dakota State University, USA; ²Lviv Polytechnic National University, Ukraine
- 10:40 Preparation of Mango Kernel Fat Stearin using 2-methylpentane and its Application in Heat-resistant Chocolate Fats. Jun Jin (Honored Student Award Winner), Qingzhe Jin, and Xingguo Wang, Jiangnan University, China
- 11:00 Producing Fully Renewable Medium Chain Alpha Olefins via an Integrated Biorefinery Process. Tao Dong, Wei Xiong, Jianping Yu, and Philip Pienkos, *National Renewable Energy Laboratory, USA*
- 11:20 High Linoleic Soybean Oil a New Feedstock for Industry: Alkyd Resin and Paint Example. Rick Heggs, *Oilseed Innovation Partners, Canada*

Lipid Oxidation and Quality

### LOQ 4a: Lipid Oxidation in Complex Food Products and Interactions with Ingredients

Chairs: Linhong Yao, Mondelēz International Inc., USA, USA; and Lan Ban, Kemin Food Technologies, USA; and Will Schroeder, Kemin Food Technologies, USA

### 101 H

- 7:55 Introduction.
- 8:00 **Lipid Oxidation in Fish Feed.** Ann-Dorit Moltke Sørensen, Anita Ljubic, and Charlotte Jacobsen\*, *Technical University of Denmark, Denmark*
- 8:20 The Combination of Green Tea and Rosemary Impact of System, Concentration and Ratio on Antioxidant Performance.
  Xin Tian, Nora Yang, and Poulson Joseph, Kalsec Inc., USA
- 8:40 Evaluation of Antioxidants and Antimicrobials from Plant Extracts in Pet Food. Charlotte Deyrieu<sup>1</sup>, Erwann Durand<sup>1</sup>, Nathalie Barouh<sup>1</sup>, Jerôme Lecomte<sup>2</sup>, Françoise Michel-Salaun<sup>3</sup>, Bruno Baréa<sup>1</sup>, Gilles Kergourlay<sup>3</sup>, and Pierre Villeneuve<sup>1</sup>, <sup>1</sup>CIRAD, France; <sup>2</sup>CIRAD, Greece; <sup>3</sup>Videka Diana Pet Food, France
- 9:00 Non-targeted Screening for Oxidized Lipids in Foods. Verena Grüneis<sup>1</sup>, Natasa Popovic<sup>2</sup>, Martin Zehl<sup>3</sup>, Jürgen König<sup>4</sup>, and Marc Pignitter\*<sup>1</sup>, <sup>1</sup>Dept. of Physiological Chemistry, Faculty of Chemistry, University of Vienna, Austria; <sup>2</sup>Dept. of Physiological Chemistry, Faculty of Chemistry, University of Vienna, Austria; <sup>3</sup>Dept. of Analytical Chemistry, Faculty of Chemistry, University of Vienna, Austria; <sup>4</sup>Dept. of Nutritional Sciences, Faculty of Life Sciences, University of Vienna, Austria
- 9:20 Polyphenol Shifts in Lipid Oxidation Pathways and Interactions with Proteins Alter Apparent Antioxidant Effectiveness. Karen M. Schaich¹, and Xiaosong Chen², ¹Dept. of Food Science, Rutgers University, USA; ²China Agricultural University, China

Lipid Oxidation and Quality

### EAT 4.1/LOQ 4b: Food Structuring to Reduce Lipid Oxidation

Chairs: Hong-Sik Hwang, USDA, ARS, NCAUR, USA; and Alex Kripps, Caldic USA, USA; and Yaqi Lan, South China Agricultural University, China 101 H

Joint session: for details, see EAT 4.1/LOQ 4b on page 57.

Phospholipid

### PHO 3: Developments and Applications of Novel and Modified Phospholipids

Chairs: Ernesto Hernandez, Advanced Lipid Consultants, USA; and Xuebing Xu, Wilmar Global Research and Development Center, China

#### 200 A

- 7:55 Introduction.
- 8:00 Preparation and Functional Evaluation of Antarctic Krill Lipid.
  Yuanfa Liu<sup>1</sup>, Dewei Sun<sup>2</sup>, Peirang Cao<sup>1</sup>, and Zong Meng<sup>3</sup>, <sup>1</sup>Jiangnan University, China; <sup>2</sup>School of Food Science and Technology, Jiangnan University, China; <sup>3</sup>School of Food Science and Technology, Jiangnan University, China
- 8:20 Review of Uses of Phospholipids in Delivery Systems and Bioactive Carriers Applications. Ernesto Hernandez, Advanced Lipid Consultants, USA
- 8:40 Composition and Structure of Phospholipid in Breast Milk:

  Towards Specific Interest in Infant Formula. Wei Wei¹,

  Mingdong Dong², and Xingguo Wang¹, ¹Jiangnan University, China;

  ²Interdisciplinary Nanoscience Center, Aarhus University, Denmark
- 9:00 Design of Two-layered Microcapsules of Chia Oil by Using Sunflower PC-enriched Lecithin and the LBL Technique. Luciana M. Julio¹, Claudia N. Copado¹, Vanesa Y. Ixtaina¹, Bernd W.K Diehl²,

### **thermo**scientific

## TRUST

your foods are all they should be.

Food adulteration has become an increasing problem globally, raising the urgency of testing olive oil, honey, spices, and more for purity, authenticity, and label claims. Thermo Scientific's advanced instrumentation streamlines determination of both known and unknown components. The world's top ten food and beverage companies trust us to help keep their products safe, authentic, and unadulterated—so can you.

Visit Thermo Fisher Scientific at Booth 102

Find out more at thermofisher.com/FoodIntegrity

60

- and Mabel Tomás\*1, ¹CIDCA (CONICET-UNLP), Argentina; ²Spectral Service AG, Germany
- 9:20 Low Molecular Weight Food Grade Emulsifiers including Soy Lecithins / Phosphatidylcholine Span a Wide Range of Interfacial Tensions and Interfacial Rheological Properties.

  Arnulf Schoeppe and Padmavathi Sridharan, Cargill Texturizing Solutions Deutschland GmbH & Co.KG, Germany
- 9:40 Extraction, Purification and Enzymatic Modification of Phospholipids from Antarctic Krill. Shulai Liu, Jie Hu, Kaixi Xu, Bokai Yu, and Yuting Ding, Zhejiang University of Technology, China
- 10:00 Novel Structured Phospholipids and Applications from Avocado Oil. Sara KoohiKamali and Ernesto Hernandez, Advanced Lipids Consultants, USA
- 10:20 Characterization of Novel Vegetable Lecithin and its Application in Emulsions. Xuebing Xu, Fang Cong\*, and Binbin Chen, Wilmar Global Research and Development Center, China

Processing

### PRO 4: Processing ABC — Part II

Chairs: Bruce Patsey, Oil-Dri Corporation of America, USA; and Kris Knudson, Crown Iron Works Co., USA

#### 200 F

- 7:55 Introduction.
- 8:00 The Use of Controlled Flow Cavitation to Improve the Performance of Degumming, Refining and Biodiesel Operations. Darren J. Litle<sup>1</sup>, Peter Reimers<sup>1</sup>, and Oleg Kozyuk<sup>2</sup>, <sup>1</sup>Arisdyne Systems, Inc., USA; <sup>2</sup>ASI Chief Technology Officer, Ukraine
- 8:20 **Centrifuge Equipment in Fats and Oils Processing.** William Younggreen, *Alfa Laval Inc., USA*
- 8:40 Composite Adsorbent Filter Aid for High Performance Oil Purification. Li-Chih Hu, David Gittins, and Nathan Dias, *Imerys Filtration Minerals Inc.*, USA
- 9:00 **Low Color Bodies During Bleaching Impacting Refining Cost.**Jorge Bello, *EP Engineered Clays, USA*
- 9:20 Removal of Biofuel Feedstock Trace Elements by Bleaching Clays. David Brooks and Sajo Naik, Oil-Dri Corporation of America, IISA
- 9:40 Dry Condensing System; Why all this Sudden Interest in this Technology? Sascha Wenger-Parving, GEA Process Engineering, Denmark
- 10:00 What is Your Best Deodorizer Choice? Developments in Deodorization Process. Leon Pablo Espinosa, Desmet Ballestra, USA
- 10:20 New Developments in Physical Refining and Removal of Contaminants in Edible Oils. Perry Alasti, Artisan Industries Inc., USA
- 10:40 **An Alternative Filtration in Bleaching.** Tony Dinsbach, *Filtration Group BV, The Netherlands*
- 11:00 **Glycidyl Ester Formation and Mitigation.** Linsen Liu, Stephen Lumor, and Tri Le, *IOI Loders Croklann, USA*
- 11:20 Results of Experiments to Reduce MCPD and Glycidyl Esters in Edible Fats and Oils by Ionic Liquid Treatment. Frank Pudel<sup>1</sup>, Jennifer Heymann<sup>2</sup>, and Bertrand Matthäus<sup>3</sup>, <sup>1</sup>Pilot Pflanzenöltechnologie Magdeburg e.V., Germany; <sup>2</sup>Evonik Creavis GmbH, Germany; <sup>3</sup>Max-Rubner-Institut, Germany

Protein and Co-Products

### **PCP 4: Pulse Proteins**

Chairs: Tanya Der, Pulse Canada, Canada; and Chibuike Udenigwe, University of Ottawa, Canada

### 101 C

- 7:55 Introduction.
- 8:00 **Global Market Trends for New Pulse Product Development.**Tanya Der, *Pulse Canada, Canada*
- 8:20 Cropping Location and Year Affect Protein Content and Amino Acid Score of Different Lentil Varieties. Matthew G. Nosworthy<sup>1</sup>,

- Jason Neufeld<sup>1</sup>, Tom Warkentin<sup>2</sup>, and James D. House<sup>1</sup>, <sup>1</sup>University of Manitoba, Canada; <sup>2</sup>Crop Development Centre/Dept. of Plant Sciences, University of Saskatchewan, Canada
- 8:40 Bioaccessibility of Bioactive Compounds with Dipeptidyl Peptidase-IV and α-glucosidase Inhibitory Activities in Pulses.

  Chibuike C. Udenigwe¹, Elisa Di Stefano\*¹, and Teresa Oliviero², ¹University of Ottawa, Canada; ²Wageningen University, The Netherlands
- 9:00 Functional and Sensory Characterization of Pre-treated Yellow-Eyed Beans. Marcia English, Saint Francis Xavier University, Canada
- 9:20 Pulse Ingredients as an Alternative to Soy in the Production of Meat Analog via High Moisture Extrusion Cooking. Jenni Harrington, Buhler Inc., USA
- 9:40 Break.
- 10:00 **Oleogelation using Pulse Protein-Stabilized Foam.** Athira Mohanan, Yan Ran Tang, Michael Nickerson, and Supratim Ghosh, *University of Saskatchewan, Canada*
- 10:20 Wet Fractionation of Lentil and Faba Bean for Protein Ingredient Production: Effect of Processing Factors on Ingredient Quality and Functionality. Anusha Samaranayaka<sup>1</sup>, Rick Green<sup>1</sup>, Michael Nickerson<sup>2</sup>, and Shannon Hood-Niefer<sup>3</sup>, <sup>1</sup>POS Bio-Sciences, Canada; <sup>2</sup>University of Saskatchewan, Canada; <sup>3</sup>Saskatchewan Food Industry Development Centre Inc., Canada
- 10:40 Nanoparticles Prepared from Desolvation of Pea Protein Concentrates as a Potential Stabilizer for Pickering Emulsions.
  Chi Diem Doan and Supratim Ghosh, *University of Saskatchewan, Canada*
- 11:00 Effect of the Carriers on the Microstructure and Functionality of Spray Dried Pea Protein Isolate. Yang Lan and Jiajia Rao, North Dakota State University, USA
- 11:20 Reformulating Cereal-based Foods with Pulses: Effect on Nutrient Density and Environmental Sustainability. Christopher Marinangeli, *Pulse Canada, Canada*
- 11:40 Panel Discussion: Current Trends and Future Direction of Pulse Research and Development.

Surfactants and Detergents

### **BIO 4.1/S&D 4: Biosurfactants and Additives**

Chairs: Daniel K.Y. Solaiman, USDA, ARS, ERRC, USA; and George A. Smith, Sasol North America, USA

200 C

Joint session: for details, see BIO 4.1/S&D 4 on page 56.

### WEDNESDAY AFTERNOON

Analytical

### **ANA 5: Marine Oils and Other Products**

Chairs: Cynthia Srigley, US Food and Drug Administration, USA; and Adam Ismail, Global Organization for EPA and DHA Omega-3s, USA

#### 101 6

- 1:55 Introduction.
- 2:00 Oxidative Status and Nutrient Label Claim Accuracy of the Top 50 Selling Omega-3 Products in the US. Adam Ismail, Global Organization for EPA and DHA Omega-3s, USA
- 2:20 **Sensory Vocabulary for Marine Omega-3 Oils.** Wenche Emblem Larssen, *Møreforsking, Norway*
- 2:40 An Examination of Marine and Vegetable Oil Oxidation Data from a Multi-Year, Third-Party Database. Anna A. De Boer¹, Adam Ismail², Keri Marshall³, Gerard Bannenberg¹, Kevin L. Yan¹, and William J. Rowe¹, ¹Nutrasource, Canada; ²Global Organization for EPA and DHA Omega-3s, USA; ³DSM Nutritional Products, USA
- 3:00 Chemical Changes During the Acute Oxidations of Fish Oils. Austin S. Phung<sup>1</sup>, Selina C. Wang<sup>1</sup>, Adam Ismail<sup>2</sup>, Gerard

- Bannenberg<sup>2</sup>, and Ameer Taha<sup>3</sup>, <sup>1</sup>University of California-Davis, Olive Center, USA; <sup>2</sup>Global Organization for EPA and DHA Omega-3s, USA; <sup>3</sup>University of California, Davis, USA
- 3:20 Compositional Analysis of Algal Biomass, an Emphasis of Unique Contribution of Algal Lipids. Lieve Laurens, National Renewable Energy Laboratory, USA
- 3:40 Sterol Fingerprinting in Algae, a New Method for a New Feedstock. Stefanie Van Wychen, and Lieve Laurens\*, National Renewable Energy Laboratory, USA
- 4:00 Analysis of Omega-3 Polyunsaturated Fatty Acids (PUFA) in Phospholipid Oils: A Design of Experiment Approach for Method Optimization. Cynthia Srigley and Isa C. Orr-Tokle, *US Food and Drug Administration, USA*
- 4:20 Evaluation of an Ultra Inert WAX-phase Column for the Analysis of Fatty Acids and FAMEs. Gustavo Serrano Izaguire, Allen Vickers, Yun Zou, and Daron Decker, Agilent, USA
- 4:40 **Trans-fat Determination by Gas Chromatography Vacuum Ultraviolet Detection.** Jonathan Smuts¹ and Barbara A. Mitchell², ¹VUV Analytics, USA; ²Covance Labs, Inc., USA

Biotechnology

### **BIO 5: General Biotechnology**

Chairs: Long Zou, Bunge Creative Solutions Center, USA; Lu-Kwang Ju, University of Akron, USA; and Guoqin Liu, South China University of Technology, China

#### 200 I

- 1:55 Introduction.
- 2:00 Comparison of Three Methods for Analyses of Triacylglycerols in Cocoa Butter Alternatives. Jun Jin (*Lipid Processing and Biotechnology Award Winner*), Qingzhe Jin, and Xingguo Wang, *Jiangnan University, China*

- 2:20 Enzymatic Processing Methods to Reduce Saturated Fat Content of Oils. Matthew A. Robinson, *Dow AgroSciences, USA*
- 2:40 Optimizing Oil Production by Mucor circinelloides using Cheese Whey Permeate. Juliana M. Leite Nobrega de Moura Bell, Lauryn Chan, Josh Cohen, Gulustan Ozturk, Marie Hennebelle, and Ameer Taha, University of California, Davis, USA
- 3:00 Effect of Interesterification on the Physicochemical Profiles of Rice Bran Wax-based Modified Fats. Zhen Zhang¹, Huihua Huang², and Yong Wang³, ¹South China University of Technology, China; ²School of Food Science and Engineering, South China University of Technology, China; ³Jinan University, China
- 3:20 Substrate Preference of Long Chain acyl-CoA Synthetase for Hydroxy-Fatty Acids. Jesse D. Bengtsson and John Browse, Washington State University, USA
- 3:40 Effective Enrichment of Palmitoleic Acid from Seabuckthorn Oil by Combining Different Methods. Nakyung Choi¹, Ju Yeon Chung¹, Heejin Kim³, and In-Hwan Kim¹, ¹Korea University, Republic of Korea; ²Dept. of Public Health Sciences, Graduate School, Korea University, Republic of Korea
- 4:00 Synthesis of 2-docosahexaenoylglycerol by Enzymatic Ethanolysis. Yu Zhang, Xiaosan Wang, Shuo Zou, Qingzhe Jin, and Xingguo Wang, *Jiangnan University, China*
- 4:20 Preparation of Diisononyl Adipate via Lipase-catalyzed Esterification in a Solvent-free System. Aree Lee<sup>1</sup>, Heejin Kim<sup>2</sup>, and In-Hwan Kim<sup>1</sup>, <sup>1</sup>Korea University, Republic of Korea; <sup>2</sup>Dept. of Public Health Sciences, Graduate School, Korea University, Republic of Korea

### FIND THE RIGHT VACUUM PUMP

for Applications from Deoderization to Distillation

### Durable, Easy-to-Use Vacuum Pumps, Gauges, & Controls

- ✓ Low maintenance vacuum pumps— 15,000 hour service intervals
- ✓ Dry, chemical-resistant design for demanding conditions
- ✓ Advanced controls for process automation and scale-up
- ✓ Easy integration with reactors and other systems

## Stratas Foods RDI Center's Pilot Plant & Analytical Services

### TAKE ADVANTAGE OF OUR EXPERTISE

For over a century, Stratas Foods has pioneered the production and improvement of edible oils; it is what we do, and the focus of our energies. Our dedication to product excellence and consistency has led us to invest extensive time and resources in creating the most versatile and innovative facilities in the industry. These unmatched analytical and technical capabilities are available for your use.

By outsourcing your company's testing and development needs, you reap the benefits of our equipment and experiences; lower costs, faster turnaround, and the guaranteed highest standards in testing and production.

### ANALYTICAL TESTING BY THE INDUSTRY LEADER

Stratas Foods produces edible oils for the foodservice, food processor and retail food industries. These products are scrutinized at every stage of production by our highly trained staff of chemists

and technicians, utilizing the world's foremost technologies and methods. Our firm dedication to quality control demands analytical precision day after day.

### PILOT PLANT SERVICES BY PRODUCTION PIONEERS

Since 1994, the Stratas Foods Pilot Plant has offered cutting edge food processing in oils. Skilled technicians in this 38,000 square foot facility formulate customized samples of oils and emulsifiers on a cost-effective outsource basis, and in bench-top, drum, box, or bag quantities.

Stratas Foods RDI Center 7970 Stage Hills Blvd. Bartlett, TN 38133

In addition to routine fats and oils analysis, Stratas Foods is qualified to handle:

- Oil Stability Index (OSI)
- Mettler Drop Point
- SFC by NMR
- SFI
- DSC Analysis
- Trans FA by FT-NIR & GC

### Pilot Plant capabilities:

- Refining
- Bleaching
- Deodorizing
- Hydrogenating
- Votating
- Chemical Interesterification

# Chemists find AOCS proficiency program and Approved Chemist status build customer confidence

Quantifying customer confidence can be as challenging as quantifying materials in a sample. Customers look to certifications and awards as measures of a laboratory's quality.

That was how Claire Traynor, Head of Mylnefield Lipid Analysis of James Hutton Limited, and her lab became involved with the AOCS Laboratory Proficiency Program (LPP). Traynor originally enrolled her lab in the GOED Nutraceutical Oils Series at the request of a customer. Participating in the LPP series has allowed them to build customer confidence and better understand how their results compare to their peers.

"Taking part in the program helps us to determine how our laboratory compares to other laboratories, and we were especially pleased to receive First Place in the 2016–17 LPP. This was a great boost for my analysts, especially those performing the analysis, but also confirms the quality of the work that we undertake for our customers is to a very high standard," according to Traynor.

Each year, AOCS publishes a list of LPP Award Winners as part of the Society's commitment to recognize the expertise and dedication to quality of chemists in the program. The list consists of analysts who have scored in the top 10% of each series. The recognition is important both

inside and outside of the lab for Traynor and her analysts.

"Taking part in such programs is important as part of our commitment to quality, and it gives our customers extra confidence in their results."

In addition, AOCS recognizes the analytical excellence of individual chemists with Approved Chemist status. Earning Approved Chemist status allows chemists to use the Approved Chemist logo to advertise their expertise. To earn it, chemists must achieve a precise score in four consecutive quarters as an LPP participant (July 1, October 1, January 1 and April 1), return results for all samples, report results for all required constituents and be an AOCS member.

Rudy Fulawka, a Seed Chemist with Bayer CropScience, has been an AOCS Approved Chemist in gas chromatography for 17 years. He uses AOCS methods to identify and quantify tocopherols and glucosinolates in canola seeds and to determine the fatty acid profile of the oil.

According to Fulawka, he is a competitive person, but lab work doesn't offer many opportunities to compete.

Earning Approved Chemist status gives him a standard to shoot for and an outlet for his competitive nature. It looks good on his curriculum vitae and to customers.

"AOCS Approved Chemist status gives clients confidence in my results."

Full-year LPP participants are eligible to apply for the Approved Chemist program. AOCS Approved Chemists are in high demand, and are highly respected throughout the industry. Use your status as an AOCS Approved Chemist to promote your technical expertise and attract new business – apply today!

Biotechnology Processing

### **ANA-P: Analytical Poster Session**

Chair: Diliara Iassonova. Cargill. USA

### Hall B

- Purification of Native Cyanogenic Glycosides from Flaxseed. Veronique J. Barthet and Tao Fan, Canadian Grain Commission, Canada
- Crystalline Pattern of Phytosterols in High Oleic Sunflower Oil for Food Applications. Mayanny G. Silva, Valéria S. Santos, Lisandro P. Cardoso, Maria Helena A. Santana, and Ana Paula B. Ribeiro, *University of Campinas*. Brazil
- 3. Thermal Properties and Solid Profiles of Hardfats-Soybean Oil Blends for Formulation of Lipid Carriers. Mayanny G. Silva and Ana Paula B. Ribeiro, *University of Campinas, Brazil*
- Comparative Recovery Analysis of Conjugated Linoleic Acids (CLA) Following Different Methylation Protocols. Yiyi Li, Raad S. Gitan, Deborah L. Chance, James K. Waters, and Thomas P. Mawhinney, University of Missouri, USA
- 1H-NMR Measurement of Polar Phenolic Compounds: Reliable Determination of the Geographical Origin of Olive Oils. Torben Küchler and Ole Winkelmann, Eurofins Analytik GmbH, Germany
- Using GC-MS and Helium to Resolve Positional Isomers of trans-C16:1 and trans-C18:1 Fatty Acids. Etienne Guillocheau, Daniel Catheline, Philippe Legrand, and Vincent Rioux, Agrocampus-Ouest. France
- 7. A Microscopy Study of the Structure of Njangsa and Other Selected Seeds: Method Development. Benjamain M. Bougouneau<sup>1</sup>, Michael Moore<sup>2</sup>, Samuel A. Besong<sup>3</sup>, and Alberta N.A. Aryee<sup>4</sup>, <sup>1</sup>Dept. of Human Ecology, Delaware State University, USA; <sup>2</sup>Optical Center for Applied Research, Dept. of Physics and Engineering, Delaware State University, USA; <sup>3</sup>Dept. of Human Ecology, College of Agricultural Sciences, Delaware State University, USA; <sup>4</sup>Delaware State University, USA

- 8. The LC-UV Analysis of 16 Cannabinoids of Interest in Commercially Available CBD Oils. Joseph D. Konschnik, Justin A. Steimling, and Ashlee M. Reese, *Restek Corporation, USA*
- 9. Rapid Measuring and Modelling Total Polar Compounds in Frying Oils using a Flash Gas Chromatography Electronic Nose. Lirong Xu<sup>1</sup>, Li Xu<sup>2</sup>, Qingzhe Jin<sup>3</sup>, and Xingguo Wang<sup>3</sup>, <sup>1</sup>Jiangnan University, China; <sup>2</sup>School of Food Science and Technology, Jiangnan University, China; <sup>3</sup>Jiangnan University, China
- Electron Paramagnetic Resonance Spectroscopy Study of Milk Fat Globule Membrane Dynamics during Simulated Digestion. Maha Alshehab, Madhu S. Budamagunta, John C. Voss, and Nitin Nitin, University of California, Davis, USA
- 11. Infrared Spectroscopy and PLS Procedures for the Rapid Prediction of EPA and DHA Contents in Marine Oil Dietary Supplements. Sanjeewa R. Karunathilaka, Cynthia Srigley, Betsy J. Yakes, Sung Hwan Choi, Lea Brückne<sup>1</sup>, and Magdi Mossob<sup>1</sup>, <sup>1</sup>US Food and Drug Administration, USA
- Applying High Speed Gas Chromatography for the Speciation of Fats in Foods and Edible Oils. Joseph D. Konschnik, Colton Myers, Kristi Sellers, and Scott Adams, RESTEK Corporation, USA
- 13. Buffer Optimization for Accelerated SDS Depletion by Transmembrane Electrophoresis in Top-down Proteomic Workflows. Subin R. C. K. Rajendran¹ (Analytical Student Award Winner), Khaldun Al Azzam², Nicole Unterlander¹, and Alan Doucette¹, ¹Dept. of Chemistry, Dalhousie University, Canada; ²Al-Ghad International College for Applied Medical Sciences, Saudi Arabia
- Isolation and Identification of Stearidonic Acid Geometric Isomers.
   Pierluigi Delmonte, Andrea Milani, U.S. Food and Drug Administration, Center for Food Safety and Applied Nutrition, USA
- 15. A Method for Analyzing TAGs Composition of Human Milk Fat using UPC2-Q-TOF-MS. Xinghe Zhang¹ and Guanjun Tao², ¹School of Food Science and Technology, Jiangnan University, China; ²State Key Laboratory of Food Science and Technology, School of Food Science and Technology, Jiangnan University. China
- The Rapid Analysis of Terpenes in Cannabis. Ron R. Honnold, Aailent, USA
- 17. HPTLC with Tandem MS and HR-MS for Structural Identification in Lipidomic and Other Complex Lipid Samples. Vicente L. Cebolla¹, María P. Lapieza², Luis Membrado¹, Maria Savirón³, Jesus Orduna⁴, and Judith Nichols\*5, ¹Instituto de Carboquimica/CSIC; ²Instituto de Carboquimica/CSIC, Spain; ³CEQMA/CSIC, Spain; ⁴ICMA / CSIC; ⁵CAMAG Scientific, Inc., USA
- Identification of Degradation Products after Subcritical Water Hydrolysis of Hemp Oil using GC-MS and FTIR-ATR. Andres F.

#AOCS2018

- Aldana Rico<sup>1</sup>, Ruben O. Morawicki<sup>1</sup>, Jerry W. King<sup>2</sup>, Rohana Liyanage<sup>2</sup>, Chris Mazzanti<sup>1</sup>, Marco E. Sanjuan Mejia<sup>1</sup>, and Antonio J. Bula Silvera<sup>1</sup>, *<sup>1</sup>Universidad del Norte, Colombia*; *<sup>2</sup>Critical Fluid Symposia, USA*
- Analysis of Heavy Metal Concentrations and Human Exposure from Hemp Oils and Hemp Products. Patricia Atkins and Sean Curran, SPEX CertiPrep, USA
- Fatty Acid Analysis with Applied Retention Time Locking. Barbara A. Mitchell, Scott Wejrowski\*, Youa Herr, and Thomas Vennard, Covance Labs. Inc., USA
- 21. **Analysis of Vitamin D and Previtamin D in Food Products.** Jinchuan Yang, *Waters, USA*
- 22. Unique GC Column Selectivity for Time and Cost-efficient Separation of Complex cis/trans Fatty Acid Methyl Esters in Food. Ramkumar Dhandapani, *Phenomenex*, USA
- 23. New Method for Fast and Straightforward Determination of Oxidation Stability of Fats and Oils. Carolin Edinger, Anton Paar ProveTec GmbH, Germany
- 24. FET Analysis of Solvents in Cannabis Oil: Adapting to Changing Regulations. Amanda Rigdon<sup>1</sup>, Anne Jurek<sup>2</sup>, Julie Kowalski<sup>3</sup>, and Frank Dorman<sup>4</sup>, <sup>1</sup>Emerald Scientific, USA; <sup>2</sup>EST Analytical, USA; <sup>3</sup>Trace Analytics, USA; <sup>4</sup>Pennsylvania State University, USA
- 25. Fast Simultaneous Determination of Capsaicin, Dihydrocapsaicin and Nonivamide for Adulteration in Edible and Crude Vegetable Oils Coupled with UPLC-MS/MS. Chuan Zhou, Dianping Ma, Wen Ming Cao, Hai Ming Shi, and Yuan Rong Jiang, Wilmar Biotechnology Research & Development Center (Shanghai) Co., Ltd., China, China
- 26. Determination Polycyclic Aromatic Hydrocarbons in Tocopherol and Ether Compound by Gas Chromatography Tandem Mass Spectral. Tong Li, Ruifeng Zhang, Chuan Zhou, Hong Yang, Wen Ming Cao, and Yuan Rong Jiang, Wilmar Biotechnology Research & Development Center (Shanghai) Co., Ltd., China
- 27. A Primary Animal Fat Adulteration Application: Determination Branched Chain Fatty Acid in Beef and Mutton Tallow with GC-Q-TOF & GC-FID and Evaluation. Tong Li, Peijin Tong, Hong Yang, Wen Ming Cao, and Yuan Rong Jiang, Wilmar Biotechnology R&D Center (Shanghai) Co., Ltd., China
- 28. A Novel Method for Quantitative Analysis of Blend Oil Based on GC-FID and NPDA. Peijin Tong, Hong Yang, Wei Ting Ting, Tong Li, Wen Ming Cao, and Yuan Rong Jiang, Wilmar Biotechnology R&D Center (Shanghai) Co., Ltd., China

### **BIO-P: Biotechnology Poster Session**

Chairs: Byung Hee Kim, Sookmyung Women's University, Korea; and Shigenobu Kishino, Kyoto University, Japan

### Hall B

- Isoflavone Phosphate Synthetase from Bacillus subtilis BCRC80517. Chen Hsu¹ (Biotechnology Student Award Winner) and Nan-Wei Su², ¹National Taiwan University, Dept. of Agricultural Chemistry, Taiwan; ²National Taiwan University, Taiwan
- Fungal Fermentation of De-Hulled Ground Barley to Increase Protein Levels. Burgandy R. Roberts<sup>1</sup>, Bishnu Karki<sup>2</sup>, Jacob Zahler<sup>1</sup>, Michael Brown<sup>3</sup>, and William Gibbons<sup>1</sup>, <sup>1</sup>South Dakota State University, USA; <sup>2</sup>Dept. of Biology and Microbiology, South Dakota State University, USA; <sup>3</sup>Dept. of Natural Resource Management, South Dakota State University, USA
- 3. Optimization of Fungal Stimulation and Processing Parameters to Maximize Glyceollin Production in Soybeans. Stephanie A. Wootton<sup>1</sup>, Bishnu Karki<sup>2</sup>, Mark Berhow<sup>3</sup>, and William Gibbons<sup>1</sup>, <sup>1</sup>South Dakota State University, USA; <sup>2</sup>Dept. of Biology and Microbiology, South Dakota State University, USA; <sup>3</sup>USDA National Center for Agricultural Utilization Research, USA
- 4. An Integrated Multi-omics Study on Lipid Turnover of Schizochytrium sp. S31 Cultured on Glycerol. Ming Chang, Tao Zhang, Ruijie Liu, Qingzhe Jin, and Xingguo Wang, *Jiangnan University, China*

- An Effective Method for Deacidification of High-acid Rice Bran Oil by Enzymatic Amidation. Xingguo Wang and Xiaosan Wang\*, Jiangnan University, China
- 6. Dendritic Nanomolecules as Drug Carriers: Solublization, Sustained Release and Biocompatibility Study. Ravindra V. Movliya and Pravinkumar M. Patel, V. P. &. R. P. T. P. Sc. College, India
- Sequential Liquefaction of Nicotiana tabacum Stems Biomass by Crude Polyhydric Alcohols for the Production of Polyols and Rigid Polyurethane Foams. Chiragkumar M. Patel, Industrial Chemistry Dept., V. P. & R. P. T. P. Science College, India

### **EAT-P: Edible Applications Technology Poster Session**

Chair: Supratim Ghosh, University of Saskatchewan, Canada

#### Hall B

- 1. Influence of Dairy Emulsifier Type and Droplet Size on Gastrointestinal Fate of Corn Oil Emulsion: In vitro Digestion.
  Li Liang¹, Xingguo Wang², Qingzhe Jin², and D. Julian McClements³, ¹State Key Laboratory of Food Science and Technology, School of Food Science and Technology, Jiangnan University, China; ³Jiangnan University, China; ³University of Massachusetts Amherst, USA
- 2. **X-ray Study on Melt Crystallization Kinetics of Triacylglyceride Molecular Compound System.** Ken Taguchi¹, Ryuichi Ikoma², Akihiko Toda², Hironori Hondoh³, Satoru Ueno³, and Kiyotaka Sato², ¹*Graduate School of Integrated Arts and Sciences, Hiroshima University, Japan; ³Graduate School of Biosphere Science, Hiroshima University, Japan*
- Cocoa Butter Substitute Produced by Enzymatic Interesterification of Binary Blends Containing Irvingia gabonensis Seed Fat. Sabine Danthine<sup>1</sup>, Juste Yamoneka Wasso<sup>1</sup>, Paul Malumba<sup>1</sup>, Georges Lognay<sup>2</sup>, and Christophe Blecker<sup>2</sup>, <sup>1</sup>University of Liège, Belgium; <sup>2</sup>University of Liège, Belize
- Electrostatic Deposition of Chitosan on Lecithin Stabilized Emulsion Inhibits Mycotoxin Production in Fusarium graminearum.
   Dianhui Wu¹, Jiajia Rao¹, and Jian Lu², ¹North Dakota State University, USA; ²School of Biotechnology, Jiangnan University, China
- Extraction of Carotenoids and Antioxidant Compounds from Guava Processing Waste. Renan S. Lima<sup>1</sup>, Itaciara L. Nunes, Sandra Regina S. Ferreira<sup>2</sup>, and Jane Mara Block\*<sup>3</sup>, <sup>1</sup>Federal University of Santa Catarina, Brazil; <sup>2</sup>Federal University of Santa Catarina, Brazil; <sup>3</sup>UFSC, Brazil
- Profile of Volatile Compounds of Dark Chocolate Formulated with Cocoa Butter Equivalent. Cristiano S. Souza, and Jane Mara Block\*, UFSC. Brazi
- 7. Characterization of Soybean Oil Organogels Structured with Candelilla Wax and Monoglycerides. Natalia Martinez<sup>1</sup>, Natani Amaro<sup>2</sup>, Thaís Jordânia<sup>2</sup>, Gabriel D. Fernandes<sup>3</sup>, Bruno Irigaray<sup>1</sup>, Iván Jachmanián\*<sup>1</sup>, and Daniel Barrera-Arellano<sup>2</sup>, <sup>1</sup>UdelaR, Uruguay; <sup>2</sup>Laboratorio de óleos e gorduras, FEA, UNICAMP, Brazil; <sup>3</sup>Fats and Oils Laboratory. School of Food Engineering. UNICAMP. Brazil
- Filler-matrix Interactions to Control Texture of Oil-continuous Systems. Auke de Vries and Dérick Rousseau, Ryerson University, Canada
- Structural and Mechanical Properties of Palm Oil in the Presence of Air and Sugar. Dérick Rousseau and Hardeep Devgan\*, Ryerson University, Canada
- Fat-sugar Interactions Measured by Force Spectroscopy. Dérick Rousseau, and Nicole Green\*, Ryerson University, Canada
- 11. Tailoring Crystalline Structure using High Intensity Ultrasound to Reduce Oil Migration. Silvana Martini<sup>1</sup>, Zachary Cooper<sup>1</sup>, Juhee Lee<sup>1</sup>, and Véronique Gibon<sup>2</sup>, <sup>1</sup>Utah State University, USA; <sup>2</sup>Desmet Ballestra Group. Belgium
- 12. **Sonocrystallization of a Tristearin-free Fat.** Jeta V. Kadamne<sup>1</sup>, Maria A. Moore<sup>2</sup>, Casimir C. Akoh<sup>2</sup>, and Silvana Martini<sup>\*1</sup>, <sup>1</sup>Utah State University, USA; <sup>2</sup>University of Georgia, USA
- 13. Lipid Composition and Antioxidant Property of Sea Buckthorn Oils

- Extracted by Supercritical and Subcritical Technologies. Li Zheng¹, Longkai Shi¹, Zhao Chenwei², Qingzhe Jin¹, and Xingguo Wang¹, ¹Jiangnan University, China; ²State Key Laboratory of Food Science and Technology, School of Food Science and Technology, Jiangnan University, China
- 14. Chemical Characterization and Antioxidant Capacity of Sesame Oils Extracted by Supercritical, Subcritical and Conventional Techniques. Longkai Shi, Li Zheng, Ruijie Liu, Ming Chang, Qingzhe Jin, and Xinqquo Wang, Jiangnan University, China
- Control of Protein Digestion under Simulated Gastrointestinal Conditions using Biopolymer Microgels. Ruojie Zhang, Zipei Zhang, and D. Julian McClements, University of Massachusetts Amherst, USA
- 16. Physicochemical, Functional and Sensory Properties of Margarine Supplemented with Bush Mango Kernel and Njangsa Seed Oils. Anh T.L Nguyen¹, Peace C. Asuzu², Benjamain M. Bougouneau³, Samuel A. Besong⁴, and Alberta N.A. Aryee\*¹, ¹Delaware State University, USA; ²College of Agriculture & Related Sciences, Delaware State University, USA; ³Dept. of Human Ecology, Delaware State University, USA; ⁴Dept. of Human Ecology, College of Agricultural Sciences, Delaware State University, USA

### **H&N-P: Health and Nutrition Poster Session**

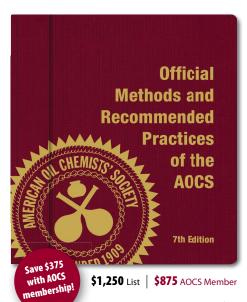

Chairs: Ignacio Vieitez, UdelaR, Uruguay; and Varun Koneru, Young Living Essential Oils, USA

### Hall B

Evaluation of Intestinal Absorption of Dietary Sphingolipids.
 Yui Tomo¹, Nami Tomonaga¹, Yuki Manabe¹, Akinori Ando², Tsuyoshi Tsuduki³, Jun Ogawa², and Tatsuya Sugawara\*⁴, ¹Kyoto University, Japan; ²Div. Appl. Life Sci., Grad. Sch. Agric., Kyoto University, Japan; ³Tohoku University, Japan; ⁴Laboratory of Marine Bioproduct of Technology, Division of Applied Bioscience, Japan

- 2. The Protective Role of Lcn2 Against Intestinal Inflammation and Gut Microbiota Dysbiosis in HFD-Induced Obesity. Xiaoxue Qiu¹, Marissa Macchietto², Trevor Gould³, Steven Shen², and Xiaoli Chen⁴, ¹University of Minnesota, Twin Cities, USA; ²Clinical Translational Science Institute, University of Minnesota-Twin Cities, USA; ³Informatics Institute, University of Minnesota-Twin Cities, USA; ⁴Dept. of Food Science and Nutrition, University of Minnesota-Twin Cities, USA
- 3. Black Bean Flour Properties after Steam Jet-cooking: A Comparative Study as Affected by pH. James A. Kenar<sup>1</sup>, Jill Moser<sup>1</sup>, Frederick C. Felker<sup>1</sup>, Mukti Singh<sup>2</sup>, and Sean Liu<sup>3</sup>, <sup>1</sup>USDA, ARS, NCAUR, USA; <sup>2</sup>NCAUR-ARS-USDA, USA; <sup>3</sup>USDA, ARS, USA
- 4. Dietary Fat Influences the Composition of Bacteria and its Metabolites in Cecum of Rat. Ryota Hosomi¹, Anna Matsudo¹, Takaki Shimono², Seiji Kanda², Toshimasa Nishiyama², Munehiro Yoshida², and Kenji Fukunaga³, ¹Kansai University, Japan; ²Kansai Medical University, Japan; ³Faculty of Chemistry, Materials and Bioengineering, Kansai University, Japan
- Edible Hydrogel Beads Fabrication with Self-regulating Microclimate pH Properties: Retention of Enzyme Activity After Exposure to Gastric Conditions. Zipei Zhang and D. Julian McClements, University of Massachusetts Amherst, USA
- Virgin Grape Seed Oil Attenuates High-fat Diet-induced Obesity and Insulin Resistance. Hui Zhang and Gangcheng Wu, Jiangnan University, China
- 7. Effect of Noodle Formulation and Frying Medium on Oil Absorption in Steamed-and-Fried Instant Noodles. Jinfeng Qi¹, and Xingguo Wang², ¹Jiangsu University of Science and Technology, Jiangnan University, China; ²Jiangnan University, China
- 8. Endocannabinoid Metabolome in Human Breast Milk A Guatemalan Cohort. Adriana V. Gaitan<sup>1</sup>, Jodi T. Wood<sup>2</sup>, Lipin Ji <sup>3</sup>, Yingpeng Liu<sup>3</sup>, Spyros P. Nikas<sup>4</sup>, Juliana A. Donohue<sup>5</sup>, Lindsay Allen<sup>6</sup>, Noel W. Solomons<sup>7</sup>, Alexandros Makriyannis<sup>3</sup>, and Carol J. Lammi-

### **Ensure your AOCS methods are always up to date!**

The 7th Edition was revised by academic, corporate and government experts to ensure the most technically accurate methods are presented. Reviewers harmonized the methods with other leading scientific organizations, including AOAC International, AACC International, FOSFA International, IOC and ISO. Procedures were updated to include new apparatus, equipment and supplier information, including current locations, mergers and business closures. The 7th Edition includes all additions and revisions of the 6th Edition.

#### **New Features**

- **Brand-new layout** is an easier-to-read format with more clearly defined sections.
- Meets ACS style standards to ensure essential technical and scientific information is presented in a consistent, clear and scientifically sound manner.
- ▶ **Method titles updated** to be more descriptive and informative.

Email orders@aocs.org | Call +1 217-693-4803 | Order online at aocs.org/methods7ed

**Setting the Standard** | Since the 1920s, the global fats and oils industry has relied on the analytical integrity of the *Official Methods and Recommended Practices of the AOCS*. AOCS has set the standard for analytical methods critical to processing, trading, utilizing, and evaluating fats, oils, lipid products and proteins. Worldwide acceptance has made the *AOCS Methods* a requirement wherever fats and oils are analyzed.

- Keefe<sup>8</sup>, <sup>1</sup>Louisiana State University, USA; <sup>2</sup>Center for Drug Discovery, Northeastern University, USA; 3 Center for Drug Discovery, Northeastern University, USA; 4Center for Drug Discovery, Northeastern University; <sup>5</sup>Nestlé Institute of Health Sciences, Switzerland; <sup>6</sup>University of California, Davis, USA; 7Center for the Studies of Sensory Impairment, Aging and Metabolism, Guatemala; 8Agricultural Center, Louisiana State University, USA
- 9. Dietary Intakes of n-3 and n-6 Polyunsaturated Fatty Acids in Preschool-aged Children in the Guelph Family Health Study. Jessie L. Burns (née MacKinnon), Julia A. Mirotta, Alison M. Duncan, Jess Haines, and David W.L. Ma, University of Guelph, Canada
- 10. Potential Bioactivity of Phenolics in Hulls and Dehulled Grains of Lentils; Focusing on the Inhibitory Activity Against the Oxidation of LDL Cholesterol and Supercoiled DNA Strand. Fereidoon Shahidi and JuDong Yeo\* (Honored Student Award Winner), Memorial University of Newfoundland, Canada
- 11. Investigation of Bioactive Lipids from African Medicinal Plants Collected in the Tropical Rainforests of Uganda. Fabien Schultz<sup>1</sup>, Godwin Anywar<sup>2</sup>, Ogechi Favour Osuji<sup>3</sup>, Anh Nguyen<sup>3</sup>, Luc Pieters<sup>4</sup>, and Leif-Alexander Garbe<sup>5</sup>, <sup>1</sup>Technical University of Berlin, Neubrandenburg University of Applied Sciences, Germany; 2Makerere University, Uganda; <sup>3</sup>Applied Chemistry, School of Agriculture and Food Sciences, Neubrandenburg University of Applied Sciences, Germany; <sup>4</sup>Dept. of Pharmaceutical Sciences, University of Antwerp, Belgium; <sup>5</sup>Neubrandenburg University of Applied Sciences, Germany
- 12. Different Effects of Squalene on Lipid Metabolism in Livers of KK-Ay and C57BL/6 Mice. Shaokai Liu<sup>1</sup>, Masashi Hosokawa<sup>2</sup>, and Kazuo Miyashita<sup>2</sup>, <sup>1</sup> Graduate School of Fisheries Sciences, Hokkaido University, Japan; 2Hokkaido University, Japan
- 13. Study on the Effect of Activated Carbon with Bleaching Earth in Reduction of Polycyclic Aromatic Hydrocarbons in Soybean Oil. Nilufar Aliar Zanjani<sup>1</sup>, Zahra Piravi Vanak<sup>2</sup>, and Mehrdad Ghavami<sup>1</sup>, <sup>1</sup>Islamic Azad University, Science and Research Branch, Tehran, Iran; <sup>2</sup>Standard Research Institute of Iran, Faculty of Food Industries and Agriculture, Iran
- 14. Antioxidant Capacity of Mango Kernels: a Comparative Study. Anh T.L. Nguyen<sup>1</sup>, Samuel A. Besong<sup>2</sup>, and Alberta N.A. Aryee\*<sup>1</sup>, <sup>1</sup>Delaware State University, USA; <sup>2</sup>Dept. of Human Ecology, College of Agricultural Sciences, Delaware State University, USA
- 15. Storage Stability of Palm-based Vitamin E (tocotrienol-rich fraction) in Functional Granola Bar. Noor Lida Habi Mat Dian<sup>1</sup>, Wan Suet Ying<sup>1</sup>, Fu Ju Yen<sup>1</sup>, Miskandar Mat Sahri<sup>1</sup>, and Lai Oi Ming<sup>2</sup>, <sup>1</sup>Malaysian Palm Oil Board, Malaysia; <sup>2</sup>Universiti Putra Malaysia, Malaysia
- 16. A New Dietary Source of Branched Fat from Fermented Asian Foods. Dong Hao Wang<sup>1</sup>, Yupeng Yang<sup>1</sup>, Zhen Wang<sup>1,2</sup>, Peter Lawrence<sup>1</sup>, Randy W. Worobo<sup>1</sup>, and James T. Brenna<sup>2</sup>, <sup>1</sup>Cornell University, USA; <sup>2</sup>University of Texas at Austin, USA

### **IOP-P: Industrial Oil Products Poster Session**

Chair: Jerry W. King, Critical Fluid Symposia, USA

### Hall B

- Polyol and Polyurethane Prepared from Rubber Seed Oil by Hydroformylation. Jian Hong<sup>1</sup>, Xiao-Qin Yang<sup>2</sup>, Xianmei Wan<sup>3</sup>, Zhifeng Zheng<sup>2</sup>, and Zoran Petrovic<sup>3</sup>, <sup>1</sup>Kansas Polymer Research Center, Pittsburg State University, USA; 2Southwest Forestry University, China; <sup>3</sup>Pittsburg State Univeristy, USA
- 2. An Emerging Natural Wax: Sorghum Wax from Bioethanol **Production.** Jeffrey T. Cafmeyer, *Battelle, USA*
- 3. Soy-based Polyester Polyols for Flexible Polyurethane Foams and Elastomers. Dragana Radojcic and Mihail Ionescu, Pittsburg State University, USA
- 4. Algal Oil Derived Polyurethane Foams. Olivera Bilic<sup>1</sup>, Zoran Petrovic<sup>2</sup>, Ivan Javni<sup>2</sup>, Milica Lovric<sup>2</sup>, and Scott Franklin<sup>3</sup>, <sup>1</sup>Kansas Polymer Research Center/PSU, USA; <sup>2</sup>Pittsburg State University, USA; <sup>3</sup>Checkerspot, Inc., USA

- 5. Study of Physical and Tribology Properties of Soybean Oil-based Grease Formulated with Polysoap. Zengshe Liu<sup>1</sup>, Girma Biresaw<sup>1</sup>, Atanu Biswas<sup>1</sup>, and H.N. Cheng<sup>2</sup>, <sup>1</sup>Food and Industrial Oil Research, NCAUR, ARS/USDA, USA; 2SRRC/ARS/USDA, USA
- 6. Copolymers from Photochemical Thiol-ene Polycondensation of Fatty Dienes with Alkyl Dithiols. Bryan R. Moser, USDA Agricultural Research Service, USA
- 7. Chemometric Comparison of Neutral Lipids in Camellia Oil with Other Cooking oils. Ling Peng, Chi Chen, and Yiwei Ma, University of Minnesota, USA
- 8. Two-Step Temperature Extraction for the Separation of Waxes and Oil in Sorghum Bran. Robert A. Moreau and Megan E. Hums\*, USDA, ARS, ERRC, USA
- 9. Free Fatty Acid Generation during Dry-grind Corn Ethanol Fermentation. Brett Brothers, Tong Wang, and Hui Wang, lowa State University, USA
- 10. Extraction and Characterization of Passion Fruit and Guava Oils from Industrial Residual Seeds and Their Application as Biofuels. Paulo A.Z. Suarez, University of Brazil, Brazil
- 11. Glycerolysis Reaction Under Ultrasound. Kiran Shinde and Atul Deshmane, Whole Energy Fuels Corp., USA

### LOQ-P: Lipid Oxidation and Quality Poster Session

Chair: Uwe Nienaber DSM Nutritional Products, USA

### Hall B

- 1. A Comparison of Commercial Enzymes Used Individually or in Combination for Aqueous Enzymatic Extraction of Oil from Njangsa Seed. Mary Besong<sup>1</sup>, Anh T.L Nguyen<sup>2</sup>, Samuel A. Besong<sup>3</sup>, and Alberta N.A. Aryee\*2, 1The Henry P. Becton School of Nursing & Allied Health, Fairleigh Dickinson University, USA; 2Delaware State University, USA; 3Dept. of Human Ecology, College of Agricultural Sciences, Delaware State University, USA
- 2. Impact of High Pressure and Temperature Processing on Antioxidant Activity of Canola Meal Extracts. Ruchira Nandasiri, Erika Zago, and Usha Thiyam, University of Manitoba, Canada
- 3. Chemometric Comparison of Aldehyde Formation in Olive Oil and Camellia Oil at Frying Temperature. Ling Peng, Jieyao Yuan\*, and Chi Chen, University of Minnesota, USA
- 4. Chemometric Profiling of Aldehyde Distribution in Frying Oil and French Fries. Lei Wang, Yuyin Zhou\*, Yukari Yamashita, and Chi Chen, University of Minnesota, USA
- Development of Novel Free-flowing Fish Oil-loaded Hollow Solid Lipid Micro- and Nanoparticles to Improve Oxidative Stability of Fish Oil. Junsi Yang and Ozan N. Ciftci, University of Nebraska-Lincoln, USA
- 6. Physical and Oxidative Stability of 50-70% Fish Oil-in-Water Emulsions Stabilized with Sodium Caseinate and Phosphatidylcholine. Betül Yesiltas<sup>1</sup>, Ann-Dorit Moltke Sørensen<sup>2</sup>, Pedro J. Garcia-Moreno<sup>2</sup>, and Charlotte Jacobsen\*<sup>2</sup>, <sup>1</sup>National Food Institute, Technical University of Denmark, Denmark; <sup>2</sup>Technical University of Denmark, Denmark
- 7. Identification and Quantification of Phytoprostanes and Phytofurans in Coffee and Cocoa By- and Co-products. Mariana Ruesgas Ramon<sup>1</sup>, Claire Vigor<sup>2</sup>, Amandine Rocher<sup>2</sup>, Guillaume Reversat<sup>3</sup>, Joseph Vercauteren<sup>3</sup>, Camille Oger<sup>3</sup>, Jean-Marie Galano<sup>3</sup>, Thierry Durand<sup>3</sup>, Erwann Durand<sup>4</sup>, and Maria Cruz Figueroa-Espinoza<sup>5</sup>, <sup>1</sup>SupAgro Montpellier, France; <sup>2</sup>Institut des Biomolécules Max Mousseron, France; <sup>3</sup>Institut des Biomolécules Max Mousseron, UMR 5247 CNRS, University of Montpellier, ENSCM, Faculty of Pharmacy., France; 4CIRAD, France; <sup>5</sup>Montpellier SupAgro, UMR IATE, Montpellier, France
- 8. An Investigation of the Antioxidant Activity of Alkyl Gallates in **Model Membranes.** Yu Zhao<sup>1</sup>, Drew Marquardt<sup>2</sup>, Ryan J. Elias<sup>1</sup>, and John N. Coupland<sup>1</sup>, <sup>1</sup>Pennsylvania State University, USA; <sup>2</sup>University of Windsor, Canada

- 9. Predicting the Oxidative Stability in Bakery Products: Application of Accelerated Method Based on Oxygen Consumption. Claudio Corradini¹, Antonella Cavazza¹, Emma Chiavaro², Carmen Lagana³, Stefano Casiraghi\*⁴, Monia Scarsi⁴, Maria Paciulli⁵, Massimiliano Rinaldi⁵, and Maria Grimaldi⁶, ¹Universita degli Studi di Parma, Italy; ²Dipartimento di Scienze degli Alimenti e del Farmaco, Università di Parma, Italy; ³VELP Scientifica, Italy; ⁴VELP Scientific, Inc., USA; ⁵Dipartimento di Scienze degli Alimenti e del Farmaco, Università di Parma, Italy; ⁶Dipartimento di Scienze Chimiche, della Vita e della Sostenibilità Ambientale, Università di Parma, Italy
- 10. A Study of Photooxidation in Edible Oils by FTIR Spectroscopy and Incubation at Moderate Light Intensity. Noelia Tena¹, Ramón Aparicio-Ruiz¹, Ana Lobo², María Teresa Morales³, Aparicio Ramón², and Diego L. García González\*¹, ¹Instituto de la Grasa (CSIC), Spain; ²Instituto de la Grasa (CSIC); ³University of Seville, Spain
- Food-induced Formation of Health-damaging Compounds During Repeated Deep-fat Frying Cycles. Ru Shen, William G. Helferich, and Nicki J. Engeseth, University of Illinois at Urbana-Champaign, USA
- 12. Lecithin Near Critical Micelle Concentration had the Highest Oxidative Stability in Corn Oil. JiSu Kim<sup>1</sup>, YunSik Woo<sup>1</sup>, Jiwon Ryu<sup>1</sup>, MiJa Kim<sup>2</sup>, and JaeHwan Lee\*<sup>3</sup>, <sup>1</sup>Sungkyunkwan University, Republic of Korea; <sup>2</sup>Kangwon National University, Republic of Korea; <sup>3</sup>Dept. of Food Science and Biotechnology, Sungkyunkwan University, Republic of Korea
- Optimization and Validation of Rancimat Operational Parameters to Determine Walnut-oil Oxidative Stability. Lucia Felix and Irwin R. Donis-Gonzalez, University of California-Davis, USA
- 14. Correlation between Phenolic Compounds and Antioxidant Activity of Sapucaia Nut (Lecythis pisonis Cambess) Aqueous Extract. Fernanda Demolinder<sup>1</sup>, Priscila Policarpi <sup>2</sup>, Leticia Turcatto<sup>2</sup>, Luciano Vitali<sup>3</sup>, Gustavo A. Micke<sup>3</sup>, and Jane Mara Block\*<sup>4</sup>, <sup>1</sup>Dept. of Food Science and Technology -Federal University of Santa Catarina, Brazil; <sup>2</sup>Dept. of Food Science and Technology, Federal University of Santa Catarina, Brazil; <sup>3</sup>Dept. of Chemistry Federal University of Santa Catarina, Brazil; <sup>4</sup>UFSC, Brazil
- 15. Microwave-assisted Synthesis and Antioxidant Activity of Palmitoyl-epigallocatechin Gallate. Tao Zhang, Ruijie Liu, Ming Chang, Qingzhe Jin, and Xingguo Wang, Jiangnan University, China
- 16. Comparison of Walnut Oil Obtained by Different Extraction Solvents. Pan Gao and Xingguo Wang, Jiangnan University, China
- Co-solvent Modified Supercritical Carbon Dioxide Extraction and Antioxidant Activity of Rosemary Extracts. Ignacio Vieitez, Lucía Maceiras, and Iván Jachmanián, UdelaR, Uruguay
- Opportunities for Low Saturate High Oleic Canola Oil in Food Industry: Frying Quality and Oxidative Stability. Xiaolan Luo and Diliara lassonova, Cargill Inc., USA
- The Degraded Products During Frying. Junmei Liang, Yuan Rong Jiang, and Wenyan Ji, Wilmar (Shanghai) Biotechnology Research & Development Center Co., Ltd., China
- Radical Detection in Antioxidant Treated Fish Oil using Electron Paramagnetic Resonance. Ewa Szajna-Fuller, Carrie Wray\*, and Qing Bin, Kemin Industries, USA

#### PCP-P: Protein and Co-Products Poster Session

Chairs: Mila Hojilla-Evangelista, USDA, ARS, NCAUR, USA; and Navam Hettiarachchy, University of Arkansas, USA

#### Hall B

 Pilot Plant Fractionation of Canary Seeds and Functional Properties of Protein Isolates. Allaoua Achouri<sup>1</sup>, Delphine Martineau Côté<sup>1</sup>, Stéphane Sirois<sup>1</sup>, Emily Mason<sup>1</sup>, Pierre Hucl<sup>2</sup>, Elsayed Abdel-Aal<sup>1</sup>, and Lamia L'Hocine\*<sup>1</sup>, <sup>1</sup>Agriculture and Agri-Food Canada, Canada; <sup>2</sup>University of Saskatchewan, Canada

- Inhibitory Activities of Amaranthus viridis, Telfairia occidentalis and Solanum macrocarpon Leaf Extracts Against Carbohydrate-Digesting Enzymes. Olayinka A. Olarewaju (Protein and Co-Products Division Travel Grant Winner), Adeola M. Alashi, and Rotimi Aluko, University of Manitoba, Canada
- Inhibitory Activities of Yellow Field Pea Protein-derived Peptides
   Against α-amylase and α-glucosidase. Temitola 0. Awosika
   (Protein and Co-Products Division Travel Grant Winner) and
   Rotimi Aluko, University of Manitoba, Canada
- 4. Optimization of Submerged Fungal Incubation Process for Production of Guar Protein Hydrolysate. Jacob Zahler¹, Bishnu Karki², Michael Brown³, and William Gibbons¹, ¹South Dakota State University, USA; ²Dept. of Biology and Microbiology, South Dakota State University, USA; ³Dept. of Natural Resource Management, South Dakota State University. USA
- 5. Effect of Physical and Biochemical Pre-treatment on Digestibility and Bioacessibility of Nutrients in Pulses. Elisa Di Stefano¹ (Protein and Co-Products Division Travel Grant Winner), Chibuike C. Udenigwe¹, and Teresa Oliviero², ¹University of Ottawa, Canada; ²Wageningen University, The Netherlands
- 6. A New Chromatographic Method for Simultaneous Quantification of Proteins and Phenolic Compounds from Oleaginous Meal. Sara Albe Slabi¹, Christelle Mathé², Xavier Framboisier³, Arnaud Aymes³, Olivier Galet⁴, and Romain Kapel³, ¹Reaction and Process Engineering Laboratory UMR-7274, Avril Group, France; ²Reaction and Process Engineering Laboratory, France; ³Reaction and Process Engineering Laboratory UMR-7274, France; ⁴Avril Group, France
- Understanding the Effects of Processing Conditions on the Extraction of Oil and Protein from Almond Flour. Thaiza Serrano Pinheiro de Souza (Protein and Co-Products Division Travel Grant Winner), Neiva Maria M. de Almeida, and Juliana M. Leite Nobrega de Moura Bell, University of California-Davis, USA
- Peptide Mapping of Cryoprecipitated Proteins from Select Rosaceae Seeds. Sahil Gupta (Protein and Co-Products Division Travel Grant Winner), Valerie D. Zaffran, Tengfei Li, and Shridhar K. Sathe, Florida State University, USA
- Inhibitory Effects of Hydrolyzed Oat Proteins on Human LDL Oxidation their Bile Acids Binding Capacity. Gabriela Campos and Apollinaire Tsopmo, Carleton University, Canada
- Characterization of Soluble Proteins from Commercial Oat Millings. Mallory E. Walters and Apollinaire Tsopmo, Carleton University, Canada
- 11. Physicochemical Properties of Rice Albumin with a Suppressive Function Against Hyperglycemia. Aya Hamada¹, Shigenobu Ina², Nozomi Fujisawa², Ayaka Akima³, Yusuke Yamaguchi¹, Makoto Akao⁴, Hitoshi Kumagai³, and Hitomi Kumagai⁴, ¹Nihon University, Japan; ²College of Bioresource Sciences, Nihon University, Japan; ³Kyoritsu Women¹s University, Japan; ⁴Dept. of Chemistry and Life Science, College of Bioresource Sciences, Nihon University, Japan
- 12. Deamidation of Water-soluble Wheat Gliadin by Cation-exchange Resins. Hanae Nakamura¹, Sumika Ochiai¹, Ryusuke Abe¹, Yusuke Yamaguchi, Makoto Akao², Hitoshi Kumagai³, Reiko Urade⁴, and Hitomi Kumagai², ¹Nihon University, Japan; ²Dept. of Chemistry and Life Science, College of Bioresource Sciences, Nihon University, Japan; ³Faculty of Home Economics, Kyoritsu Women's University; ⁴Kyoto University, Japan
- Protease Hydrolysis to Alter the Functional Properties of Proteins.
   Kelly Gregory, Caroline H. Best, Deborah Winetzky, and Chris Penet, Bio-Cat, USA
- Substitution of Naturally Occurring Bromelain using a Blend of Proteases. Caroline H. Best, Kelly Gregory, and Chris Penet, <sup>1</sup>Bio-Cat, USA
- 15. Orally Administered Ovotransferrin Preserves Bone Microarchitecture in Ovariectomized Rats. Nan Shang (Honored Student Award Winner; Protein and Co-Products Division Travel Grant Winner) and Jianping Wu, University of Alberta, Canada
- 16. Converting Corn Distillers Grain Proteins to High-value Antioxidants.

- Ruijia Hu<sup>1</sup>, Wei Wu<sup>1</sup>, and Yonghui Li<sup>\*2</sup>, <sup>1</sup>Kansas State University, Grain Science and Industry, USA; <sup>2</sup>Kansas State University, USA
- 17. Single-shot Top-down Proteomics with Capillary Electrophoresis-electrospray Ionization-tandem Mass-spectrometry for Identification of 570 Escherichia Coli Proteoforms. Rachele A. Lubeckyj (Lipid Oxidation and Quality Division Travel Grant Winner), Michigan State University, USA

#### **PHO-P: Phospholipid Poster Session**

Chair: Ernesto Hernandez, Advanced Lipid Consultants, USA Hall B

- Physical, Oxidative Stability and Microstructure Characteristics of Structured Lipid/Skim Milk Emulsions Prepared by using Different Emulsifiers. Abdelmoneim H. Ali¹, Wei Wei², Sherif M. #### **ADF Engineering, Inc.** (801)

adfengineering.com | USA

ADF Engineering is a leading provider of process engineering solutions for the food, feed, biofuel, and bioscience industries. We offer process, structural, piping, electrical engineering, and project management services at three locations. The ADF team of talented engineers uses cutting edge engineering tools for process modeling and design. We offer expertise in oilseeds processing, surfactants, fatty acids, and biodiesel.

Interest Area(s): Industrial Oil Products, Processing

#### **AGI USA, Inc.** (808)

Interest Area(s): Biotechnology

#### **Agilent Technologies** (306)

agilent.com | USA

Agilent Technologies is a leading provider of sample preparation, chromatography, mass spectrometry, elemental analysis, molecular spectroscopy, and laboratory information systems, as well as support services, columns and consumables that enable you to analyze, confirm, and quantify substances of interest with confidence from sample preparation to final report.

Interest Area(s): Analytical

#### Alegre Science, Inc. (307)

alegrescience.com | USA

We provide leading edge NMR, MRI products from NIUMAG Corp, Dry Air sources from Alegre Science, and the melloeX portable liquid CO2 extraction system.

#### Alfa Laval Inc. (706)

alfalaval.us | USA

Alfa Laval is a leading global fats and oils industry supplier. We provide engineering services and equipment

for complete processing lines, including degumming, neutralization, bleaching, deodorization, interesterification, fractionation, hydrogenation, and biofuels production. Our market-leading portfolio features SoftColumn continuous and SoftFlex semi-continuous deodorizers, PX centrifuges, decanters, heat exchangers, evaporators, and condensers.

Interest Area(s): Edible Applications Technology, Industrial Oil Products, Processing, Protein, and Co-Products

#### amafilter LFC Lochem -**Filtration Group Process** Systems (609)

ama-lfc.com | Netherlands

Amafilter LFC Lochem - Filtration Group Process Systems key activity is the design and manufacturing of filter installations aimed at separating solids from liquids, as well as selling and servicing these installations and selling and distributing a wide range of filtration products like filter housings, filter cartridges, filter bags and spare parts. With a heritage of almost 90 years we are active in almost every industry. Visit www.ama-lfc.com to learn more.

#### **Amano Enzyme USA (305)**

amano-enzyme.co.jp | USA

Amano Enzyme USA manufactures microbial source, Non-GMO enzymes for a number of applications involving fat and oil processing, including lipases for enzyme modified cheese and other dairy flavor production, Omega-3 fatty acid production and improved purity of triglycerides, in addition to other applications in the food, nutraceutical, diagnostic and pharmaceutical industries. Kosher and Halal certified material is available.

#### **Anderson International Corp** (700)

andersonintl.net | USA

Anderson International Corp is a world leader in manufacturing and installing modern vegetable oil processing machinery and systems

beginning in 1888. Anderson not only leads in continuous mechanical extraction for "green" oils, through our invented Expeller® presses, but also manufactures the most energy-efficient and productive expander machinery for the preparation

### **Share your Annual Meeting** experience!

#AOCS2018

of low- and high-oil content seeds for solvent extraction.

Interest Area(s): Processing

#### **ANKOM Technology** (205)

ankom.com | USA

ANKOM Technology produces analytical instrumentation for food and feed testing. We are best known for introducing Filter Bag Technology

(FBT), which allows high-volume, accurate analytical testing. Our systems are used in more than 110 countries worldwide. Ask about our products: ANKOM XT15 Fat Extractor, ANKOM Automated TDF Dietary Fiber Analyzer, ANKOM RF Gas Production Analyzer, and ANKOM A2000 Fiber Analyzer.

Interest Area(s): Analytical

#### AOCS 2019 | Explore St. **Louis** (109)

explorestlouis.com | USA

Want to get more involved in the planning of the 2019 AOCS Annual Meeting in St. Louis, Missouri, USA? View volunteer opportunities at annualmeeting.aocs. org/2019.

#### **Arisdyne Systems, Inc.** (405)

arisdyne.com | USA

Arisdyne Systems, Inc.-Applying the Power of Controlled Cavitation.

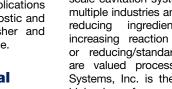

multiple industries and applications where reducing ingredients/chemical inputs, increasing reaction rates, mixing and/ or reducing/standardizing particle size are valued process benefits. Arisdyne Systems, Inc. is the leading provider of high shear force and high temperature ("hot spot") for superior mixing (emulsions and dispersions), particle size reduction and chemical reactions with applications in various industries.

#### **Artisan Industries Inc.** (411)

artisanind.com | USA

For over 80 years, Artisan Industries has provided optimized, engineered separation solutions. Produced in the USA and maintained across the globe, Artisan has been revolutionizing the way companies

solve their most challenging separation processes. Eliminate multiple processing steps, reduce waste, and increase product value and profitability with Artisan's Technologies. Stop by booth 411 to learn how Artisan and JET-VAC® Technologies can be incorporated into your process intensification efforts.

Interest Area(s): Edible Applications Technology, Health and Nutrition, Industrial Oil Products, Processing, Surfactants and Detergents

#### **ATC Scientific** (207)

atcscientific.com | USA

ATC Scientific is an analytical testing laboratory located in North Little Rock, Arkansas, USA. We are a full service, independently owned lab, specializing in agriculture, food, feed, and microbiology testing. Our strength is in providing quality results while delivering fast turnaround time and attentive customer service. Our primary goal is to assure the highest quality results are presented to our clients in a fast, timely manner.

Interest Area(s): Analytical

#### Australian Oilseeds Federation (907)

australianoilseeds.com | Australia

#### **Bruker Corporation** (104)

bruker.com | USA

Bruker Corporation manufactures a variety of instruments dedicated to analytical solutions for food quality and safety. Testing includes trait,

edible oil, frying fat, and biodiesel quality control recommended by AOCS standards. A wide number of quality parameters can be analyzed with one measurement. Ready-to-use calibrations for edible fats, oils, and oil seeds enable a guick and efficient start. Bruker is supporting the industry to contribute to better nutrition and health around the world.

Interest Area(s): Analytical, Processing

#### **BUCHI Corporation (308)**

buchi.com | USA

For 75 years, BUCHI is a leading solution provider in laboratory technology for R & D, quality control and production worldwide. Our solutions for laboratory, industrial and parallel evaporation, spray drying, melting point, freeze drying, preparative chromatography, extraction, distillation and digestion, Dumas and near infrared spectroscopy meet the highest needs of our customers around the globe.

#### **Buhler Inc.** (906)

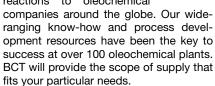

buhlergroup.com | USA

When it comes to oilseed preparation, Bühler is the natural choice of partner for processing soybeans, rapeseeds, sunflower and corn. The company offers high-availability, low-downtime technology for the preparation of oilseeds prior to extraction. Buhler works closely with manufacturers of pressing and extraction systems to provide complete processing solutions. Buhler's combination of proven reliability, innovative technology and comprehensive services will maximize extraction yield.

#### **Buss ChemTech AG** (503)

buss-ct.com | Switzerland

Buss ChemTech (BCT) delivers innovative, reliable, and safe process design solutions for catalyzed gas/liquid reactions to oleochemical

#### Caldic USA, Inc. (101)

caldic.us | USA

Under the Dadex® brand, Caldic has been delighting our customers by innovating and supplying antioxidant solutions to the global food

and pet food industry for over 25 years. Our extensive line of synthetic and natural antioxidant solutions can be tailored to meet each customer's specific application and shelf life challenges. Caldic's dedicated R&D application and our unique blend of science, quality, and customer service guarantee great results in your finished product.

Interest Area(s): Edible Applications Technology, Industrial Oil Products, Lipid Oxidation and Quality

#### Camlin Fine Sciences (504)

camlinfs.com | USA

Camlin Fine Sciences has been a trusted name in the antioxidant industry for more than 25 years. CFS provides a complete portfolio of shelf life solutions for the food, pet food, rendering, animal feed, and biodiesel industries. Our NaSure™ plant-based antioxidant solutions offer a natural alternative in shelf-life extension while  $Xtendra^{TM}$  traditional antioxidant solutions combine time-proven ingredients. Analytical services available. Please contact us for additional information.

Interest Area(s): Analytical, Health and Nutrition, Lipid Oxidation and Quality

#### **Center for Testmaterials BV** (507)

cftbv.nl | Netherlands

Center for **Testmaterials** (CFT) is your one-stop-shop for detergent performance test materials. We deliver our products (and products

from other suppliers) worldwide directly from our factory in The Netherlands. Next to the widest range of soiled test fabrics, we offer test fabrics for testing secondary performance. We also offer test materials testing the performance of (hand) dish wash detergents, hard surface cleaners, and specialized testing equipment.

Interest Area(s): Surfactants and Detergents

#### Clariant (409)

clariant.com | Mexico

Clariant, one of the world's leading specialty chemical companies, contributes to value creation with innovative and sustainable solutions for customers from many industries. At the same time, our R&D is focused on addressing the key trends of our time. These include energy efficiency, renewable raw materials, emission-free mobility, and conserving finite resources. Our business units are organized into four business areas: Care Chemicals, Natural Resources, Catalysis, and Plastics and Coatings.

Interest Area(s): Edible Applications Technology, Processing

#### **COSA Xentaur Corporation** (301)

cosaxentaur.com |USA

Cosa Xentaur provides innovative, affordable NMR analysis solutions to the food, fuel, chemical, plastic, and petrochemical industries.

#### **Croll-Revnolds Co...** inc. (502)

croll.com | USA

Croll Reynolds' steam ejectors play a vital role in the deodorization and bleaching phases of the edible oil refining process. With design,

manufacturing, research, and test facilities in the Far East as well as the United States, Croll Reynolds has emerged as the leading supplier of low cost, high-performance vacuum systems to the edible oil industry. If you're considering a new plant, an expansion, or an upgrade, consider Croll Reynolds.

#### Crown Iron Works Company (806)

**Sponsor of Attendee Communications** 

crowniron.com | USA

Crown Iron Works provides design and supply services for vegetable/specialty oils processing worldwide. Specializing in corn fraction-

ation, preparation, extraction, refining, biodiesel, and oleochemical technology, we have worked to develop advanced processing technology to improve your bottom line. Our engineered approach to reliable system design makes life easier for processing professionals who desire increased capacity, lower steam/utility usage, and improved finished-product quality.

Interest Area(s): Processing

#### **Desmet Ballestra** (702)

Sponsor of Wi-Fi and The App

desmetballestra.com | USA

Desmet Ballestra is the global solution provider for the edible oils and fats, surfactants, detergents, oleochemicals, biodiesel, and glycerin indus-

tries. In the oils and fats sector, it has a full range of process equipment and services, including seed preparation equipment, mechanical and solvent extraction, oil processing, and fat modification. Recent innovations are in screw pressing, desolventizing, distillation deodorization, fractionation, interesterification, dry-ice condensing, MES, and biodiesel.

# **DSM Food Specialties B.V.** (607)

purifine.com | USA

Royal DSM N.V. is a global science-based company active in health, nutrition, and

materials. By connecting its unique competences in life sciences and materials sciences to create sustainable value for all stakeholders, DSM delivers innovative solutions that nourish, protect, and improve performance in global markets. DSM's Purifine® enzymes are degumming solutions designed for oilseed crushing and refining. Purifine®

more sustainable process.

enzymes will increase your oil yields to

providing you with a higher profit and a

### **DuPont Nutrition & Health**

(111)

food.dupont.com | USA

DuPont Nutrition & Health combines in-depth knowledge of food and nutrition with current research and expert science to deliver

unmatched value to the food, beverage, pharmaceutical, and dietary supplement industries. We are innovative solvers, drawing on deep consumer insights and a broad product portfolio to help our customers turn challenges into high-value business opportunities.

Interest Area(s): Health and Nutrition

#### **DVC Process Technologists** (911)

Sponsor of President's Welcome Reception

dvcprocesstech.com | India

DVC Process Technologists is a trusted name in the field of Edible Oils & Fats Industry. We are a single window for customers for all their needs regarding design, manufacture and supply of various process technologies along with equipment and turnkey solutions for Edible Oil refining, Oil seeds extraction and other value added processes for by products. We believe in upbringing innovative technologies with respect to better efficiency, superior product quality and simplified operations.

#### **Enzyme Innovation** (611)

enzymeinnovation.com | USA

#### **EP Minerals** (406)

epminerals.com, epengineeredclays. com | USA

EP Minerals and EP Engineered Clays produce innovative engineered materials from Diatomaceous Earth (DE), Perlite, Bentonite

Clay, and Montmorillonite Clay. We specialize in the highest quality purification products and filter aids for oleochemical, edible oils, and biodiesel purification and processing. We provide our customers with world-class technical expertise and excellent customer service.

Interest Area(s): Processing

#### **Euro Fed Lipid** (904)

eurofedlipid.org | Germany

Euro Fed Lipid is a federation of 13 scientific associations concerned with lipids, fats, and oils. The federation represents 2,000 individuals and companies. Its

mission is the furthering of lipid science and technology, and the cooperation and exchange of ideas between scientists and technologists at a European level. The activities of Euro Fed Lipid include the organization of international congresses at varying venues, by the co-organization of the fair "oils+fats", and the publishing of the European Journal of Lipid Science and Technology.

#### **Evonik Corporation** (408)

Sponsor of the Walk the Halls Pedometer Challenge

evonik.com | USA

Evonik is one of the world leaders in specialty chemicals. Evonik's Household Care business line is a global leader in the manufacture

and supply of raw materials and additives to the fabric care, car care, industrial, and institutional cleaning markets. Our unique product portfolio provides a wide range of system solutions and tailor-made products for our customers' needs.

#### **Farmet A.S.** (712)

farmet.eu | Czech Republic

Farmet a.s. is a Czech company founded in 1992. We are one of the world-wide leading specialists in turnkey deliveries of pressing

shops and feed extrusion technologies. Our product portfolio ranges from individual machines, small plants to large-capacity plants using different presses and extruders with different capacities. Our technologies based on our own R&D and production provide the customers the best cost-effective, economic and environmentally-friendly solutions.

Interest Area(s): Phospholipid, Processing

# Filtration Group Process,

**Inc.** (610)

filtrationgroup.com | USA

Filtration Group products are known internationally for their superior quality, high efficiency, and value. Filtration Group provides superior filtration solutions for industrial liquid, edible oil, biofuels, chemicals, petrochemicals, and water filtration applications. Filtration Group products cover a wide range of expertise in highly engineered and customized filter vessels, in a variety of materials, which gives us the edge in designing a filter system to meet your specific requirements.

#### Formulaction Inc. (202)

formulaction.com | USA

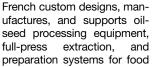

For over 20 years, Formulaction has

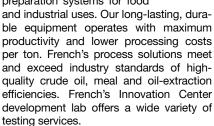

developed instrumentation that provide solutions to measuring and predicting the stability and rheology of concentrated emulsions, dispersions, foams, and powders. Multiple Light Scattering is used to track particle movement and correlate this to events such as sedimentation, creaming, clarification, flocculation, gelation, and thermal phase transitions, while our new microfluidic technology allows for rapid viscosity versus shear rate flow curve generation.

Interest Area(s): Analytical, Edible Applications Technology, Industrial Oil Products, Surfactants and Detergents

#### French Oil Mill **Machinery Co.** (403)

frenchoil.com | USA

Interest Area(s): Processing

#### Galaxy Scientific, Inc.

galaxy-scientific.com | USA

Galaxy Scientific, Inc. designs and manufactures superior near-infrared solutions for quality control and assurance. The near-infrared spectrum of an oil contains a wealth of information that can be used to determine important parameters. Spectroscopic analysis of fats and oils is rapid, requires no sample preparation, and can quantify multiple parameters with a single measurement. Galaxy Scientific offers both offline and online FT-NIR solutions for analysis of edible fats and oils.

Interest Area(s): Analytical, Edible Applications Technology, Industrial Oil Products, Lipid Oxidation and Quality

#### **GEA North America** (400)

wsus.com | USA

GEA provides process technology for the recovery and refining of nearly all vegetable and animal oils and fats, as well as oil refining for press oil clarification, degumming, neutralization, dewaxing, fractionation, and soapstock splitting. Our technologies are also used for the production of high-quality biodiesel. Equipment offered includes centrifuges, decanters, and dry condensing systems that provide superior efficiency with low energy consumption.

Interest Area(s): Biotechnology, Edible Applications Technology, Industrial

Oil Products, Processing, Protein and Co-Products

### **Gerstenberg Services A/S**

gerstenbergs.com | Denmark

#### **GRACE** (107)

grace.com/en-us | USA

TRISYL® silicas are synthetic amorphous micronized silica used for refining and processing of edible oils and fats to help improve quality, stability, and reduce neutral oil losses.

Interest Area(s): Edible Applications Technology, Processing

#### **Graham Corporation** (508)

graham-mfg.com | USA

Graham Corporation is a global business that designs, manufactures, and sells critical equipment for the energy, defense, and chemical/petrochemical industries. Graham's global brand is built upon world-renowned engineering expertise in vacuum and heat transfer technology. The company supplies custom engineered ejectors, vacuum pumping systems, surface condensers, and vacuum systems. Graham has built a reputation for topquality, reliable products, and high standards of customer service.

# Paquin Circle

# Our legacy of excellence

Include AOCS Foundation in your estate planning and you will ensure future generations of professionals in fats, oils, proteins, surfactants and related materials will have the same success as past generations.

Thank you to our first Paquin Circle member, Neil Widlak.

Your support enables the AOCS Foundation to fund the development of new products and services for AOCS.

## Make a difference—donate today!

Interest Area(s): Industrial Oil Products, Processing

#### Guangzhou TICUN Technology Development Co., Ltd. (606)

yicundetergent.en.alibaba.com | China

#### Hanna Instruments (304)

hannainst.com | USA

Hanna Instruments revolutionized pH testing with the introduction of pHep in 1986 now with millions of units sold. Today, Hanna leads the industry in innovation designing, manufacturing, and supporting meters, titrators, probes, buffers, solutions, and related equipment. Hanna's 1,000 employees and 65 offices are dedicated to making and supporting the best scientific testing products in the world. Our goal is to make everything better by making testing more accessible, easy, and accurate.

Interest Area(s): Analytical, Processing

#### HF Press+LipidTech (800)

hf-press-lipidtech.com | Germany

HF Press+LipidTech (HF PLT) is a division of the Hamburg/ Germany based HF Group. The product portfolio of HF

PLT ranges from individual machines up to complete systems for oil-seed preparation, oilseed pressing, and crude oil refining. HF PLT presses are also used in rendering plants and for special applications in the dewatering sector.

Interest Area(s): Edible Applications Technology, Processing

# Hollbras Industrial Filtration (410)

hollbras.com.br | Brazil

Dedicated to providing industrial filtration solutions for 25 years, Hollbras specializes in liquid filtration. With our expertise, Hollbras provides customers improvements in their filtration processes, deploying our specialist staff and own laboratory equipped with pilot units for filtration and semi-industrial pilot units for testing at our customers' own factories.

Interest Area(s): Edible Applications Technology, Industrial Oil Products, Processing

#### ICOF America, Inc., (a member of Musim Mas Group) (402)

musimmas.com | USA

MUSIM MAS GROUP: Headquartered in Singapore, our business is involved with every part of the palm oil supply chain: from managing plantations and mills to refining crude palm oil and manufacturing palm-based product, supported by an extensive fleet of ships that enhance our logistical capability. ICOF AMERICA is a member of the Musim Mas Group and their marketing arm in North America.

#### **Imerys Filtration** (708)

imerys-filtration.com | USA

CynerSorb is a speciality adsorbent for cost-effective refining and purification of biodiesel, edible oils, and oleochemicals. Excellent filtration characteristics allows reduction/removal of current filter aid and increases production capacity. CynerSorb is more effective at removing soaps, phospholipids, trace metals, and polar contaminants than current solutions. It works synergistically with bleaching earth and allows significant reduction of bleaching earth addition.

Interest Area(s): Edible Applications Technology, Industrial Oil Products, Processing

#### InCon Process Systems/ GIG Karasek (804)

ips-gigk.com | USA

Recover specialty essential oils in molecular distillation plants with modular systems using technology developed in InCon's plant. We have technology kernels around high vacuum distillation, molecular distillation, wiped film, and short path evaporation. Our proprietary processes concentrate Omega-3 fish oil beyond 90%, continuously process to 98% glycerol monostearate, and concentrate Vitamin E and tocopherols.

Interest Area(s): Lipid Oxidation and Quality, Phospholipid, Processing

## **Inventure Renewables,**

**Inc.** (910)

inventurechem.com | USA

Inventure Renewables pioneers process technologies for the rapid, low-cost, high yield extraction of natural biochemical and material building blocks from low-value/ waste biomass to provide cost-effective, carbon neutral biofuels, biochemicals and biomaterials.

#### **Itaconix Corporation** (401)

itaconix.com | USA

Itaconix produces novel polymers with unique properties that improve the safety, performance, and sustainability of products essential to our everyday lives. From water conditioning and film formation to cleaning and fragrance delivery, we work closely with home and personal care customers to increase the value and reduce the cost of their products.

#### JEOL USA, Inc. (206)

jeolusa.com | USA

JEOL is a world leader in Analytical and Imaging instrumentation, including mass spectrometers, NMRs and ESRs, electron microscopes, and semiconductor tools. JEOL USA, Inc., is a wholly-owned subsidiary of JEOL, Ltd., Japan, and was incorporated in the United States in 1962. The company has 13 regional service centers that offer unlimited emergency service and support in the U.S.

Interest Area(s): Analytical, Industrial Oil Products, Lipid Oxidation and Quality, Phospholipid, Surfactants and Detergents

#### **Kalsec** (701)

Sponsor of the Highlighters

kalsec.com | USA

Kalsec®, the leader in natural oxidation management, provides a wide range of natural antioxidants including Herbalox® XT, a low-

flavor, low-aroma antioxidant ideal for oil and other flavor-sensitive applications. Herbalox® XT provides the ability to improve shelf life by increasing the amount of natural antioxidant used without flavor and aroma limitations.

#### **Keit Spectrometers** (106)

keit.co.uk | United Kingdom

Keit provides continuous, in-line process analysis of liquids with rugged technology. The IRmadillo™ FTIR spectrometer is built tough with a solid-state sensor. Certified safe for use in hazardous environments, it enables real-time reaction analysis of liquids at the point of production in manufacturing environments for the tracking and material identification of oils, acids, fatty acids, sugars, alcohols, and proteins, among others, in industries such as food and beverage, petrochemical and biofuels.

Interest Area(s): Analytical, Biotechnology, Industrial Oil Products, Processing

#### **Kemin Industries** (103)

Sponsor of the Name Badges and Tuesday Happy Hour Reception

kemin.com | USA

Kemin is committed to providing the food industry with only the highest quality, efficacious ingredients to help extend product shelf-life.

Our extensive knowledge of oxidation

processes and understanding of food products on a molecular level have made Kemin a leading choice for much-needed preservation and food safety.

Interest Area(s): Lipid Oxidation and Quality

#### Larodan AB (203)

Sponsor of the 5K Fun Run/Walk

larodan.com | Sweden

Larodan makes a comprehensive range of researchgrade, high-purity lipids for use as analytical standards. Our customers are involved

in academic research or industrial processes in a number of fields. Our products include all sorts of lipids, from simple fatty acids and methyl esters to complex oxylipins, glycerides, and phospholipids. We were founded in 1963 and our facilities are located at the Karolinska Institute in Stockholm, Sweden.

Interest Area(s): Analytical, Biotechnology, Phospholipid

#### **LEEM Filtration** (407)

leemfiltration.com | USA

LEEM Filtration is a diversified manufacturer of custom filtration products including pressure leaf filters, filter leaves, underdrains, lateral systems, and wedge wire screens. We manufacture our new LEEM VLD series filters, which are designed specifically for oilseed, animal fat, and biodiesel applications. We have engineers and manufacturer's representatives available to our customers throughout the U.S., Canada, Central and South America.

Interest Area(s): Processing

#### **Louisville Dryer Company** (709)

louisvilledryer.com | USA

Louisville Drver Company is the world's leading provider of high-quality rotary processing equipment, with over 100 years of experience in mechanical design, process design, manufacture, application, and service. Our engineering staff is qualified in a number of disciplines and has extensive practical application experience. Featured dryers include rotary steam tube dryers and conditioners.

Interest Area(s): Edible Applications Technology, Health and Nutrition, Industrial Oil Products, Processing

#### **Lovibond Tintometer** (500)

lovibond.com | USA

Lovibond® Tintometer® supplies innovative color measurement systems for

industries where accurate color measurement is important for the quality control of products. The instruments and certified reference materials comply with international test methods and standards such as AOCS, DIN, ASTM, and ISO. Our latest developments include the PFXi spectrophotometer for liquid-color analysis with the ability for remote calibration and maintenance service via internet (RCMSi).

#### **Malaysian Palm Oil Board** (100)

mpob.gov.my | Malaysia and USA

The Technical Advisory Services office of the Malaysian Palm Oil Board in Washington, D.C., offers customer support and technical advisory services to users and potential users of Malaysian palm and palm-kernel oil products in the U.S., Canada, and Latin America. The office also acts as a one-stop information center for Malaysian palm and palm-kernel oil products.

Interest Area(s): Edible Applications Technology, Health and Nutrition, Industrial Oil Products, Lipid Oxidation and Quality, Surfactants and Detergents

#### **Metabolon** (605)

metabolon.com | USA

Metabolon, Inc. is the world's leading health technology company advancmetabolomics. Its Precision Metabolomics™ is a powerful technology for assessing health and delivering biomarker discoveries, innovative diagnostic tests, and valuable data for genomics and population health initiatives. It also accelerates R&D across the pharmaceutical, biotechnology, consumer products, and nutrition industries. Founded in 2000, Metabolon is based in Research Triangle Park, North Carolina, USA.

Interest Area(s): Analytical, Biotechnology, Health and Nutrition

#### Metrohm (501)

metrohm.com | USA

From routine moisture analysis to sophisticated anion and cation qualification, Metrohm offers a complete line of analytical laboratory and process systems for titration, ion chromatography, electrochemistry, and spectroscopy.

Interest Area(s): Analytical, Edible Applications Technology

## Myande Group Co., Ltd.

myandegroup.com | China Myande Group specializes in providing oils and fats pro-

cessing machinery and its engineering services on turnkey basis, including process

design, equipment manufacturing, project management, installation, commissioning, and training service.

Interest Area(s): Edible Applications Technology, Processing

#### Nisshin OilliO Group. **Ltd., The** (704)

nisshin-oillio.com | Japan

The Nisshin OilliO Group. Ltd., is a leader in the oils and fats and meals manufacturing industry in Japan. It is committed to pursue

enhanced health and well-being through business operations in oils and fats and meals, healthy foods, and fine chemicals. With its 110 years of experience, Nisshin OilliO strives to develop new ways to use "the natural power of plants" to offer a wide range of products for the nutritional, functional, and tasty solutions across the "healthspan" of the global population.

#### Nu-Chek Prep, Inc. (608)

nuchekprep.com | USA

Nu-Chek-Prep prepares high-purity lipids for research purposes. Thes include fatty acids, esters, glycerides, alcohols, acetates, cholesteryl esters, alkyl-methane sulfonates, soaps, wax esters, and GC and TLC standards.

#### Oil-Dri Corporation of America (900)

FLUIDS PURIFICATION

Sponsor of the Monday Happy Hour Reception

pure-flo.com | USA

Oil-Dri Corp. of America offers a full spectrum of specialty adsorbents, including Pure-Flo®, Pure-Flo® Supreme, & Perform®

bleaching clays for the purification of fats, oils, and oleochemicals. Oil-Dri's Select® products filter out impurities in conjunction with, or in place of, water-wash treatment. With a full line of innovative and highly effective bleaching products, Oil-Dri delivers product quality, cost effectiveness, and technical support to edible oil & biodiesel producers around the world.

Interest Area(s): Processing

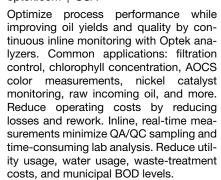

#### **Oils & Fats International** (OFI)/Quartz Business **Media** (705)

ofimagazine.com | United Kingdom

The OFI portfolio comprises conferences, exhibitions, websites, and the industryleading Oils & Fats International magazine. Targeting decision-makers, buyers, and influencers, OFI is committed to helping companies in the oils and fats industry run sustainable enterprises by supplying them with the latest news, features and trends concerning all aspects of the supply chain, whether they concern prices, regulations, feedstocks, processing, refining, trading, or technology, or in specialist areas such as biofuels, biotechnology, renewable materials, and transport.

#### optek-Danulat, Inc. (300)

optek.com | USA

Interest Area(s): Analytical, Biotechnology, Edible Applications Technology, Industrial Oil Products, Processing

# Pattyn North America, Inc. (600)

# PATTYN

Sponsor of the Power Lounge

pattyn.com | USA

Pattyn North America, Inc., in Wisconsin, offers local support and services from the project design and management to the installation and

plete bulk semi-liquid packaging lines. Interest Area(s): Health and Nutrition

#### PerkinElmer (303)

perkinelmer.com | USA

PerkinElmer is a global leader committed to innovating for a healthier world. Our dedicated team of 8,000 employees worldwide are passionate about providing customers with an unmatched experience as they help solve critical issues especially impacting the diagnostics, discovery, and analytical solutions markets.

Interest Area(s): Analytical, Processing

#### Phenomenex (208)

phenomenex.com | USA

Phenomenex is a global technology leader committed to developing novel analytical chemistry solutions that solve the separation and purification challenges of researchers in industrial, government, and academic laboratories. Phenomenex's core technologies include products for liquid chromatography, gas chromatography, and sample preparation; bulk purification chromatographic media; and chromatography accessories and equipment.

Interest Area(s): Analytical

#### **Phillips 66** (602)

phillips66.com | USA

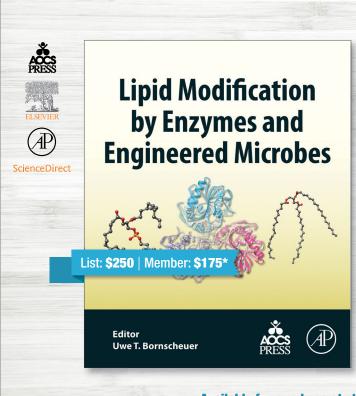

Phillips 66 Hexane (S): We were the first to begin producing Hexane for oil extraction in 1948. When you think C6, think Phillips 66.

Interest Area(s): Edible Applications Technology, Industrial Oil Products, Processing

# PMI-Technology Sdn Bhd (601)

pmi-group.com | Malaysia

PMI was established in Malaysia in 1986, and began business operations providing sales, marketing, and after-sales technical support for a German company engaged in

# **Lipid Modification by Enzymes** and **Engineered Microbes**

#### **Edited by Uwe T. Bornscheuer**

May 2018 | 448 pages | ISBN: 9780128131671 Available in softcover and eBook

Lipid Modification by Enzymes and Engineered Microbes covers the state-of-the art use of enzymes as natural biocatalysts to modify oils and discusses how microorganisms such as yeast can be specifically designed or modified. In the past ten years, the field of lipid modification has made significant progress, not only in the tools for the development of "designer" enzymes, but also in areas such as the metabolic engineering of microbes, the discovery of novel enzyme activities for lipid modification and in the development of reaction engineering/processes. These advances are covered for the first time in this book edited by leading enzymatic scientist Uwe Borchscheuer and authored by an international team of experts.

#### **Key Features:**

- Identifies how and when to use enzymes and microbes for lipid modification
- Includes lipid modification for use in food, biofuels, oleochemicals and polymer precursors
- Provides enzymatic, microbial and metabolic techniques for lipid modification

the manufacturing and distribution of filter presses. PMI later expanded its services to an increasing number of enterprises in the region for palm oil processing, as well as in other applications such as environmental and food processing.

Interest Area(s): Biotechnology, Edible Applications Technology, Industrial Oil Products, Phospholipid, Processing, Protein and Co-Products

#### **PQ Corporation** (201)

pqcorp.com | USA

PQ's **SORBSIL®** improves oil quality and offers process cost savings to the refiner. The silica removes phospholipids, metals, and

Interest Area(s): Industrial Oil Products, Processing

### **Protein Highway Initiative**

proteinhwy.tlg.ca | Canada and USA

The Protein Highway is an initiative to cross-border collaboration enhance among entrepreneurs, researchers and investors across the Canadian Prairies and Upper Midwest/Great Plains region. Its mission is to stimulate economic growth and prosperity in innovative agricultural technology solutions to meet the ever-growing global demand for plantderived protein.

Interest Area(s): Health and Nutrition, Protein and Co-Products

**QUALISOY** (404)

Sponsor of the Water Bottles/Stations and Tuesday Dessert Break

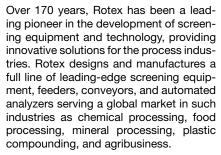

qualisoy.com | USA

Visit QUALISOY (Booth #404) for information about U.S.-grown soy-based solutions and how they can meet the food industry's fats and oils needs. QUALISOY promotes the development and adoption of the latest soybean traits and can help you navigate a post-PHO world. Look for QUALISOY reusable water bottles throughout the show and enjoy treats made with higholeic soybean oil and interesterified high-oleic soybean shortening during the Tuesday post-lunch dessert break.

Interest Area(s): Edible Applications Technology

#### **Rotex Global** (711)

rotex.com | USA

Interest Area(s): Industrial Oil Products, Processing

#### **Sasol Performance** Chemicals (905)

sasol.com | USA

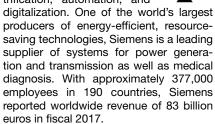

Sasol's Performance Chemicals markets a broad portfolio of organic and inorganic commodity and specialty chemicals. Our four key business divisions are: Organics. Inorganics, Wax and PCASG (phenolics, carbon, ammonia and specialty gases). Our key products include surfactants, surfactant intermediates, fatty alcohols, linear alkyl benzene (LAB), short-chain linear alpha olefins, ethylene, mineral oilbased and synthetic paraffin waxes, cresylic acids, high-purity alumina, and many other products.

## Siemens Industry, Inc.

usa.siemens.com/foodbev | USA

Siemens Corporation is a U.S. subsidiary of Siemens AG, a global powerhouse focusing on the areas of electrification, automation, and

Interest Area(s): Edible Applications Technology, Industrial Oil Products, Processing

#### SIWACO GmbH, IRLE **Group** (902)

siwaco.com | Germany

SIWACO as a member of the IRLE GROUP specializes in casting and machining high wear resistant rolls and roll shells. The technical expertise combined with the power of the IRLE GROUP offers cast rolls and products as well as reliable roll-services with an attractive price-performance ratio and delivery time.

The rolls are manufactured according to the utmost modern metallurgy and technical treatment standards.

Interest Area(s): Processing

#### **Society of Cosmetic** Chemists (604)

scconline.org | USA

Dedicated to the advancement of cosmetic science, the Society strives to increase and disseminate scientific information through meetings and publications. By promoting research in cosmetic science and industry, and by setting high ethical, professional and educational standards, we reach our goal of improving the qualifications of cosmetic scientists.

#### **Solex Thermal Science Inc.** (802)

solexthermal.com | Canada

Solex Thermal Science Inc. specializes in the science of heating, cooling, and drying bulk solids. Solex technology is engineered specifically

for drying free-flowing bulk solid materials such as oilseeds and grains. This ultraefficient technology operates with efficiencies of greater than 90%, and can also utilize waste heat as the heat source for pre-heating and conditioning oilseeds and grains, making it one of the most efficient technologies available for oilseed drying.

Interest Area(s): Processing

## **Solutions 4 Manufacturing**

(912)

s4mequipment.com

Solutions 4 Manufacturing offers complete plants and used equipment for the oilseed and biofuels/biodiesel industries. We can handle any size project with services including engineering consulting and asset/plant liquidation. With 40+ years technical experience, we can put together a solution for you. We will buy your idle equipment and plants.

#### SPEX CertiPrep (908)

spexcertiprep.com | USA

#### **SPX FLOW Technology** (707)

spxflow.com | Denmark

As leading supplier of the food industry, SPX FLOW offers a wide range of flexible and cost-effective solutions. SPX FLOW develops, engineers, manufactures, and installs components and systems. The key applications of the SPX FLOW brand Gerstenberg Schröder include margarine, shortening, butter, mayonnaise, ketchup, sauces, served by core SPX FLOW technologies like scraped surface and plate

heat exchangers, emulsification equipment, butter making equipment, mixing equipment, and valves and pumps.

Interest Area(s): Edible Applications Technology, Processing

#### Steri Technologies, Inc. (710)

steri.com | USA

Steri Technologies, Inc. designs and manufactures liquid-solid separation equipment that is in use in many and varied industries around the world. These liquid-solid separation systems use Funda Pressure Leaf, Nutsche, or Candle filtration technologies.

Interest Area(s): Processing

# **Technochem International, Inc.** (903)

technocheminc.com | USA

Technochem is a technology partner and plant supplier for the oil processing industry. We specialize in oil refining (non-GMO, organic, and specialty oils), biodiesel plant and process supply, glycerin refining, biodiesel distillation, methanol rectification, cold filtration, dewaxing, degumming, corn-oil extraction, esterification, FFA stripping, fermentation, extrusion, expelling, and solvent extraction. We build skid-mounted plants for pilot and commercial scale. We help clients develop new technologies in lab and pilot plants.

#### **Testfabrics, Inc.** (506)

testfabrics.com | USA

Testfabrics, Inc. and Center for Testmaterials (CFT) have worked together for over 20 years to bring the detergent and surfactant industry the latest in clean and pre-soiled test materials and test equipment. Fast, convenient, sourcing, and problem solving involving textile testing and industry has been our commitment!

Interest Area(s): Analytical, Surfactants and Detergents

# Thermo Fisher Scientific (102)

thermofisher.com | USA

Thermo Fisher Scientific<sup>™</sup> is a leader in the food and beverage testing industry. Food quality and safety are two of the most challenging issues in the current regulatory environment. Whether you are testing for contaminants or developing a new product, we have the solutions to meet your need.

Interest Area(s): Analytical

#### **United Soybean Board (505)**

soynewuses.org | USA

The United Soybean Board (USB) is a farmer-funded organization working with industry to commercialize industrial applications using soybean derivatives, including new high oleic soybean oil (HOSO). Advantages include performance, versatility, cost and sustainability. USB-funded successes include soy-based rubber, paints, coatings, adhesives, lubricants, composites and foam, as well as new research including fibers and paper.

#### **Vacuubrand Inc.** (803)

vacuubrand.com | USA

Vacuubrand offers exceptionally quiet, corrosion-resistant, oil-free vacuum pumps and vacuum systems with ultralong service intervals. Applications include distillation, evaporators, reactors, concentrators, filtration and drying, OEM vacuum, and roughing pumps for high-vacuum systems. Use our rotary vane pumps, low-maintenance HYBRID pumps and NEW fine-vacuum controller for effective molecular distillation of oils.

Interest Area(s): Processing

#### **VELP Scientific, Inc.** (412)

velp.com | USA

The American branch of VELP Scientifica, an Italian company with 30+ years' experience in design, manufacture, and distribution of high quality laboratory equipment, is a key reference for lab, research centers, and QC departments worldwide. Applications range from food and feed and water analysis to stirring solutions.

Interest Area(s): Analytical, Lipid Oxidation and Quality, Protein and Co-Products

#### **VTA GmbH & Co., Kg** (901)

vta-process.de | Germany

VTA manufactures thin film, wiped film, and short path evaporators and systems. Typical applications include lecithin drying, tocopherol concentration, omega-3 concentrations, and deodorization without 3-MCPD.

Interest Area(s): Processing

### **VUV Analytics, Inc.** (603)

vuvanalytics.com | USA

VUV Analytics is the world leader in vacuum ultraviolet (VUV) absorption spectroscopy. VUV Analytics manufactures the VGA-100, VGA-101, & SVGA-100 universal gas chromatography (GC) and streaming gas detectors. Everything

absorbs strongly in the VUV spectrum. Compounds can be unambiguously identified and quantitated in a variety of applications. VUV detectors provide unmatched selectivity of isomers and coeluting analytes without the need for chromatographic baseline resolution.

Interest Area(s): Analytical

#### **Waters Corporation** (112)

waters.com

Waters Corporation creates business advantages for laboratory-dependent organizations by delivering scientific innovation to enable customers to make significant advancements. Waters helps customers make profound discoveries, optimize laboratory operations, deliver product performance, and ensure regulatory compliance with a connected portfolio of separations and analytical science, laboratory informatics, mass spectrometry, as well as thermal analysis.

Interest Area(s): Analytical

#### **Wenck** (302)

wenck.com | USA

Founded in 1985, Wenck provides environmental, engineering, construction, and response services to both public and private clients across the United States and Canada. We are a team of 275+ technical experts committed to air, water, waste, land/natural resources, and infrastructure. We are your partner and advocate.

#### **Wiley** (110)

wiley.com | USA

The American Oil Chemists' Society has partnered with Wiley to publish the Journal of the American Oil Chemists' Society, Lipids, and Journal of Surfactants and Detergents. Stop by the Wiley booth to browse the journals and take home a fun souvenir photo.

Interest Area(s): Health and Nutrition, Industrial Oil Products, Lipid Oxidation and Quality, Processing, Surfactants and Detergents

#### **Wood** (909)

woodplc.com | USA

Wood is a global leader in the delivery of project, engineering, and technical services to energy and industrial markets. We operate in more than 60 countries, employing around 55,000 people, with revenues of around \$10 billion.

# Inefficiency is your enemy.

# Minimize downtime with equipment that's built to last.

Unleash the power of reliability when you partner with Crown. As the world leader in oilseed processing solutions, our equipment is backed by proven technology, superior design and more than a century of engineering expertise. Crown helps you minimize downtime and overcome inefficiencies, allowing you to consistently honor customer commitments with more confidence and control.

It's time to lead your operation into victory. Crown shows you the way.

RHEOLOGY ON CHIP

Practical solutions for characterization of **stability**, **size**, **& rheological properties** of concentrated dispersions in a non-destructive manner.
